CONCENTRATED LEAVEN,

Bread, Tea-Cakes, all kinds of Pastry, &c. MANUFACTURED BY

EDW. CHAMBERLIN & CO.,

Proprietors of Shawmut Chemical Works. No. 33 INDIA STREET, Boston.

CONCENTRATED LEAVEN is the result of careful chemical research. All its ingredicuts are prepared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much less time, than by any other process; and by the manufacturers submit it, with entire confidence to the indonest of descripting house.

cess; and by the manufacturers submit it, with confidence, to the judgment of descriminating keepers, bakers, &c. Bread of all kinds made by using Concentrated Leaven

is lighter, more digestible and nutritious; has an agreea ble, natural taste; is less liable to sour; will retain it moisture longer than by any other process, and the whole preparation for the oven need not exceed ter

moisture longer than by any other process, and the whole preparation for the oven need not exceed ten minutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is not within reach, as at sea. In all climates and under all circumstances, it may be adopted, thus obviating all difficulty of procuring yeast or other ferme t, which is frequently of an inferior quality, red dering the bread more or less unwholesome.

It is also valuable as regards economy, as it has been assertained that a saving is effected in the flour of not less than 16 per cent. In the common process much of the saccharine of the flour is let by being converted into carbonic acid gas, or spirit, and the waste is incurred solely for the purpose of genorating gas to raise the dough. By using Concentrated Leaven this waste is avoided, and the gas obtained in a manner equally efficacious. Fermentation, as has been stated, destroys a part of the flour or meal, rad, in consequence, a barrel of flour weighing 196 hs., which, by the common method, ordinarily makes about 250 hs of bread, gives by this process 280 hs , thus effecting the very important saving of 16 per cent. in the quantity of flour. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result will invariably be highly satisfactory.

CERTIFICATE FROM DR. HATES,

sult will invariably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,

Assayer to the State of Massachusetts.

"I have analysed the Concentrated Leaven, manufactured by Messra. 8dw Chamberlin & Co., with reference to its purity and efficiency of action in producing the efpet of yeast in distending dough, and thereby rendering e fit for making bread. This article is skillfully comfounded, from perfectly pure material. It raises the dough without consuming the sugar or any other principle in the flour, perfectly; and the same weight of flour will produce more sweet, palatable bread than can be obtained through yeast; while for cakes and pastry it is invaluable, as it saves all risk, and much time of the pastry cook.

pastry cook.

"The experiments made by me confirm the statements made by the manufacturers, and proves this compound worthy of public approval and extended use.

"Respectfully,
"A. A. HAYES, M. D., State Arsayer,
"16 Boylston street, Boston, September 26, 1860."
