Senator Sherman.

We hail with pleasure the election of John Sherman as United States Senator from Ohio, to succeed Gov. Chase. Not but that other excellent selections might have been made—for all candidates were worthy-but Mr. Sherman was best known to the country at large, and his qualifications peculiarly fit him for the Senate at this time. Though not quite thirty-eight years old, Mr. Sherman has served three terms in the lower House of Kentucky.

On the assembling of the Thirty-Sixth Congress he was selected with great unanimity as the Republican candidate for Speaker. But the peculiar composition of the House rendered the nonsensical hue and cry of "Helperism" sufficient to cause the withdrawal of Mr. Sherman, and the substitution of Mr. Pennington in his place with better success. But, like the fabled giant of old, Mr. Sherman touched the ground only to gain strength, and we have no doubt that it was mainly owing to the intrepidity, tact and untiring energy, with which, as Chairman of the Committee of Ways and Means, he drove through the business of three, who are apportioned among the the House, that he has now been promot-States respectively, by dividing the numed to the United States Senate.

He will take his seat at an opportune period. The withdrawal of three such fifths of the slaves is added, by the nummen as Seward, Chase and Cameron ber two hundred and thirty three, and each signally effective within his own the product of such division (rejecting all sphere—leaves a void which it concerns fractions of a unit) shall be the ratio of the country and the Republican party to representation of the several States; but limit as much as possible. And we think as the number and amount of the fracthe Republicans of Ohio have done their tions among so many dividends would, of duty in the premises. The administration will have in Mr. Sherman, a skillful and effective champion in debate, and the country will have a wise, liberal-minded that the whole number should be suppliand hard working public servant, whose future cannot but be brilliant and benefithe largest fractions, until the number
