HARRISBURG, PA. Friday Atternoon, April 12, 1861.

Report of the Select Committee. The select Committee appointed by both branches of the Legislature to conganization of the militia system, have agreed upon a bill which authorizes the appointment of an Adjutant General, Commissary General and Quarter Master General, whose duty it shall be to reorganize the Military forces of this Commonwealth, and at the same time procure proper arms and the necessary equipments able them to do so a sum not exceeding \$500,000 is proposed to be appropriated, from the Treasury.

MISCELLANEOUS.

THE Montgomery papers mention a terrific bombshell, invented by H.L.St. James, of Mobile, for the exclusive use of the Confederacy water cannot extinguisb.

The number of troops now serving in the Pacific division, under the command of Brigadier-General Johnson, is 3,650, including 227 officers. Of this number, 1,425 men are stationed in California. The remainder, 1,925 are distributed throughout Oregon and Washington Territory.

Ir has been suggested that in view of the frequent thefts from mails in all sections of the country, the Government should either refuse to carry money letters, and repeal all laws prohibiting private letter carrying, or else the English money order system, and make it self responsible for the monies it receives.

ANTICIPATING A DISAGREEABLE POSSIBILITY. -- A young German in Jersey City, whose wife is in the habit of using morphine for some purpose to him unknown, has laid the matter before the authorities, ferring, in case she should take an overdose, he might be charged with poisoning her. He says he has applied to the different druggists, urging them not to sell the article; but one of them has refused to comply with his

request and still supplies her. A day or two since, when one of the mail bags coming from the South by way of Alexandria, Va., was emptied in the court yard of the Post Office, a box fell out and was broken open, from which two copperheads, one four and a half and the other three feet long, crawled out. The larger one was benumbed and easily killed; the other was very lively and venomous, and was dispatched with some difficulty and danger. What are we to think of a peo-ple who resort to such weapons of warfare?

Lack of Food in Mississippi.—There can be no doubt that there is in Mississippi a lack of food for the population, which threatens to amount to a famine. The Vicksburg Whig of the 30th ult., notices the return of Major Hawkins, who recently made a visit to Illinois for the purpose of procuring supplies. He states that he has found it impossible to obtain as much as will be needed for present necessities and that there is great danger they may not be able to plant and raise a crop this year.

THE Brandon (Miss.) Republican, of a recen date says :

"There are hundreds of hard-working, honest en, who are almost entirely destitute, and who must suffer unless they get relief in some form. We have heard of a large number of men who bave given up their crops, and gone off to hunt work and get food for their families. If they had the corn to feed their families and stoc they could make a crop and pay for it in the fall. These men do not want it given them. They only want it on a credit until next fall. Our old friend, Hiram Jones, informs us that there is a great deal of destitution in his neigh-berhood, and that, unless relief is afforded within the next ten days, armed bodies of men will take corn by force from those who have it.

Accident at an Oil Well .- The boring for and production of oil in various parts of this State, is producing some very strange results and accidents. The New Castle Courant of the 10th inst. relates the following: On Monday evening last, Mr. E. Wilder, and Mr. Bowman, of this place, proceeded, as usual, to take of the sand pump for a well they had sunk. They succeeded in filling a patent bucket, plugged up the hole, and were just leaving the derrick. Mr. Wilder had a lighted candle in his hand, and in walking past the bucket which contained the oil the flame from the candle appeared to run down to the oil in the bucket with which it communicated. Mr. Bowman immediate distely seized the bucket, intending to carry it out of the derrick. In his haste he struck the door, scattering the burning fluid over his person, and that of Mr. Wilder. Mr. Bowman being in his shirt sleeves was immediately enveloped in flames. Both gentlemen ran toward the creek. Wr. Wilder being behind, with his usual presence of mind seized the shirt of Mr. Bowman, and tore the burning part off, so that the fire was soon extinguished. Mr. Bowman is shockingly burned. It is said that every particle of skin from the elbows to the ends of the fingers of both hands is burned off. Mr. Wilder escaped with the singing of on. Mr. Whiskers and eyebrows, and the destruction of his coat and vest. His clothes were made of wool, and did not burn so rapidly. As soon as the fire was extinguished on their persons, Mr. Wilder returned to the derick and found that wherever the oil had run on the granned it was still haveing. the ground, it was still burning. He covered it with soil, but could not extinguish it until it was entirely burned.
