LOYAL CITIZENS OF REBEL STATES. It is the intention of the government to sustain the loyal citizens of rebel states, in their efforts to rescue their state suthority from the beinds of treason. The government will furnish the loyal citisens of such states with all the means necessary for their protection and preservation, and If believed to be unable to defend themselves against their invaders and oppressors, will speedily come to their aid, with men and arms, in defending and sustaining the constituted authorities of the United States

cherished at the south, is, that on a field of early youth, gave to such insane attempts. Yet we could not fail to see that the very fact of our battle, the northern are the inferiors of the continued existence, as a Republic of freemen southern people. This theory originated with and our unequalled progress in all the element the chivalry themselves, and is part of the fruit of national greatness, must naturally excite of that inordinate vanity which has imbred feelings of jealousy and envy in the minds of of that inordinate vanity which has imbued them with the idea that they are lineally descended heroes from the Gods. But the theory is fast disappearing before the sturdy blows of the federal troops, who are proving to the chivalzy that in the art of war northern mechanics excel as they do in the arts and the accomplishments of peace. In battle, the chivalry are hasty, when they feel certain that the foes they seek to encounter are, numerically, their inferiors; but when they become convinced that the elements of such marauding filibusterism their enemy is an equal, they either leave the field in dismay, or refuse to fight in feigned disregard. In this manner the chivalry escape cle of a huge organized rebellion against the the odium of the inferiority with which they are just becoming impressed.

THE THIRTY-FOURTH STAR .- Yesterday another star was added to our national flag, representing the state of Kansas, which was admitted into the Union on the 28th of last January. This the Union on the 28th of last January. This is in accordance with an act of Congress, future, that these should allow themselves, in ble to States, why not to counties and cities, umph. To attain our ends we must all do our passed April 4; eighteen hundred and eighteen, such numbers, to be cajoled or driven to as of a new state into the Union one star shall be added to the union of the flag; and such adadded to the union of the flag; and such addestroy the very foundation upon which our ditien shall take effect on the fourth day political fabric rests; this surely would have of July next succeeding such admission." It is fitting that, while we mourn the temporary loss - for we cannot call it a permanent one of eleven of our family of states, a new one, representative alike of freedom and progress, should enroll its name on the old family register. Others there are to come, but none, we trust, will encounter such difficulties in the way as did Kansas. She asked for admission when the nation was at peace and she alone distracted by internal troubles: she has gained entrance only when she was at peace and the nation at war.

THE PARLACIES OF SECRETOR. - Much has been well said and learnedly written to expose the fallacies by which it is sought to deduce from the political relations of the states under the constitution a right of "peaceful secession" from the Union. But it may be doubted whether ster all that has been elaborated on the constitution that has been violated to their the subject, a great deal has been added, by way hurt. Friends and Fellow-Citizens: I congratulate you, this day, upon the fact that the Star-Spangled Banner still floats over us; that, though ruthless hands have insulted it, though American bullets have pierced it though American tongues have derided it though traitors have trailed it in the dust and trampled upon it, striving to extinguish the glorious nationality of which it is the sacred emblem, honored by all men from the rising of the sun to the going down of the same; I con gratulate you that, despite all this, hundreds of thousands of enthusiastic warriors are this day in the field to vindicate its honor and to defend it against every foe. I rejoice, with you to-day, that the fiat has gone forth that this flag shall be unfurled upon every hill-top and greeted in every valley from the Atlantic to the Pa

But a year ago, and who would have believed it possible that such a scene could be witnessed on American soil! Had it been foretold that some foreign despotism, or perhaps the leagued monarchies of the old world, envious and ous of our prosperity, irritated by the annoying contrast between our people and their own would resolve upon our destruction, and come down upon our shores, to lay waste our fields tear up our railways, bombard our cities, &c. we might, indeed, have smiled at their folly and recalled with quiet satisfaction the recention A PLEASANT THEORY, long cultivated and that our nation, in its infancy, and again in its those who dread the influence of such an example upon those whom they hold in subjec-

this has inaugurated the war of 1861.

Now, let us briefly examine it in its theory.

and in its application.

Consider the principle tielf. What is it?—It is the assertion of the right, on the part of any State, at any time to renounce its allegiance to the Federal Union and resume all the functions 

terous! To maintain this right under the Constitution s equivalent to the declaration that the framers of this Government deliberately contemplated the contingency of its committing suicide! Nay, more; that they framed the Government with a view to it destruction! And this is asserted in the face of the notorious fact that the original federal compact was set aside and the existing constitution adopted for the special purpose of securing a more perfect Union !... How wretched must be the cause that is driven to would return good for evil.

of aristocratic slaveholders. The prospect was unendurable; they resolved not to submit to such a state of things; but to cut loose from a connection which they foresaw would become more and more grevious to them so long as they clung to their cherished institution, of human chattelism.

But how to accomplish this purpose, this was the question of questions. By the help of a portion of the people of the North they were still in possession of all the three co-ordinate branches of the government—legislative, executive and judicial. There was not so much as one plausible pretext for an open rupture with the government; and they knew too well the tive and judicial. There was not so much as one plausible pretext for an open rupture with the government; and they knew too well the deep seated love for the Union in the hearts of the masses of the people around them them to venture before them with the naked question of Union or Disunion. In this dilemma they adopted an ingenious expedient to secure an apparent ground-for, accusing the North of sections of the remaining the control of the secure an apparent ground-for, accusing the North of sections of the remaining the control of the disease, from the union of the section of the front to secure an apparent ground-for, accusing the North of sections of the remaining the section of the front the secure and section of the first the section of the first the secure and section of the first the section of the first the secure and section of the first the section of the first the secure and section of the first the sect of Union or Diginion. In this diginitarity of the political terrorism that would inaugurate parent ground-for accusing the North of sectionalism and injustice. They deliberately divided one of the great parties of the country and became themselves instrumental in the selection of a Chief Magistrate whose principles secession, which we have seen to be utterly intended to be under the manufacture of the political demagogue; it would in fact be secession of a Chief Magistrate whose principles
