They stimulate the functions of the body into vigorous activity, purily the system from disease. A cold settles somewhere in the body, and obstructist natural innctions. These, if not relieved, react upon themselves and the surrounding organs, producing general aggravation, suffering and disease. While in this condition, oppressed by the derangements, take Ayer's rills, and see how directly they restore the natural action of the system, and with it the buoyant feeling of health again. What is true and so apparent in this trivial and common complaint, is also true in many or the deep-scated and dangerous distempers. The same purgative effec expels them. Caused by similar obstructions and derangements of the natural functions of the body, they are rapidly, and many of them surely, cured by the same means.
