HALLOWEEN. -- To-morrow night is Halloween, an occasion generally commemorated by "rude, uncultivated boys" by shelling windows with corn, thumping doors with cabbage stocks, and having a high old time generally, to the great prejudice of the peace and quiet of the city.

Soldiers' FAMILIES, ATTENTION .- The payments made heretöfore at the Exchange will in future be made at the Sheriff's office, in the Court House (first floor,) on Friday evening of change and be punctual.

O. Edwards, Sec'y.

PROMOTED. Second Lieutenant Thomas A Martin, of Rich Valley, Allegheny county, Pa. has been promoted to a First Lieutenancy in the Fourth Infantry, U. S. A. Mr. Martin was a page of the House of Representatives of this State during the session of 1860, and was last winter employed in the pasting and folding deparsment of the same branch of the legislature.

----A SUBSTITUTE FOR COFFEE. - An exchange gives fat. Lavater, referring to female firebrands, the chesnuts are thoroughly dried in an oven, the shells are removed, and the kernels roasted the chesnuts (some prefer more chestnuts than a small proportion of the genus scold. coffee,) grind, mix together, and prepare in the usual way.

WHILE PASSING ALONG THE STREET the other evening we overheard a gentleman (?) in regimentals declare that he would "sooner stab an abolitionist or a damn black Republican, than he would shoot a secessionist." He was of to our army? Of course the man who thus exor essed himself was a loyal Democrat.

THE MILITIA COMPANIES .- Many of our exchanges noticing our allusion to the fact that a proposition has been made to organize a militia company in each of the six wards of our city, speak very favorable of the project and strongly urge a similar movement in their own localithe loyal States. They know the value of these organizations down in "Dixie," and have long since profited by them to make every man a soldier. We repeat hurry up the militia.

DR. GRO. S. KEMBLE, a native of this city, whose name appears in the list of surgeons recently appointed by the Governor of this State, had been previously examined by a U.S. Medical Commission at Washington, and appointed by the President a brigade surgeon in the regular service. Having accepted this commission, it of course precludes him from serving under that issued from the State authorities, and the vacancy thus created will have to be filled by a new appointment. Dr. Kemble accompanies the great southern expedition.

Sons of St. Crispin out of phia to make a topographical survey of the Susemployment would do well to peg around that quehanna river, have returned to that city. vay.

NEW GUN BOAT .- We understand that Mr.

McCauslin, formerly civil engineer on the Pennsylvania Railroad, has invented an iron clad gun boat, which is said by competent authority to be far ahead, in every respect of anything yet discovered in that line. We learn that drawings and specifications thereof have been submitted to the Government for examination, and there can be but little doubt of its adoption, it half that competent and disinter. plete in every particular.

NUTS TO CRACK !- This season is remarkable for the prolific yield of chestnuts, hickory and walnuts. We have never known them to be so abundant in many years. The squirrels have in prospect a bountiful supply for winter and these provident little denizens of the woods are course unknown to us, but who will not be in- store. Our juveniles are also as busy "as nailspired with solicitude for a cause such as our ers' in garnering up a stock for the long winter evenings. The scarcity of apples, which are almost a total failure in our section, renders it the more important to provide a plentiful supply of nuts, the best substitute at hand, with which to while away the tedium of a dreary winter's evening. Chestnuts do not enter largely into the accumulations of the attic-being

less abundant and difficult to gather, and conties. The idea is certainly a good one and purse. The more humble, but not less delicious, should be acted upon in every city and town in walnut, butternut and hickorynut, are the legitimate reprisals of the juvenile in his forays a-field and in the wood. Thanks to bountiful nature, her gifts in these highly valued wildfruits are without stint or measure this fall.

FATAL RAILBOAD ACCIDENT - Two Men Killed and Several Wounded .- An accident occurred yesterday afternoon on the Northern Central Railway, which resulted in the death of two passengers, and the serious wounding of several others. It appears that the express train for Baltimore was detained at this city to enable some other trains to connect, and when it started it ran at full speed. When it had got a short distance below Howard's tunnel, about eight miles south of York, the engineer discovered a cow on the track, but before he could reverse

the engine or give the warning to put down the brakes, the train ran on the animal, and tice the fact that a number of property holders was thrown from the track. The engine, bagare "paving the way" for the winter by relay- gage car and two passenger cars were broken, ing their sidewalks. The good example thus the last named slightly, and the others more

"LOVE IS LIKE A DIZZINESS."-Sir Walter Scott, in one of his songs, gives the following rather pathetic description of his "feelinks" once, when in love. The old gentleman must have had rather a serious time of it, and we hope his sad fate will be a warning to all injudicious young men, whose hearts are not steel coated against the darts of Cupid. We never had any experience in that line, but should judge, from the effects upon some of our acquaintances, that it must be "awful." Just read what Sir Walter says, and take warning, young men :

ng men : "I tried to sing, I tried to pray, I tried to drown't wi' drinkin' on't, I tried wi' toil to drive't away, But ne'er can sleep for thinkin' on't. "Oh, love ! love ! laddie, Love's like a dizziness, It wanna let a puir boddy Gang about his business.

THE PACIFIC TELEGRAPH.-We have already announced the fact that the Atlantic speaks to the Pacific by the unheard voice of the light sequently too costly for the moderately filled ing--"deep calleth unto deep." We understand that the line is now in fine working order, and messages are constantly passing to and from the golden State. The cost of sending a despatch of ten words from Harrisburg to San Francisco has been fixed at five dollars and ninety cents, and forty-eight cents for each additional word. We believe, however, that none of our

citizens have yet availed themselves of the opportunity to confer thus with their far off west ern friends.

Many of our readers are not perhaps aware that by the completion of this line Cape Race, on the New Foundland coast, and the Golden Horn in the harbor of San Francisco, a distance of nearly five thousand miles, is brought within two hour's telegraphic time of each other. The next westward extension of the line will be, via Behring's Straits to the mouth of the Amoor river, in Asia, to which point the Russian Government is already constructing a line, commencing at Moscow. Moscow being now in telegraphic connection with Liverpool, when the lines to the Amoor are finished from both sides, the whole world will be in telegraphic conneccovered that two of the passengers were killed ern Continent to the eastern extremi
