AYER'S SARSAPARILLA FOR PURIFYING THE BLOOD:

ND for the speedy cure of the sub-Scrofula and Scrofulous Affection such as Tumors, Ulcers, Sores, Eruptions, Pimples, Pustules, Blotches, Boils, Blains, and all Skin Diseases.

Blains, and all skin Diseases.

J. C. Atrac & Co., Gents: I feel it my duty to acknowledge what your Saraparilla has done for me. Having inherited a Scrotulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Ucers on my hands and arms; sometimes turned inward and distressed me at the stomach. Two years ago it broke out on my head and overed my scalp and ears with one sore, which was painful and loathsome beyond description. I tried many medicines and several physicians, but without much relief from any thing. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alternative (Saraparilla,) for I knew from your reputation that any thing you made must be good. I sent to Cincinnati and got it, and used it till it cured me. I took it, as you advise, in small doses of a teaspoonful over a month, and used almost three botties. New and healthy sku soon began to form under the scab, which after a while fell off my skin is now clear, and I knew by my feelings that the disease has gone from my system. You on well believe that I feel what I am saying when I tell you, that I hold you to be one of the ajostics of the age, and remain ever gratefully. Yours,

ALTRED B. TALLEY.

Dr. kopert M. Preble writes from Salem, N. Y., 12th Sep., 1859, that he has cured an invet-rate case of Dropsy, which threatened to terminate fatally, by the persevering use of our Sarsaparilla, and also a dangerous attack of Malignant ary sipelas by large doses of the same says he cures the common Eruptions by it constantly. Bronchocele, Goitre or Swelled Neck.

Zobulon Sioan of Prospect, Texas, writes: "Three bot-tiles of your Sarsaparilla cured me from a Getrus—a hid-eous swelling on the neck, which I had suffered from over two years." Leucorrhœa or Whites, Ovarian Tumor, Uterine Ulceration, Female Diseases.

Uterine Ulceration, Female Diseases.

Dr. J. B. S. Channing, of New York City, writes; "I most cheerfully comply with the respect of your agent in saying I have found your sarsaparilia a most excellent alternative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrofulous disthesis. I have cured many inveterate cases of Leboorrhon by it, and some where the complaint was caused by ulceration of the uterus. The ulceration itself was such cured. Nothing within my knowledge equals it for these female derangements."

Edward S. Marrow, of Newbury, Ala., writes, "A dangerous occurion, frame on one of the females in my family, which had defied all the remedies we could employ, has at length been obmpletely cured by your extract of Sersaparilla. Our physician thought nothing but extipation could afford relief, but he advised the trial of your Sarsaparilla as the last resort before cuting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

NEW ORLEAMS, 25th August, 1959.

Dr. J. C. AYER: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects! I have called with your sarsaparilla.

I have called with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Veneral and Mercurial Disease. One of my patients had syphillic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilia, steadily taken, cured him in five week. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman woo had been treated for the same disorder by mercury was suffeging from this poison in her bouses. They had become so sensitive to the weather that on a damp day she suffered excruciating main in her joints and bones. She, too, was cured entirely by your Sarsaparilia in a few weeks. I know from its formula, which you agent gave me, that this i reparation from your laboratory must be a great remedy; consequently, these truly remarkeble results with it have not surprised me. NEW ORLEANS, 25th August, 1959.

Fraternally yours,

Dr. J. C. Atrac: Sir, I have been affliced with a painful chronic Rheumatism for a long time, which bailled the skill of physicians, and stack to me in spite of all the remedies I could fin , until I tried your Sarsaparilla.—
Une bottle cured me in two weeks, and restored my general hearth so much that I am far netter than beture I was attacked. I think it a wonderful medicine.

Jules Y. Getchell, of St. Leuis, writes: "I have been afflicted for years with an affection of the Liver, which destroyed my health. I tried every thing, and every thing taited to relieve me; and I have been a broken down man for some years from no ther cause than derangment of the Liver. My beloved pastor, the Rev. Mr. Espy, sulvised me to try your Sarsaparrilla, because he said he knew you, and anything you made was worth trying. By the blessing of God it has carred me. I feel young again. The best that can be said of you is not half good enough."

Of the Disease

This is a remedy so universally known to surpass any other for the cure of throat and tung complaints, that it is useless here to publish the evidence of its virtues. Its unrivalled excellence for coughs and colds, and its truly wondernal cures of pulmonary disease, have made it known throughout the civilized banous of the earth.—Few are the communities, or even families, among teem who have not some personal experience of its effects.—some living trophy in their misst of its victory over the suttle and dangerous disorders of the throat and lungs. As all know the dreadful fatality of these disorders, and as they know, too, the effects of this fremedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.

PENNSYLVANIA HOSPITAL. [FROM OFFICIAL HOSPITAL REPORTS.]

[FROM OFFICIAL HOSPITAL REPORTS]

MAY 19, 1860.—Ellen S., 28. 28, single, never was very strong: Two year's ago she had an attack of neutr rheuminism, from which she was confined to her bed for two weeks and subsequently from a relapse for four more. She has been well since then till last Saturday, while engaged in house cleaning, she took cold, had pain in her back, falt cold, hot had no decided chili. Two days latter her anales began so swell, which was followed by swelding of the knee joints and of the hands. She has now dail pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of noute rheumatism, or, as it is now fashionably called, rheumants lever. The a well remarked typical case. We will carefully watch the case, and from time to time dail your attention to the various symptoms which present themselves. My chief oblied in bringing her bedure you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. In an propyd cases. By Awenarius, of St. Petersburg, recommends it in the highest terms, having derived gross concells from its take in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial. I must conless I am always moredious as to the worth of new remedies, which are vaunted as specified; but this comes to us recommended so highly, that we are bound to give it a trial.

SAME CASE FOUR DAYS LATER I MAY 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was then laboring under an attack of acute the management which had steadily taken it in does of three grains every two hours (intermitting it at night.) The day after you was the, I tound her much more comfortable, better than she arrected to be for a week or more, judging from her ether attack. (The patient how walked into the room.) The improvement has steadily progressed, and you cannust fall to notice a marked change in the appearance of her joints, which are now nearly all of their natural size.—I thus far our experiment would have seemed, very successful; but, gentlemen, we must wait a little while better essuit.

Here is another patient who was placed on the use of

the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; the has long been suffering from a bronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knowing upon her swellen and tease. She took the chloride of Propytamue in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER !!

THREE DAYS LATER!!

May 26, 1860.—This is the case of acute rheumatism trease i with propylamine, the first of those to which i called your attention at our last chinic, the is stell, yery comfortable, and is now taking three grains three daily. In this case it has seemed to be followed by very that islactory results. The second cust to windryour attention was called at our last lecture, has size contained to do welt. I will now bring before you a very charlet artistic case of acute rheumation, and if the result be satisfactory, I think, as good jurymen, we shall justly render our versict in favor of propylamine.

He is a seaman, set. 26, who was admitted a few days ago. Has had consistent rheematic panis, but not so at keep his bed, until alght days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper expendition. These lonins are all swollen, tense and tender. His tongue is furred, this skin, at precent dry, though there had been to his skin, at precent dry, though there had been to his skin, at precent dry, though there had been to his sweating. His putse is full and strong, and about 90.—He has now used propylamine for tweety four hours.

This gentleman is what may be called a strikely by pleal case of soute rheumatism. There was exposure to sold and wet, and this exposure is followed by a fredling of coldness, severe articular pain, beginning, as it, usually does, in the lower joints. There is fever and the profuse sweating, so generally attachdant on souse rheumatism. I did not bring this patient to again give at this father had been wrenedy we are testing, and to artiful there to the new remedy we are testing, and to artifult there to the new remedy we are testing, and to artifult there to the medicines, ever anolynes; this the sending times as to which was the efficient remedy. Yes shall see the case of a future citation.
