GENTLEMEN: Your note of the 15th inst., has been recieved, saying that you had heard that I had been benefited by the use of Wood's Hair Restorative, and requesting my certificate of the fact if I bad no objection to give it.

I award it to you cheerfully, because I think it due.—

I award it to you cheerfully, because I thing it due.—
My age is about 50 years; the color of my hair adourn,
and mel ned to curl. Some five or six years since it begar of turn gray, and the scalp on the crown of my head
to years sensibility and dandruft be form upon it. Each

me baid.

tour months since a fourth was added to them, by hair falling off the top of my head and threatening to make me baid.

In this unpleasant predicament, I was induced to try wood's Hair Restorative, mainly to arrest the falling off of my hair, for I had really no expectation that gray hair could ever be restored to its original color exceptrom dyes. I was, however, greatly surpuised to find after the use of two bottles only, that not only was the falling off arrested, but the color was restored to the gray hairs and sessibility to the scally, and dandruft cased to form on my head, very much to the gratification of my wile, at whose solicitation I was induced to try it.

For this, among the many obligations I owe to her sex, strongly recommend all husbands who value the admiration of their wives to profit by my example, and use it if growing gray or getting baid.

AYER'S SARSAPARILLA FOR PURIFYING THE BLOOD:

A ND for the speedy cure of the sub-joined varieties of Disease: Scrofula and Scrofulous Affection such as Tumors, Ulcers, Sores, Eruptions, Pimples, Pustules, Blotches, Boils, Blains, and all skin Diseases.

Blains, and all skin Diseases.

Oakland, Ind., 6th June, 1859.

J. C. Ayre & Co., Gents: I feel it my duty to acknowledge what your Sarsaparilla has done for me. Having inherited a Scrotulous infection, I have suffered from it in various ways for years. Sometimes it burst out in various ways for years. Sometimes it burst out in various ways for years. Sometimes turbed inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and losthsome beyond description. I tried many medicines and several physicians, but without much relief from any thing. In fact, the disorder grew worse. At length I was reloiced to read in the Gospiel Messenger that you had prepared an alternative (sarsaparilla) for I knew from your reputation that any thing you made must be good. I sent to Cincinnati and got it, and used it till it cured me. I took it, as you advise, in small coses of a teaspoonful over a month, and used almost three bottles. New and healthy skn soen began to form under the scab, which after a while fell off my skin is now clear, and I know by my feelings that the disease has gone from my system. You c. well believe that I fele what I am saying when I tell you, that I hold you to be one of the at ostles of the age, and remain ever gratefully.

Dr. J. B. S. Channing, of New York City, writes; "I most cheerfully comply with the respect of your agent m saying I have found your sarapartila a most excellent alternative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrofulous diathesis. I have oured many invectrate cases of Leucorthoas by it, and some where the complaint was caused by ulceration of the uterus. The ulceration itself was soon cured. Nothing within my anowledge equals it for these female derangements."

Edward S. Marrow, of Newbury, Ala, writes, "A dangerous ovarian tamor on one of the females in my family, which had defied all the remedies we could employ, has at length been completely cured by your extract of Sursaparilla. Our physician thought nothing but extipation could afford relief, but he advised the trial of your darsapacilla as the last resort before conting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

NEW ORIEANS, 25th August, 1959.

Dr. J. C. Ayer: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its iffects truly wonderful in the cure of Veneral and Mercurial Diseases. One of my patients had syphiltic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilla, steadily taken, oured him in five week. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the westher that on a damp day she suffered exeruciating ania in her joins and bonos. She, too, was urred entirely by your Sarsaparilla in a few weeks. I know from its formula, which you agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkeble results with the average of the preparation of the complaint.

I think it a wonderful medicine.

Jules Y. Getchell, of St. Leuis. writes: "I have been afflicted for years with an affection of the Liver, which destroyed my health. I tried every thing, and every thing failed to relieve me; and I have been a broken down man for some years from no ther cause than derangment of the Liver. My beloved pastor, the Rev. Mr. Espy, advised me to try your Sarsaparrilla, because he said he knew you, and anything you made was worth trying. By the blessing of God it has cured me. I feel young again. This is a remedy so universally known to surpage any other for the cure of throat and tung complaints, that it is useless here to publish the cyclence of its virtues. Its univalled excellence for coughs and colds, and its truly wonderful cures of pulmonary disease, have made it known throughout the cyclised nations of the earth.—Few are the communities, or even families, among them who have not some personal experience of its effects—some hving tropby in their misst of its victory over the shorten and langerous disorders of the throat and lungs. As all known the dreauth family of these disorders, and as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the virgues that it did have when making the cures which have wen so strongly upon the confidence of mankind.

PENNSYLVANIA HOSPITAL. [FROM OFFICIAL HOSPITAL REPORTS]

[FROM OFFIGIAL HOSPITAL REFORTS.]

MAY 19, 1860,—Ellea S., æt. 28, single, never was very strong. Two years ago she had an attack of acute rheumatism, from which she was confined to her bed for two weeks and subsequenty from a relapse for four more. She has been well since then till List Saturday, while engaged in house cleaning, she took cold, had pain in her back, felt cold, hot had no decided chill. Two days later her ankles began so swell, which was followed by swelling of the knee joints and of the hands. She has now dull pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of acute rheumatism, or, as it is now fashionably called, rheumatic lever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My chief object in bringing her befure you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. Im an propylamine. Dr. Awenarius, of St. Fejersburg, recommends it in the highest terms, having derived great ueneft from its use in 250 cases, which girdly deed his care. Various commendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial. I must confess I am always incredulous as to the worth of new remedies, which are vanuted as specifies; out this comes to us recommended so highly, that we are bound to give it a trial.

SAME CASE FOUR DAYS LATER!

May 23, 1860.-I will now exhibit to you the patient fo whom I prescribed Propylamuse, and was then laboring under an attack of acute rheumatistic. She has steadily taken it in does of three grants for you hours (intermitting it at night.) The day after you saw her, I tound her much more comfortable; better than she excound her much more comfortable, better than she expected to be for a week or more, judging from her of ther attack. (the patient now waken into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of her joints, which are now hearly all of their natural size.—
Thus far our experiment would have seemed very successful; but, gentlemen, we must wait a little-while before we can give a decided opinion as to what is to be the result.

the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; shi has long upon suffering from a nronic rneumatism, and I found her at that time with an acute whack supervening upon her chrodic affection. The wrist-said knuckles were much swollen and tease. She took the guloride of Propylamine in three grain does over the pours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

May 26, 1860 .- This is the case of acute rheumatism

MAY 26, 1860.—This is the case of acute rheumatism treates with propylamine, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very, satistactory results. The second case to watch your attention was called at our last lecture, has also continued to do well. I will now bring before you a very contracteristic case of acute theumatism, and if the result be satfactory, I think, as good juryanen, we shall justly render our verticit in favor of propylamine.

He is a seaman, set. 25, who was admitted a few days ago. Has had occasional rheamatic pains, but not so as to keep his bed, until cight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swelled, tense and tender. His tongue is fortered; his skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours. This gentleman is what may be called a strictly typical case of acute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There is fever and the profuze sweating, so generally attendant on acute rheumatism. In the again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there could not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, ever a anoilynes, that there may be no misgivings as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A TAVODADITE VEDITOR JUNE 9, 1860 .- The next of our convalescents is athe

age of acute rheum itism before you at our clinic of May oth, which I then called a typical case, and which it 28th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain upses every two hours for four days. The patient has got along very nucely, and is now able to walk about, as you see. I do not hesitate to say that I have neven seen as severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride of Propylamine, the patients have regained their health much earlier than under the treatment ordinarily pursued. I wish gentlemen, you would yourselves try it, and report the results.

. For a full report of which the above is a condensed extract, see the Philadelphia Medical and Surgical Reorter. It is the report after a fair trial by the best med. ical authority in this country, and makes it unnecessary to give numerous certificates from astonished doctors
