AYER'S SARSAPARILLA FOR PURIFYING THE BLOOD.

A ND for the speedy cure of the sub-joined varieties of Disease: Scrofula and Scrofulous Affection such as Tumors, Ulcers, Sores, Eruptions, Pimples, Pustules, Blotches, Boils, Blains, and all Skin Diseases.

J. C. AYER & Co., Gents: I feel it my duty to acknowledge what your Sarsaparilla has done for me. Having nherited a Scrofulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Uses son my hands and arms; sometimes turned inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond description. I tried many medicines and several physicians, but without much relief from any thing. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an hernative (Sarsaparilla,) for I knew from your reputation that any thing you made must be good. I sent took it, as you advise, in small doses of a teaspoonful over a month, and used almost three bottles. New and healthy skn soen began to form under the scab, which after a while fell off my skin is now clear, and I knew by my feelings that the disease has gone from my system. You e. well believe that I feel what I am saying when I tell you, that I hold you to be one of the a ostles of the age, and remain ever gratefully. Yours,

Alfried B. Talley.

Dr. Rooert M. Preble writes from Salem, N. Y., 12th Sep., 1859, that he has cured an involvrate case of Dropsy, which threatened to terminate fatally, by the persevering use of our Sarsaparilla, and also a dangerous attack of Malignant krysipelas by large doses of the same says he cures the common Eruptions by it constantly. Bronchocele, Goitre or Swelled Neck, Zebulon Sioan of Prospect, Texas, writes: "Three bot-tile of your Sarsaparilla cured me from a Gerrax—a hid-cous swelling on the neck, which I had suffered from over two years."

Uterine Ulceration, Female Diseases.

Dr. J. B. S. Channing, of New York City, writes; "I most cheerfully comply with the respect of your agent in saying I have found your sarsaparilia a most excellent alternative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrofulous disthesis. I have cured many inveterate cases of Leucorrhom by it, and some where the complaint was caused by ulceration of the ulcrus. The ulceration itself was soon cured. Nothing within my knowledge equals it for these female derangements."

Edward S. Marrow, of Newbury, Ala., writes, "A dangerous orarian tumor on one of the females in my family, which had defied all the remedies we could employ, has at length been completely cured by your extract of Sersaparida. Cur physician thought nothing but extipation could alford relief, but he advised the trial of your sarsaparilla as the last resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

NEW ORIEMS, 25th August, 1959.

Dr. J. C. Ayek: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have cared with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Veneral and Mercurial Diseases. Une of my patients had syphilitic ulcers in his throat, which were consuming his pelate and the top of his mouth. Your Sarsaparilla, steadily taken, cured him in five week. Another was utacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by moreury was suffering from this poisso in her boues. They had become so sensitive to the weather that on a damp day she suffered exeruciating rain in her joints and bones. She, too, was cured entirely by your Sarsaparilla is a few weeks. It know from its formula, which you agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkeble results with it have net surprised me.

Fraternally yours,

cured entirely by your sarasparilla is a few weeks. I falling off the top of my head and threatening to make his freparation from your laboratory must be a great in this unpleasant predienment, I was induced to try Wood's Hair Restorative, mainly to arrest the falling off of my hair, for I had really no expectation that gray hair could ever be restored to its original color except from dyes. I was, however, greatly surprised to find after the use of two bottles only, that not only was the failing off arrested, but the color was restored to the gray hairs and sensibility to the scalp, and dandrud ceased to form on my head, very much to the gratification of my wite, at whose solicitation I was induced to try it. For this, among the many obligations I owe to her sex, strongly recommend all husbands who value the admiration of their wives to profit by my example, and use it it growing gray or getting baid.

Of the Disease

This is a remedy so universally known to surpage any other for the cure of throat and lung complaints, that it is useless here to publish the evidence of its virtues. Its univalled excellence for coughs and colds, and its truly wonderful cures of pulmonary disease, have made it known throughout the civilized nations of the earth.—Few are the communities, or even families, among them who have not some personal experience of its effects.—some living trophy in their minut of its victory over the subtle and daugerous disorders of the throat and lungs. As all know the dreadful fatality of these disorders, and as they know, to, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.

PENNSYLVANIA HOSPITAL.

PENNSYLVANIA HOSPITAL.

[FROM OFFICIAL HOSPITAL REFORMs.]

MAY 19, 1860,—Elles S., set. 28, single, never was very strong. Two years ago she had an attack of acute rheumatism, from which she was confined to her bed for two weeks and subsequent, from a relapse for four more. She has been well since then till last Satur day, while engaged in house cleaning, she took cold, had pain in her back, felt cold, hot had so decided chill. Two days later her ankles began so swell, which was followed by swelling of the innee joints and of the hands. She has now dull pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of soute rheumatism, or, as it is now fashionably called, rheumatic lever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My ohlef object in bringing her befure you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. Im an propylawise. Dr. Awenaritus, of St. Petersburg, recommends to in the highest terms, having derived great cenefit from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial. In must confess I am always incredulous as to the worth of new remedies, which are vaunted as specifics; but this comes to us recommended so highly, that we are bound to give it a trial.

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

MAY 23, 1830.—I will now exhibit to you the patient for whom I prescribed Propysamine, and was then laboring under an attack of acute rheumatism. She has steadily taken it in doses of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her of ther attack. (the patient now walked into the room.) The improvement has steadily progressed, and you cannot fall to notice a marked change in the appearance of her joints, which are now nearly all of their natural size.—Thus far our experiment would have seemed vory successful; but, gentlemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; sha has long begn suffering from c bronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and teuse. She took the chloride of Propylamine in three grain does every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

THREE DAYS LATER!!

MAY 28, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satistactory results. The second c. se to winch your attention was called at our last lecture, has also continued to do well. I will now bring before you a very characteristic case of acute rheumatism, and if the result be satfactory, I think, as good jurymen, we shall justly render our verdict in favor of Propylamine.

He is a seaman, st. 28, who was admitted a few days ago. Has had cotacional rheumatic pause, but not so as to keep his bed, until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swellen, tense and tender. His tongue is furred; his skin, as present dry, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours.

This gentleman is what may be called a strictly typical case of acute rheumatism. There was exposure the colon and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the intention of giving you a lecture on all the points to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there could not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, even anolynes, that there may be no misgiving as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

JUNE 9, 1860.—The next of our convalescents is ithe June 9, 1860.—The next of our convalescents is the case of acute rheumatism before you at our clinic of May 26th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The patient has got along very nicely, and is now able to alk about, as you see. I do not hesitate to say that I have neves seen as severe a case of acute rheumatism so soor restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride of Propytamics, the painters have revained their health Propriamine, the patients have required their health much earlier than under the treatment ordinarily pursued. I wish gentlemen, you would yourselves try it, and report the results.

For a full report of which the above is a condensed extract, see the Philadelphia Medical and Surgical Reporter. It is the report after a fair trial by the best med ical authority in this country, and makes it unnecessor to give numerous certificates from astonished doctors and rejoicing patients.
