ELIXIR PROPYLAMINE, THE NEW REMEDY FOR RHEUMATISM.

A NEW REMEDY. A CERTAIN REMEDY. FOR ACUTE RHEUMATISM, CHRONIC RHEUMATISM, RHEUMATISM OF EVERY KIND, HOW STUBBORN, HOW LONG STANDING, WILL CONQUER IT, WILL CURE IT.

THE BEST TESTIMONY. THE BEST MEDICAL AUTHORITY. DOCTORS KNOW IT, PATIENTS BELIEVE IT, TRIED AND TRUE.

PENNSYLVANIA HOSPITAL. (FROM OFFICIAL HOSPITAL REPORTS.) MAY 19, 1860.—Ellen S., 28, single, never was very strong. Two years ago she had an attack of acute rheumatism, from which she was confined to her bed for two weeks and subsequently from a relapse for four more. She has been well since then till last Saturday, while engaged in house cleaning, she took cold, had pain in her back, felt cold, but had no decided chill. Two days later her right knee and hip were affected, but the right knee joints and of the hands. She has now dull pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of acute rheumatism, or, as it is now fashionably called, rheumatic fever. It is a well recognized typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My chief object in bringing her before you now, is to call attention to a remedy which has recently been mentioned in the treatment of rheumatism. I am in a group of cases, Dr. A. W. A. of St. Petersburg, recommends it in the highest terms, having derived great benefit from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial. I must confess I am always incredulous as to the worth of new remedies, which are vaunted as specific; but this case is so well adapted to the case, and I am so bound to give it a trial.

SAME CASE FOUR DAYS LATER! MAY 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and who has been suffering from chronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and tender. She continued to take the Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!! MAY 26, 1860.—This is the case of acute rheumatism treated with Propylamine, and who has been suffering from chronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and tender. She continued to take the Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THE RESULT. JUNE 1, 1860.—The next of our convalescents is the case of acute rheumatism before you at our clinic of May 23, which I then called a typical case, and which was remarked as a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The patient has got along very nicely, and is now able to walk about, as you see. I do not hesitate to say that I have never seen so severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to do so. The patient is now in the use of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride of Propylamine, the patients have regained their health much earlier than when treated with ordinary remedies. I wish gentlemen, you would yourselves try it, and report the results.

For a full report of which the above is a condensed extract, see the Philadelphia Medical and Surgical Reporter. It is the report after a fair trial by the best medical authority in this country, and makes it unnecessary to give numerous certificates from distinguished doctors and rejoicing patients.
