A ND for the speedy cure of the sub-joined varieties of Disease:

Scrofula and Scrofulous Affection such as Tumors, Vicers, Sores, Eruptions, Pimples, Pustules, Blotches, Boils, Blains, and all Skin Diseases.

Blains, and all Skin Diseases.

J. C. Ayra & Co., Gents: I feel it my duty to acknowledge what your Sareapsirilla has done for me. Having inherited a Scrotulous infection, I have suffered from it in various ways for years. Sometimes it burst out in various ways for years. Sometimes it burst out in ward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond describtion. I tried many medicines and several physicians, but without much relief from any thing. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alternative (Sarsaparilla) for I knew from your reputation that any thing you made must be good. I sent to Cincinnati and got. It, and used it till it cured me. I took it, as yon advise, in small doses of a teaspoonful over a month, and used almost three bottles. New and healthy skn seen began to form under the scab, which after a while fell off my akin is now clear; and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am asying when I tell you, that I hold you to be one of the aj ostles of the age, and remain ever gratefully. Yours.

Dr. J. B. S. Chansing, of New York City, writes; "I most cheerfully comply with the respect of your agent in saying I have found your sarsaparilla a most excellent alternative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrotulous diathesis. I have cured many inveterate cases of Leucorthese by it, and some where the complaint was caused by ulceration of the ulcrus. The ulceration itself was soon cured. Nothing within my unowledge equals it for these female derangements." Edward S. Marrow, of Newbury, Ala., writes, "A dangerous ovarian tumor on one of the females in my family, which had defied all the remedies we could employ, lms. at length been completely cured by your faxract of Sarsaparilla. Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparilla as the last resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the desease remains."

Syphilis and Mercurial Disease. NEW ORLEANS, 25th August, 1959.

Dr. J. C. AYEE: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla.

I have cured with it, in my practice, most of the complaints for which it is recommended; and have found its effects truly wonderful in the cure of Veneral and Mercural Disease. One of my patients had syphilitic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilla, sleadily: taken, cured him in five week. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered excrudating rain in her joints and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which you agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkeble results with it have not surprised me.

Fraternally yours,

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

May 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was then laboring under an attack of acute iricumatism. She has steadily taken it in doses of three grains every two hours (intermitting it at night.) The day after you saw her, I found har much more comfortable, better than she expected to be for a week or more, judging from her other attacs. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of her joints, which are now nearly all of their natural size—Thus far our experiment would have seemed very successful; but, gehtlemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been suffering from c hronic 'rheumatism, and I found her at that time with an acute attack supervoning upon her chronic affection. The wrist; and knuckles were much swollen and tense. She took the chloride of Propylamine in three grain doses everytwo hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

THREE DAYS LATER!!

MAY 26, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last chiefe. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second c se to which your attention was called at our last lecutre, has also continued to do well. I will now bring before you a very characteristic case of soute rheumatism, and if the result be satfactory, I think, as good jurymen, we sdall justly render our verdict in favor of propylamin:

He is a seaman, set 26, who was admitted a few days ago. Has had occasional rheumatic pams, but not so as to keep his bed until eight days ago. The palue began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremitles. These joints are all swollen, tense and tender. His tongue is furred; his skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours.

This genileman is what may be called a strictly typical case of a cute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness; severe articular psin; beginning, as it is use ally does, in the lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the intention of giving you a lecture on all the points connected with rheumatism, but to again give "a trial to the now remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there co did not the after opportunity for testing the medicine in question. We are therefore, avolding the use of all other medicines, even anolyness, that there may be no misgivings as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

JUNES, 1860.—The next of our convalencents is ; the case of acuterheumatism before you at our clinic of May 26th, which I then called a typical case; and which it was remarked was a fair opportunity for testing the worth of bur new remedy. It was therefore steadily given in three grain dozes every two hours for four days. The patient has got along very nicely, and is now able to walk about, as you see: I do not hesistate to say that I have neves seen as severe a case of acute, rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride of Propylamine, the patients have regained their health much earlier than under the treatment ordinarily pursued. If wish gentlemen, you would yourselves try it, JUNE 9, 1860.—The next of our convalescents is ? th ed. I wish gentlemen, you would yourselves try it
