Biains, and all skin Diseases.

OMELAND, Ind., 6th June, 1859.

J. C. Ayes & Co., Senis: I feel it my duty to acknowledge what your Sarsaparilla has done for me. Having sherited a Sorofulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Ulce's on my hands and arms; sometimes turned inward and distressed me at the stomach. Two years ago it broke out or my head and covered my scalp and ears with one sore; which was painful and loathsome beyond description. I tred many medicines and several puysicians, but without much relief from any thing. In fact, the disorder-grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an iternative (Sarsaparilla.) for I knew from your reputation that any thing you made must be good. I sent to Ginenmati and got it, and used it till it cured me. I took it, as you advise, in small doses of a teaspounful over a month, and used; almost three bottless. New and healthy sku soen began to form under the scab, which after a while fell off my skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the a ostles of the age, and remain ever gratefully. Yours,

ALFRED B. TALLEY.

St. Anthony's Fire, Rose or Erysipelas, Tetter and Salt Rheum, Scald Head Kingworm, Sore Eyes, Dropsy.

Dr. kooert M. Preble writes irom Salem, N. Y., 12th Sep., 1859, that he hus cured an invet rate case of Dropsey, which threutened to terminate fatally, by the persevering use of our Sarsaparılla, and also a dangerous attack of Malignant Erysipelas by large doses of the same says he cures the common Eruptions by it constantly.

Bronchocele, Goitre or Swelled Neck. Zebulon Sloan of Prospect, Texas, writes: "Three bot-tles of your Sarsaparills cuted inc from a Gerris—a hid-cous swelling on the neck, which I had suffered from over two years." Leucorrhœa or Whites, Ovarian Tumor,

Uterine Ulceration, Female Diseases.

Dr. J. B.S. Channing, of New York City, writes; "I most cheerfully comply with the respect of your agent in saying I have found your sarsaparilla a molickxellent laternative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scroftious diathesis. I'll ive cured many inveterate cases of Ledoorrhoos by it, and some where the complaint was caused by ulceration of the uterus. The ulceration itself was soon cured. Nothing within my snowledge equals it Lit these female derangements."

Edward S. Marrow, of Newbury, Ala., writes, "A dangerous ourian tumor on one of the females in my family, which had defied all the remedies we could omploy, has at length been completely cured by your extract of Sarsaparilla. Our physician thought nothing but extigation could afford relief, but he advised the trial of your sarsaparilla as the last resort, before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains." Uterine Ulceration, Female Diseases.

Syphilis and Mercurial Disease.

Dr. J. C. Ater.: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects. I have realized with your Sarsaparilla.

I have coured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Veneral and Mercurial Diseass. One of my patients had syphilize ulcers in his throat, which were consuming his palste and the top of his mouth. Your Sarsaparilla, steadily taken, cured him in five week. Another was attacked by secondary symptoms in his nose, and the ulceration had esten away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman-wno had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered exerculating pain in her joints and bones. She, too, was cured entirely by your Sarsaparilla in a few weeks. I know from its formula, which you agent gave me, that this Preparation from your laboratory; must be a great remedy; consequently, these truly remarkeble results with it have not surprised me.

Fraternally yours.

four months since a fourth was naded to them, by hear falling off the top of my head and threatening to make me hald.

In this unpleasant predicament, I was induced to try wood's Hair Restorative, mainly to arrest the falling off of my hair, for i had really no expectation that gray hair could ever be restored to its original color exception dyes. I was, however, greatly surprised to find after the use of two bottles only, that not only was the falling off arrested, but the color was restored to the gray hairs and seasibility to the scalp, and dandruft ceased to form on my head, very much to the gratification of my wile, at whose solicitation I was induced to try it.

For this, among the many obligations I owe to her sex, strongly recommend all husbands who value the admiration of their wives to profit by my example, and use tif growing gray or getting baid.

FOR THE RAPID CURE OF -Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Con-sumption, and for the Relief of Consumptive Patients in advanced Stages of the Disease

This is a remedy so universally known to surpage any other for the cure of throat and tung complaints, that it is useless here to unblish the evidence of its virtues. Its univalled excellence for cought and colds, and its truly wonderful cures of pulmonary disease, have made it known throughout the civilized nations of the carth.—Few are the communities, or even families, among them who have not some personal experience of its effects—some living trophy in their minut of its victory over the subtle and dangerous disorders of the throat and lungs. As all know the dreactul fatality of these disorders, and as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.

PENNSYLVANIA HOSPITAL. [FROM OFFICIAL HOSPITAL REPORTS.]

[FROM OFFIGIAL HOSPITAL REPORTS.]

MAY 10, 1860;—Ellen S.; set. 28, single, never was very strong. Two years ago she had an attack of acute rhouma tism; from which she was confined to her bed for two weeks and subsequent. I from a relapse for four more. She has been well since then till listic Satur day, while engiged in houselening, she took cold, had pain in her back, felticold, hot had so decided chill. Two days later her ankles began so swell, which was followed by swelling of the since joints and of the hands. She has now don't pain in her shoulders, and her knuckles are very tender, red and pathful; both hands are afte ted, but the right is most 150. This, then, is a case of acute rhoumatism, or, as it is now fashionably called, rheumatic tover. It is a well remarked typical case well carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My chief object in bringing her before you now, is to call attention to a remedy, which has recently been recommended in the treatment of rheumatism. I man propylamine. Dr. Awenarius, of St. Petersburg, recommends it in the highest terms, having derived great cenefit from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our journals and I promose therefore to vive it another in 200 cases which came under his care. Various com-mendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial. I must confess Tamalways incredulous as to the worth of new remedies, which are vaunted as specifies; out this comes to us recommended so highly, that we' are bound to give it a trial.

SAME CASE FOUR DAYS LATER! SAME CASE FOUR DAYS LATER!

May 23, 1860.—I will now exhibit to you the patient for whom I prisoribed Propytamine, and wa steen taborsing under an attack of acute rheumatism. She has steadily taken it in doses of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (the patient now walked into the rood.) The improvement has steadily progressed, and you cannot dail to notice a marked change in the appearance of her joints, which are now nearly all of their natural size.—
Thus, far our experiment, would have seemed very successful; but, gentlemen; we must wait a little white better essuit.

lore we can give a decided opinion as to what is to be the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been sulforing from 6 profite Theumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and teries. She took the enfortde bf Propylamine is three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

MAY 26, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last chinds. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to do well. I will now bring before you a very characteristic case of acute rhaumatism, and if the result be satisfactory. I think, as good jury men, we shall justly render our verdict in favor of propylamin. He is a seaman, sat. 26, who was admitted a few days go. Has bas occasional rheumatic pains, but not so as to keep his bed, until eight days ago. The pains began in his right knes, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swollen, teues and tender. His tonge is forred, bis skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—Ne has now used propylamine for twenty-four hours. This genteman is what may be called a strictly typical case of acute rheumatism. Toere was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severa articular pain, beginning, as it usually does, in the lower joints. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severa articular pain, beginning, as it usually does, in the lower joints. There is lever and the profuse sweating, so generally attendant of acute rheumatism. I did not bring this patchet before you with the intention of giving yon a lecture on all the points connected with rhoumatism, but to again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there could not be a fairer opportunity for testing the medicine in question: We are, therefore, avoiding the use of all other medicines, even and tynes, that there may be no misgivings as to whi

THE RESULT.

JUNE 9, 1860.—The next of our convalencents is the case of acuterheumatism before you at our clinic of May 26th, which I then called a typical case, and which it was remarked was a fair opportunity for tosting the worth of our new remedy. It was therefore is takadily given in three grain does every two hours for four days. The patient has got along very nicely, and is now able to valk about, as you see. I do not nest tate to say that I have neves seen as severe a case of acute rheumatism so soon restored to idealth as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used; I feel bound to state that in the cases in which we have tried the Chloride of Propyamine, the patients have regained their health much earlier than under 'lie treatment 'ordinarily pursued; I wish gentlemen, you would yourselves try it, and report the results.

For a full report of which the above is a condensed extract, see the Philadelphia Medical and Surgical He porter. It is the report after a fair trial by the best med ical authority in this country, and makes it unnecessary to give numerous certificates from astonished doctor and rejoicing patients.
