Ireland is on the side of sirgedom, and therefore opposed to British diplomacy-and when that diplomacy seeks to embroil Great Britain and the United States, the British ministry must look elsewhere than in Ireland for men to sustain their wrongs. Already have the Irish people entered their protest against all British interference in the quarrels of the American people, unless it be all other governments owe our own, to prevent the violent destruction of institutions in which are centred the hopes of religion, humanity and peace throughout the world. However much the British aristocracy may sympathize with an effort to destroy free government, the British throne rests on what is called constitutional liberty, and when the Federal constitution is obliterated, the boasted Magna Charta of England may be the next to fall and be destroyed by the same ruthless hand of oppression.

We must cherish this sympathy of the Irish people for the cause of constitutional liberty on this hemisphere. It will eventually be the means of checking the fell spirit of English despotism, so long disguised under English hypocrisy, simply because the government of Great Britain dare not trust her armies, when composed of Irishmen, in a conflict with the people of this country.

#### POTTER'S REPORT.

The Chicago Tribune says it has information from Washington, coming through half a dozen independent sources, which leads it to believe that the publication of the Report of Hon. J. E. The publication of the document itself is, we learn, only is in service over four months, and there has delayed by new evidence of dislovalty in persons that thus far have avoided suspicion which the Committee is engaged in sifting. The report will show that the reason why the enemy is always posted in regard to the movements of our armies, in advance often of officers to whom the execution of these movements is entrusted, is found in the fact that the Departments are even at this day full of the malignant, and of course, active enemies of our Government and our cause; and that no plan can be so secretly matured that it can escape the vigilance of the servants of the Southern Confederacy who are taking their daily bread from the Treasury of the United States.

THE ENGLISH PRESS continues to fan the flames of war. If its utterances were to be taken as conclusive of the intentions of the British Government, a declaration of war might nineteen regiments, while our Generals allowed be looked for at any moment. But, fortunately, Ord's brigade to retreat back to the quarters of the issue depends upon a different tribunal. Statesmen, properly impressed with the magnitude of the interests involved, are entrusted with the adjustment of the question in dispute and we may safely confide in their wisdom and in either, they adjourned until the last of sincerity of purpose to do what honorably may be done to avert a conflict.

I spoke of the glitter of fifty thousand bayonets. I have not seen an estimate of the strength of Gen. Banks, but it cannot be far short of that. SECESSION DESIGNS ON MEXICO. - Information recently received by Government from official sources in California, indicate that a body of fillibusters, acting in the interest of the Jeff. Davis rebellion, threaten to make a descent upon the Mexican State of Senora, with a view to the seizure and occupation of Guaymas, on the Gulf of California. The latter port would be of great value to the Rebels as a point from which to send out privateers to prey upon our commerce in the Pacific, and especially to seize California treasure ships, whose usual route lies directly across the mouth of the Gulf. The danger of a rebel descent is deemed so inaminent that the Executive has been carnestly recommended to authorize the immediate occupa-tion of Guaymas by a National force from the

The Government Stables Destroyed.

TWO HUNDRED HORSES BURNT

WASHINGTON, Dec. 26. A fire broke out about 10 o'clock last night in the Government stables near the Observatory. They contained over six hundred horses, etween one hundred and fifty and two hun dred of which perished. Of a train of one hundred and two horses, belonging to a Massacht setts regiment, only eleven were, it is said, saved. Some of the animals were so shockingly burnt that it was judged humane to shoot then in oader to relieve them from their suffering.

It is supposed that the conflagration resulted

from carelessness. So rapidly were the flames communicated to the various racks, which were filled with hay, that the horses in the stalls vere nearly all at the same time suffocated.-The scene was most sickening and offensive. The remainder of the horses, not immediately near the fire, were either set loose or broke their fastenings, and wildly ran in different directions. They were pursued by squads of cavalry with a view to their capture. A large quantity of harness; and a house occupied as a residen by the teamsters, were also destroyed.

This large loss affords an additional argumen

for the employment of steam fire engines, which has long been contemplated. Information was received to day from Gen. McCall's Division, to the effect that early this morning our pickets extending towards Drainesville were driven in. At the latter place the ebel forces, it is believed, have been largely reinforced since the late engagement. Hence in-creased watchfulness on the part of our troops

has become necessary. ARRIVAL OF THE STEAMER EDINBURGH. NEW YORK, Dec. 27. The steamer · Edinburgh is signalled below nd will be up about two o'clock. Her advices

A TRACEDY AT NASHVILLE.—A corresponden of the Chicago Times relates the following as having lately occurred at Nashville, Tenn:
"The State Capitol is scarcely three hundred paces from the residence of Mrs. James K. Polk. On the morning of the 14th of November, a brisk, surightly negro woman, the property of Mrs. Polk and a servant in her house, procured a knife, and having proceeded to the bed in which lay three of her own children, from two to six or seven years of age, cut their throats, and, when they had breathed their last, placed them decently beside each other, called to a fellow-servant to come and see what she had done, and then cut her own throat. The Nash-ville papers say the woman was insane."

Colonizing the Contrabands.

Prominent members of Congress are consid ering a new proposition for the solution of the "contraband" question, in order to avoid the expense of supporting crowds of slaves in idleness and to furnish the American mills with cotton. They take the ground that the Indian Territory west of Louisiana and Arkansas was ceded to the United States by treaty and on certain conditions. Without provocation they have violated the treaties and levied war on the United States, thus rendering the treaties null and void. The counties thus reverting to the government embraces the valleys of the Red. Arkansas and other rivers, and contains about 20,000,000 acres of cotton land, of unsurpassed fertility, capable of producing about 15,000,000 bales of cotton per annum.

It is proposed to apply the principle of Ben-

ton's Fl rida armed occupation act, and send all contrabands to this Territory, and appren-tice them to the settlers upon these cotton lands, leaving the question of their final dispo-sition to be settled by Congress at the close of the war; all contrabands, as fast as they come into camp, t be promptly forwarded thither.

The country is approached from St. Louis, through Springfield, a distance of three hundred miles. The remainder of the railroad from Rolla, through Springfield to Fort Smith, can be completed in twelve months. It is said that the plantations of the Choctaws and Chickasaws alone could fully supply the American mills even the first year of the experiment.

As a sign of better times in Kentucky, Mr Wm. S.
