My age is about 50 years; the color of my hair auburn, and inclined to curl. Some five or six years since it began to turn gray, and the scalp on the crown of my head to to its sendbillity and dandrufts form upon it. Each of these disagreeabilities increased with time, and about four months since a fourth was added to them, by hair falling off the top of my head and threatening to make me bald.

four months since a fourth was added to training of the top of my head and threatening to make me baid.

In this unpleasant predicament, I was induced to try wood's Hair Restorative, mainly to arrest the falling off of my hair, for I had really no expectation that gray hair could ever be restored to its original color except from dyes. I was, however, greatly surprised to find after the use of two bottles only, that not only was the failing off arrested, but the color was restored to the gray hairs and sensibility to the scalp; and dandruf ceased to form on my head, very much to the gratification of my wife, at whose solicitation I was induced to try it.

For this, among the many obligations I owe to her sex, strongly recommend all husbands who value the admiration of their wives to profit by my example, and use it if growing gray or getting baid Very respectfully, BRN. A. LAVENDER.

OARLARD, Ind., 6th June, 1869.

J. C. Ayer & Co., Gents: I isel it my duty to ack owladge what your Sarsaparilla has done for me. Having inherited a Storofiulous infection, I have suffered from it in various ways for years. Sometimes to burst out in Ulcers on my hands and arms; sometimes turned inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond description. I tried many medicines and several physicians, but without much relief from any thing. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messonger that you had prepared an alternative (Sarsaparilla,) for I knew from your reputation that any thing you made must be good. I sent to Cincinnati and got it, and used it till it oured me. I took it, as you advise, in small deses of a teaspooffal over a month, and used almost three bottles. New and healthy skin soen began to form under the scab, which after a while fell off my skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the apostles of the age, and remain ever gratefully. Yours,

Dr. J. B. S. Chanulag, of New York City, writes; "I most cheerfully comply with the respect of your agent in saying I have found your sarsaparilla a most excellent alternative in the numerous complaints for which we employ such a remedy, but especially in **Fanate Diseases of the Scrofulous diathesis. I have cured many invested cases of Leucorrhosa by it, and some whore the complaint was caused by silveration of the sterius. The ulceration itself was soon cured. Nothing within my knowledge equals it for these female derangements."

Edward S. Marrow, of Newbury, Ala., writes, "A dangerous conviant sumor on one of the females in my iamily, which had delied all the remedies we could employ, has a length been completely cured by your axtract of Sarsaparilla. Our physisian thought nothing but critipation could afford relief, but he advised the trial of your Barsaparilla as the last resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

NEW ORLEASS, 25th August, 1959.

Dr. J. C. AYER: Sir, I cheerfully comply with the request of your sagent, and report to you some of the effects I have realised with your sarsaparilis.

I have oured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonterful in the cure of Veneral and Mercurial Diseases. Une of my patients and syphilitic ulcors in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilla, steadily taken, oured him in five week. Another was attacked by secondary symptoms in his nose, and the ulceration had estend away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilis: the ulcers healed, and he is well again, and of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered exercuciating pain in her joints and bones. She, too, was cured entirely by your Sarsaparilis in a few weeks. I know from its formula, which you agent gave me, that this Proparation from your laboratory must be a great remedy; consequently; these truly remarkable results with it have net surprised me.

PENNSYLVANIA HOSPITAL.

[From Official Hospital Regents.]

May 19, 1860.—Ellen S., et. 28, single, never we viritism, from which she was confined to be bed for two reads and aubsecquently from a relapse for four more stone well since then till lass Satur day, while engaged abraic cleaning, ahe took cold, had pain in her back, let on both had no decided chill. Two days last her article to be an expectation of the hands. She has now had no made the hands. She has now had pain in her shoulders, and her hands to seeking of the hands. She has now had no be the hands are after the red and paintin; both hands are after the red as it is now fashionably called, the mast is more fashionably called, the mast revery ken is most so. This, then, is a case of acute retemation well remarked typical case. We will carefully waste as it is now fashionably called, the mast is revery ken one as it is now fashionably called, the master well remarked typical case. We will carefully waste as the same from time to time call your attention to the so one symptoms which present themselves. My charlow in bringing her before you now, is to call attention in remedy which has recently been recommended in treatment of rheumatism. In an profiguration, the highest terms, having derived great cented from its creatment again and I propose therefore to give it across the law of the law of new remedies, which are vanuel as species our lournals, and I propose therefore to give it across with this comes to us recommended so highly, that we are bound to give it a trial. Here is another patient who was placed on the said the same medicine on Sunday last; she has bug but suffering from o bronte rheumatism, and i found for that time with an acute attack supervoing quot in chronic affection. The wrists and knuckles were many awollen and tense. She took the chloride of Projumine in three grain doses every two hours, and roll many perceive that the swelling of the joints has much finished.

THREE DAYS LATER!!

MAY 26, 1866.—This is the case of acute rheening treased with propylamine, the first of mose to react called your attention at our last cline. She is they conformable, and is now taking three grains three day. In this case it has seemed to be tollowed by very suitanctory results. The second case to mach pur mention was called at our last lecture, has assembled to do well. I will now bring before you a very change into case of acute rheumatism, and if the resultent factory, I think, as good jurymen, we shad justy fined our verded: In favor of propylamin.

He is a resuman, set, 26, who was admitted size the last account verded in favor of propylamin.

He is a resuman, set, 26, who was admitted size the keep his bed, until eight days ago. The pare eight in his right knee, subsequently affected the actions, and later, the joints of the upper extremites these joints are all swollen, tense and tender. His to one after his sain, as present dry, though there has been not asweating. His pulse is full and strong, and should am weet, and this exposure is followed by sheller. This gentleman is what may be called strend grain case of coute rheumatism. There was exposted tool and weet, and this exposure is followed by a feeting occlosing, severe articular pain, beginning, as it stailly does, in the lower joints. There is fever at the prize sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with its first tion of giving you a lecture on all the points consider with rheumatism, but to again give a tria to be new remedy we are testing, and to exhibit 100 the typical case, as I have called it, than which there cred not be a fairer opportunity for testing the making a question. We are, therefore, avoiding that here if if other mediciases, even anolynes, that there in it be a magning as to which was the efficient remedy. It is basil see the case of a future clinic.

JUNE 9, 1860.—The next of our convalements is to case of souterheumatism before you at our chief of May 28th, which I then called a typical case, and while is war remarked was a fair opportunity for testing it worth of our new remedy. It was therefore stering given in three grain doses every two hours for four lay the patient has got along very onedly, and is now the walk about, as you see. I do not hestate to a your have never a case of some readment walk about, as you see. I do not hestate to a your have never a case of some readment without being prepared to decide positively as to the rule of the remedy we have used, I feel board to sait that in the cases in which we have tred the thorse Propylamine, the patients have recaused that their much carlier than under the treatment ordinard you seed. I wish gentlemen, you would yourselves by a condated
