JUNE 9, 1860.—The next of our convalescents is the case of acute rheumatism before you at our clinic of May 26th, which I then called a typical case, and which it was remarked was a fair opportunity for tosting the worth of our new remedy. It was therefore steadily given in three grain does every two hours for four days. The patient has got along very nicely, and is now able to walk about, as your see. I'do not hesitate to say that I have noves seen as severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the val-ue of the remedy we have used. I feel bound to state that in the cases in which we have tried the Chloride of Propylamine, the patients have regained their, health much earlief than under the treatment ordinarily pur-sued.
