GENTLEMEN: Your note of the 15th inst., has been recieved, saying that you had heard that I had been benefited by the use of Wood's Hair Restorative, and requesting my certificate of the fact if I had no objection to give it.

laward it to you cheerfully, because I think it due.—
My age is about 50 years; the color of my hair auburn,
and hed red to curl. Some five or six years since it began to tun gray, and the scale on the crown of my head
to its sendbillty and dandruff to form upon it. Each
of nest disagrecabilities increased with time, and about
four months since a fourth was added to them, by hair
failing off the top of my head and threatening to make
me baid.

four months since a fourth was acuted to track failing off the top of my head and threatening to make of me baid.

In this unpleasant predicament, I was induced to try Wood's Hair Restorative, mainly to arrest the failing off of my har, for I had really no expectation that gray hair could ever be restored to its original color except fresh dyes. I was, however, greatly surprised to find after the use of two bottles only, that not only was the failing off arrested, but the color was restored to the gray hairs and sensibility to the scalp, and dandruff coased to form on my bead, very much to the gratification of my wite, at whose solicitation I was induced to try it.

For this, among the many obligations I owe to her sex, strongly recommend all husbands who value the admiration of their wives to profit by my example, and use it if growing gray or getting baid

Very respectfully. BEN A. LAVENDER.

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

Mar 23, 1880.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was then laboring under an attack of acute rheumatism. She has steadily taken it in doses of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her of the attack. (The patient now walked into the room.) The improvement has steadily progressed, and you can use fail to notice a marked change in the appearance of her Joints, which are now nearly all of their natural size.—Thus far our experiment would have seemed very successful; but, gentlemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been suffaring from a bronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much awoilen and tense. She took the chloride of Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

THREE DAYS LATER!!

MAY 26, 1860.—This is the case of acute rheumatiam treated with propylamine, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second ones to which your attention was called at our last lecture, has also continued to do well. I will now bring before you a very characteristic case of anoto rheumatism, and if the result be satfactory, I think, as good jurymen, we shall justly render our verdict in favor of propylamine.

He is a seaman, set 26, who was admitted a few days ago. Has had ocassional rheumatic pams, but not so as to keep his bed, until cight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all awollen, tense and tender. His tongue is furred; his skin, at present dry, though there has been much sweating. His puise is full and strong, and about 90.—He has now used propylamine for twenty-four hours. This gentleman is what may be called a stricity typical case of acute rheumatism. There was exposure to cold and wet, and this exposure it followed by a feeling of coldness, severe articular pein, beginning, as it usually does, in the lower joints. There is fever and the profuse sweating, so generally attendent on acute rheumatism. I did not bring this patient before you with the intention of giving you alecture on all the points connected with rheumatism, but to again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there on all other medicines, even anolynes, that there may be no misgivings as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

Jumps, 1880.—The next of our convalencents is (the case of acute rheumatism before you at our olinio of May 56th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The patient has got along very nicely, and is now able to walk about, as you see. I do not hesitate to my that I have neves seen as severe a case of acute rheumatism so soon restored to health as this man, has been, and without being prepared to decide positive by as to the value of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride o Propylamine, the patients have regained their the chimed the much earlier than under the treatment ordinarily pursued. I wish gentlemen, you would yourselves try it, and report the results. June 9, 1880.—The next of our convalescents is 6the

Blains, and all Skin Diseases.

Oakland, lid., 6th June, 1859.

J. C. Ayra & Co., Gents: I teel it my duty to acknowledge what your 'arrasparilla has done for me. Having inherited a Scroulous infection, I have suffered from it in various ways for years. Sometimes to burst out in Ulcers on my hands and arms; sometimes turned in ward and distressed me at the stomach. Two years ago it broke out on my head and covered my scale and ears with one sore, which was painful and toathsome beyond description. I tried many medicanes and several physicians, but without much relief from any thing. In fact, the disorder grow worse. At length I was rejoiced to read in the Geopel Messenger that you had prepared an alternative (Sarsaparilla,) for I knew from your reputation that any thing you made must be good. I sent to Chemnati and got it, and used it till it cured me. I took it, as you advise, in small desses of a teaspoonful over a month, and used almost three bottles. New and healthy skin soon began to form under the scale, which atter a while fell off my skin is now clear, and I know by my feditings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the a solies of the age, and remain ever gratefully. Yours,

NEW ORLEANS, 25th August, 1959.

Dr. J. C. Ates: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsaparilla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects ruly won-terful in the cure of Yeneral and Mercarial Discass. One of my patients had syphilitic ulcers in his throat, which were consuming his palate and the top of the mouth. Your Sarsaparilla, size dily taken, oured him in five week. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away, a considerable part of it, so that I believe the disorder would soon reach the brain and kill him. But it yielded to my administration of your Sarsaparilla: the ulcers heated, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffered secondaring pain in her joints and buose. Sho, too, was cured enursly by your Sarsaparila in a few weeks. I know from its formula, which you agent gave me, that this freparation from your laboratory must be a great remedy; cousequently, these truly remarkable results with the very second.

the Bones. A great variety of cases have been reported to us where cures of these formidable compliaints have result-form the use of this remedy, but one space here will not admit them. Some of them may be found in our Amer can Almanac, which the agents below named are pleased to furnish gratis to all who call for them. Dyspepsia, Heart Disease, Fits, Epilep-

sy, Melancholy, Neuralgia, Many remarkable cures of these affectious have been made by the alternative power of this medicine. It attuites the vital functions into vigorous action, and thus overcomes disorders which would be supposed beyond its reach. Such a remedy has been required by the necessities of the people, and we are confident that this will do for them all that medicine can do.

Ayer's Cherry Pectoral FOR THE RAPID CURE OF

Goughs, Colds, Influence, Hoarseness, Group, Bronchitis, Incipient Con-sumption, and for the Relief of Consumptive Patients in advanced Stages of the Disease

This is a remedy so universally known to surpage any other for the cure of throat and lung complaints, that it is useless here to publish the evidence of its virtues. Its univalled excellence for coughs and colds, and its trally wonderful cures of pulmonary disease, have made it known throughout the clylingd nations of the earth.—Few are the communities, or even families, among them who have not some personal experience of its effects.—some living trophy in their mines of its victory over the subtle and dangerous disorders of the throat and lungs. As all know the dreadth is lathing of these disorders, and as they know, too, the effects of this remedy, we used not as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the vir-tues that it did have when making the cores which have won so strongly upon the confidence of mankind.
