PENNSYLVANIA HOSPITAL.

[FROM'INCIAL HORMAN HORMAN REPORTS.] MAY 19, 1860,-Elles S., set. 23, single, never was very strong. Two years ago she had an attack of acute rheuma-tism, from which she was confined to her bed for two weeks and subsequenty from a relapse for four more. She has been well since then till last Saturday, while engaged in house cleaning, she took cold; had puin in her back, felt cold, hot had no decided chill. Two days later her ankles be-gan so well, which was followed by swelling of the knee joints and of the hands. She has now dull pain in ber shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right. is most so. This, then, is a case of acute rheumatism, or, as it is now fashionably called, rheumatic fever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the vari-ous symptoms which present themselves. My chief object in bringing her before you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. Im an *proglamine*. Dr. Avenarius, of St. Petersburg, recommends it in the highest terms, having derived great conclet from its use in 250 cases which came under his care. Various com-mendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial I must confess I an always uncredious as to the worth of new remedies, which are vanited as specifies; hut this comes to us recommended so thight, that we (FROM OFFICIAL HOSPITAL REPORTS.) worth of new remedies, which are vaunted as specifies but this comes to us recommended so highly, that we are bound to give it a trial.

SAME CASE FOUR DAYS LATER !

SAME CASE FOUR DAYS LATER ! May 23, 1860.—J will rów exhibit to you the patient for whom I prescribed Propytamine, and was then labor-ing under an attack of source rhoumatsm. Bhe has steadily taken it in does of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she ex-pected to be for a week or more, judging from her other states. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot tail to notice a marked change in the appearance of her joints, which are now nearly all of their natural size.— Thus far our experiment wou must wait a little while be-fore we can give a decided opinion as to what is to be the result.

fore we can give a decided opinion as to what is to be the result. Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been suffering from c bronic rheumatism, and 1 found her at that time with an acute attack supervening upon her obrodic affection. The wrists and knuckles were much swollen and teuse. She took the chloride of Propyla-mine in three grain doses overy two hours, and you will perceive that the swelling of the joints has much dimin-ished.

THREE DAYS LATER !!

MAY 26, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attenuoù at our last clinio. She is still very comfortable, and is now i king three graits thrise daily. In this case it has seemed to be followed by very sat-isfactory results. The second c.se to which your atten-tion was called at our last lecture, has also continued to do well. I will now bring before you a very character-istic case of acute rheumatism, and if the result be sat-factory. I think, as good invreme, we shall instity render-

do well. I will now brigs before you a very character-istic case of acute rheumatism, and if the result be sat-factory, I think, as good jurymen, we shall justly render our verdict in favor if propylamine. He is a scaman, set 25, who was admitted a few days ago. Has had ocassional rheumatic pands, but not so as to keep his bed, until eight days ago. The pains began in his right kuce, subsequently affected the leit knee, and later, the joints of the upper extremities. These joints are all swollen, these and tender. His tonge is furred ; his skin, at present dry, though there has been nucle-sweating. His pulse is full and stronge, fild shout 90.— He has now used propylamine for twenty-four hours. This geniteman is what may be called a strictly typical case of acute rheumatism. There us for an acute is required in the bower joints. There us a exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There us for an the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the inten-tion of giving you a lecture on all the points connected with rheumatism, but to again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there on und not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, even anodynes, that thero may be no misgiving as to which was the efficient remedy. You shall see the case of a future clinic.

Blains, and all Skin Diseases. OARLAND, Ind., 6th June, 1859. J. C. AYER & Co., Genis: I feel It my duty to acknowl-edge what your Sarsaparilla has done for me. Having inherited a Scroulous infection, I have suffered from it in yrarious ways for years. Sometimes it burst out in Ulcers on my hands and arms; sometimes turned in-ward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and loathsome beyond description. I tried many medicines and several physi-cians, but without much relief from any thmg. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alternative (Sarsaparilla,) for I know irom your rep-utation that any thing you made must be good. I sent to Chennati and got it, and used it till it cured me. I took it, as you advise, in small doese of a teaspoonful over a month, and used atmost three bottles. New and healthy skn soen begaa to form under the scab, which after a while fell off my skin is now clear, and I know by my feelings that the discase has gone from my system. You c.n well believe that I feel was I am saying when I tell you, that I hold you to be one of the a joules of the age, and remain ever gractedily. Yours, ALFRED B. TAILEY. Leucorrhœa or Whites, Ovarian Tumor, Uterine Ulceration, Female Diseases.

Uterine Ulceration, I emale Jiseases. Dr. J. B. S. Channing, of New York City, writes; "I most cheerfully comply with the respect of your agent in saying I have found your sarsaparilla i mottexcellent internative in the numerous complaints for which we em-ploy such a remedy, but especially in *Female Diseases* of the Borofmous disthesis. I have cured many invetorate cases of Leucorrhoce by it, and some where the com-plaint was caused by ulceration of the sterus. The ui-ceration itself was soon cured. Nothing within my snowledge equals it for these female derangements." Edward S. Marrow, of Newbury, Als., writes, "A dan-gerous courian tumor on one of the females in my family, which had delied all the remedies we could employ, has at length been completely cured by your startest of Sarwhich had dehed all the remeties we could employ, has at length been completely cured by your stiract of Sar-saparita. Our physician thought nothing but extirpa-tion could afford rehet, but he advised the trial of your Sarsaparitle as the last resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

NEW ORLEANS, 25th August, 1959.

Syphines and matricultial Distances New Ostrans, 25th August, 1959. Dr. J. C. Args: Sir, I cheerfully comply with the re-quest of your agent, and report to you some of the effects I have realized with your sursaparilla. I have cured with it, in my practice, most of the com-plaints for which it is recommended, and have found in effects truly wonderful in the cure of Veneral and Mer-curial Disease. One of my patients had syphilitic ulcers in his throat, which were consuming his palate and the top of his: mouth. Your Sursaparilla, Steadily taken, cured him in five week. Another was attacked by sec-ondary symptome in his nose, and the ulcerstion had eat-en away a considerable part of it, so that I believe the disorder would soon reach his brain and kill him. But it yielded to my administration of your Sarsaparilla, it he ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been ireated for the same disorder by mercury was suffering irom this poisson in her boass. They had become so exercicinity shin in her joints and bones. She, too, was cured entirely by your Sarsaparilla is a few weeks. I know from its iormula, which you ggent gave me, that this frequently. These truly remarkeble results with it have inor surprised me. Bratemaky, geurs, G. V. LARIMER, M. D. Fraternaly, yours, G. V. LARIMER, M. D.

JUMP 9, 1860.—The next of our convalescents is it he case of souter heumatism before you at our clinic of May 36th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain dozes every two hours for four days. The patient has got along very nicely, and is now able to walk about, as you see. I do not hesitate to say that I have neves seen as severe a case of acute rhoumatism os soon restored to health as this man has been, and without being prepared to decide positive by as to the val-ue of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride o Propylamine, the patients have regained their health much carlier than under the treatment ordinarily pur-ued.
