STATISTICS OF FREE NEGRO POPULA-TION

From the subjoined table, which are compiled from the census of 1860, it will be seen that the free negro population of the slaveholding states is considerably in excess over that of the non-alaveholding states. That is, the sizveholding states, notwithstanding the existence of slavery in them, have in reality given a wider extension to the principle of emancipation than was ever done by the non-slaveholding states. This is a fact which should not be forgotten by those who would admire philanthropy in deed rather than in word. NUMBER OF FREN NEORODS.
