PENNSYLVANIA HOSPITAL.

[FROM OFFICIAL HOSPITAL REPORTS.]

MAY 19, 1860,—Ellen S., &t. 23, single, never was very strong. Two years ago she had an attack of acute rheumatism, from which she was confined to her bed for two weeks and subsequently from a relapse for four more. She has been well since then till last Saturday, while engaged in house cleaning, she took cold, had pain in her back, felt cold, hot had ao decided chill. Two days later her ankles began so swell, which was followed by swelling of the knee joints and of the hands. She has now dull pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of acute rheumatism, or, as it is now fashionably called, rheumatic fever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the various symutoms which present themselves. My chief object to bringing her before you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. I mean propylamine. Dr. awenarius, of St. Petersburg, recommends it in the highest terms, having derived great benefit from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our journats, and I propose therefore to give it another trial I must confess I am always incredulous as to the worth of new remedies, which are vaunted as specifics; out his comes to us recommended so highly, that we are bound to give it a trial. [FROM OFFICIAL HOSPITAL REPORTS.]

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

MAY 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was then laboring under an attack of acute rheumausm. She has steadily taken it in doses of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other stace. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the inputarial size.—Thus far our experiment would have seemed very successful; but, gentlemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

Here is another patient who was placed on the use of Here is another patient who was piaced on the same of the same needicine on Sunday last; she has long been suffering from a provide rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The writes and knuckles were much swolled and tesse. She took the chloride of Propylamine in three grain does every two hours, and you will perceive that the swering of the joints has much diminished.

THREE DAYS LATER!!

THREE DAYS LATER!!

May 26, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last fecture, has also continued to do welr. I will now bring before you a very characteristic case of acuto rheumatism, and if the result be satisactory, I think, as good jurymen, we shall justly render our verdict in favor of propylamin.

He is a seaman, sat. 28, who was admitted a few days ago. Has bad ocaasional rheumatic pans, but not so as to keep his bed, until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremitles. These joints are all swollen, lense and tender. His tongue is furred; his skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours.

This gentleman is what may be called a strictly typical case of acute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the intendoes, in the lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the intention of giving you a lecture on all the points connected with rheumatism, but to again give a trial to the new remedy we are testing, and to exhibit to you this typical case, as I have called it, than which there could not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, even anotypes, that there may be no misgivings as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

June 9, 1860 .- The next of our convalescents is the JUNE 9, 1869.—The next of our convatescents is the case of actuer heumatism before you at our clinic of May 28th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two bours for four days. The patient has got along ever uncely, and is now able to walk about, as you see. I do not he state to say that I have nowe seen as every a case of center rhoundalism bave never seen as severe a case of neutre rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the val-de of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride o Propylanine, the patients usive regained their health much earlier than under the treatment ordinarily pur-sued. I wish gentlemen, you would yourselves try it,

OAKLAND, Ind, 6th June, 1859.

J. O. Ayer & Co., Gents: I feel it my duty to beknowledge what your Sarsaparilla has done for me. Haying inherited a Scrofulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Ulcers on my hands and arms; sometimes three inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scaip and ears with one sore, which was paintul and loathsome beyond description. I treed many medicines and several physicians, but without much rokef from anything. In fact, the disorder grew worse. At length I was rejoiced to read in the Gostel kessenger that you had prepared an alternative (Sarsaparila,) for I knew from your reputation that anything you make must be good. I sent to Cinc. mati and got it, and use it till it cared me. I took it, as you advice, in small does of a teaspoonful over a mouth, and used almost three bottles. New and healthy skin soon began to form under the scab, which after a while fell off, my skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the a costles of the age, and remain ever gratefully.

Dr. Robert M. Proble writes irom Salem, N. Y., 12th Sep., 1859, that he has cured an inveterate case of Dropsy, which threatened to terminate fatally, by the persevering use of our Sarsaparilla, and also a dangerous attack of Malignant Erysipelas by large doses of the same; says he cures the common Eruptions by it constantly. Dr. J. B. S. Channing, of New York City, writes; "most cheerfully comply with the respect of your agent in saying I have found your Sarsaparilla a most excellent alternative in the numerous complaints for which we employ such a remedy, but especially in Female Diseases of the Scrofinious diathesis. I have cured many inveterate cases of Leucorthesa by it, and some where the complaint was caused by alceration of the ulcrus. The ulceration itself was soon cured. Nothing within my knowledge equals: for these lemale derangements."

Edward S. Marrow, of Newbury, Ala., writes, "A dangerous coarian tumor on one of the females in my tamily, which had defied all the remedies we could employ, has at length been completely cured by your Extract of Sarsaparilla. Our physician thought nothing but extipaten could afford relief, but he advised the trial of your Sarsaparilla as the last resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

Dr. J. C. ATER: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarsapardla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Venezal and Mercurial Diseases. One of my patients tad syphilitic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarsapardla, steadily taken, cured him in tive week. Another was attacked by secondary symptoms in his nose, and the ulcert'oo had eaten away a considerable part of it, so that. believe the disorder would soot, each his brain and kil. ...m. But it yielded to my administration of your Sarsapardlia: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered excruciating pain in her joints and bones. She, too, was cured entirely by your Sarsapardlia in a few weeks. I know from its formula, which you agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

Fraternally yeurs,

This is a remedy so universally known to surpage any other for the cure of throat and tung complaints, that it is useless here to publish the evidence of its virtues. Its unrivalled excellence for coughs and colds, and its truly wonderial cures of pulmonary disease, have made it known throughout the civilized nations of the earth.—

Pew are the communities, or even families, among them who have not some personal experience of its effects.—some living trophy in their miust of its victory over the subtle and dangerous disorders of the throat and lungs. As all know the dreadtof fatality of these disorders, and as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.
