PENNSYLVANIA HOSPITAL.

[PRON OWNOLL HOSTILL REFORM.]

MAY 19, 1860.—Ellen S., st. 28, single, never was very strong. Two years ago she had an attack of acute rheumadim, from which she was confined to her bed for two weeks and subsequently from a relapse for four more. She has been well since then till hast Batur day, while engaged in house cleaning, she took cold, had pain in her book, fait cold, hot had no decided chill. Two days later her ankles began to swell, which was followed by swelling of the knee-joints and of the hands. She has now dull pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of some rheumatism, or, as it is now fashlonably called, rheumatic fever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My other object in bringing her before you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. I mean propylamine. Dr. Awenarius, of St. Petersburg, recommends it in the highest terms, having derived great benefit from its use in 360 cases which came under his care. Various commendatory testimonials respecting it have appeared in unconfessed in the result of the worth of new remedies, which are vaunted as specifies; but this comes to us recommended so highly, that we are bound to give it a trial.

BAME CASE FOUR DAYS LATER ! [FROM OFFICIAL HOSPITAL REPORTS.]

SAME CASE FOUR DAYS LATER!

E. MAY 23, 1880.—I will now exhibit to you the patient for whom I prescribed Propyismine, and was then laboring under an attack of soute rhoumatism. She has steadily taken it in dose of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (The patient now walked into the room.) The insprovement has steadily progressed, and you cannot fall to notice a marked change in the appearance of her joints, which are now nearly all of their natural size.—Thus far our experiment would have seemed very successful; but, gentlemen, we must wait all this while before we can give a decided opinion as to what is to be the results.

Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been suffering from a bronfor heumatism, and I found her at that time with an acute attack supervening upon her chrodic affection. The wrists and knuckes were much swollen and teose. She took the obloride of Propylamens in three grain doses every two hours, and you will parestive that the swelling of the joints has much diminated. SAME CASE FOUR DAYS LATER!

THREE DAYS LATER!!

THREE DAYS LATER!!

MAY 36, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last clinic. She is still very configurable, and is now taking three grains thrice daily. In this case it has seemed to be tollowed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to de well. I will now bring before you a very characteristic case of acute rheumatism, and if the result be satisfactory, I think, as good jurymen, we shall justify roader our verdict in favor of propylamin.

He is a seaman, set. 26, who was admitted a few days ago. Has had ocassional rheumatic pause, but not so as to keep his bed, until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all avoilen, tense and tender. His tongue is furred; his skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—

He has now used propylamine for twenty-four hours. This gentleman is what may be called a strictly typical case of acute rheumatism. There was exposure to cold and wel, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, initiable lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism. I did not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other mediciase, even anodynes, that there may be no shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

Jump 9, 1860.—The next of our convalescents is the case of acute rheumatism before you at our clique of May 26th, which I than called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The petient has got along very clocky, and is now able to walk about, as you see. I do not hegitate to cay that I have neves seen as severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used, I see bound to state that in the cases in which we have tried the Chioride o Propytamine, the patients have regained their health much earlier than under the transment ordinarily pursued. I wish gantlemen, you would yourselves try it, and report the results.

For a full report of which the above is a condensed extract, see the Philadelphia Medical and Surgical Reier. It is the report after a fair trial by the best medical authority in this country, and makes it unnecessary

Dr. W. Barre—Drar Sir:—As I have learned that you have purchased the right to manufacture and sell M'Connell's Golden Electric Oil, for the benefit of the sfilicted. I send the following:—I have been afflicted with a running sore on my left leg for ten years. During that time I have been under the treatment of ten of the best Doctors in Harrisburg, Baltimore and Cumberland county, but all could not effect a cure. A little over a year past, going into my blacksmith shop after dark, I hurt my right leg aiso, below the time. I spread all a round the leg, and became a running sore. Several Dectors told me I must have my leg taken off, mortification having taken place. Fortunately I got a bottle of your Golden Electric Oil for my child's sore mouth. It cured so soon that I thought I would try it on my legs. I have been using it about six weeks, and my legs are now healed up—sound and well.
