PENNSYLVANIA HOSPITAL.

[FROM OFFICIAL HOSPITAL REPORTS.]

MAY 19, 1860,—Elice S., set. 23, single, nover was very strong. Two years ago she had an attack of acute rheumatism, from which she was confined to her bed for two weeks and subsequently from a relapse fer four nore. She has been well since then till last Satur day, while engaged in house deaning, she took cold, had pain in her back, felt cold, hat bad no decided chilt. Two days later her anklas began 50 swell, which was followed by swelling of the knee joints and of the hands. She has now dult pain in her shoulders, and her knuckles are very tender, red and painful; both hands are affected, but the right is most so. This, then, is a case of acute riseumatism, or, sa it is new fashionably called, rheumatic lever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My chief object in bringing her before you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. I mean propylamine. Dr. Awenarius, of St. Petersburg, recommends it in the highest terms, having deriven great ounceft from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our journals, and I propose therefore to give it another trial. I must confess I am always incredulous as to the worth of new remedies, which are vaunted as specifics; but this comes to us recommended so highly, that we are bound to give it a trial. [FROM OFFICIAL HOSPITAL REPORTS.]

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

Ill May 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was then laboring under an attack of acute rheumatism. She has steadily taken it in doses of three grains every two hours (intermitting it at night.) The day after you sew her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of her joints, which are now nearly all of their natural size.—Thus far our experiment would have seemed very successful; but, gentlemen, we must wait a little while before we can give a decided opinion as to what is to be

fore we can give a decided opinion as to what is to be the result.

Here is another patient who was placed on the use of the same medicine on Sunday last; she has long been suffering from a bronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and tense. She took the chloride of Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminished.

THREE DAYS LATER!!

THREE DAYS LATER!!

May 26, 1860.—This is the case of acute rheumatism treaten with propylamino, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to do welf. I will now bring before you were characteristic case of acute rheumatism, and if the result be satfactory, I think, as good jurymen, we shall justly render our verdict in favor of propylamin.

His a seaman, set 26, who was admitted a few days ago. Has had ocasional rheumatic paras, but not so as to keep his bed, until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swollen, tense and tender. His tongue is furred; his skin, at precent dry, though there has been much sweating. His pulse is full and strong, and about 90.—He bas now used propylamine for twenty-four hours.

This gentlemmo is what may be called a strictly typical case of acute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular path, beginning, as it usually does, in the lower joints. There is fever and the profuse sweating, so generally attendant on acute rheumatism. I did not be ring this patient before you with the intention of giving you a lecture on all the points connected with rheumatism, but to again give a triet to the new remody we are testing, and to exhibit to you this typical case, as I have called it, than which there co uid not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, even anolynes, that there may be no miggivings as to which was the efficient remedy. You shall see the case of a future clinic.

THE RESULT.

A FAVORABLE VERDICT.

Juna 9, 1860.—The next of our convalescents is the JUNE 9, 1860.—The next of our convalescents is the case of acute rheumatism before you a our clinic of May 26th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The patient has got along very nicely, and is now able to walk about, as you see. I do not hesitate to say that I have nevea seen as severe a case of acute rhoumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used, I feel bound to state that in the cases in which we have tried the Choride o Provylamie, the outents have recalled their health Propylamine, the patients tave regained their health much earlier than under the treatment ordinarily pursued. I wish gentleinen, you would yourselves try it, and report the results.

for a full report of which the shove is a condensed extract, see the Philadelphia Medical and Surgical Reporter. It is the report after a fair trial by the best med ical authority in this country, and makes it unnecessary to give numerous certificates from astonished doctors and rejoicing patients.

Dr. W. Barr—Draf Sir. —As I have learned that you have purchased the right to manufacture and sell M'Connell's Golden Electric Oil, for the benefit of the afflicted, I send the following: —I have been afflicted with a running sore on my leit leg for ten years. During that time I have been under the treatment of ten of the best Doctors in Harrisburg, flatitumore and Camberland county; but all could not effect a cure. A little over a year past, going into my blacksmith shop after dark, I hurt my right leg also, below the knes. It spread all around the leg, and became a running sore. Several Doctors told me I must have my leg taken off, mortification having taken place. Fortunately I got a bottle of your Golden Electric Oil for my child's sore mouth. It cured so soon that I thought I would try it on my legs. I have been using it about six weeks, and my legs are now healed up—sound and well.

Edward S. Marrow, of Newbury, Aia., writes, "A dangerous carrian tumor on one of the females in my tamily, which had defied all the remedies we could employ, has at length been completely cured by your Extract of Sarsaparilla. Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparilla as the last resort before cutting, and it proved effectual. After taking your remedy eight weeks no symptom of the disease remains."

Syphilis and Mercurial Disease.

NEW ORLEAMS, 25th August, 1959.

Dr. J. C. AYEE: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realized with your Sarasparula.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Veneral and Mercurial Diseases. One of my patients had syphilitic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarasparilla, steadily taken, cured him in five week. Another was attacked by secondary symptoms in his nose, and the ulcertion had esten away a considerable part of it, so that helieve the disorder would soon reach his bran and kill him. But it yielded to my administration of your Sarasparilla: the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her hones. They had become so sensitive to the weather that on a damp day she suffered excruciating nain in her joints and bones. She, too, was cured entirely by your Sarasparilla in a few weeks. I know from its formula, which you agent gave me, that this Proparation from your laboratory must be a great remedy; consequently, these truly remarkeble results with it have net surprised me.

Jules Y. Getchell, of St. Louis. writes: "I have been afflicted for years with an affection of the Liver, which destroyed my health. I tried every thing, and every thing tailed to relieve me; and I have been a broken down man for some years from no ther cause than derangment of the Liver. My beloved pastor, the Rev. Mr. Espy, advised me to try your Sarsaparrilla, because he said he knew you, and anything you made was worth

Many remarkable cures of these affections have been made by the alternative power of this medicine. It stimulates the vital functions into vigorous action, and thus overcomes disorders which would be supposed beyond its reach. Such a remedy has been required by the necessities of the people, and we are confident that this will do for them all that medicine can do.

FOR THE RAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the Relief of Consumptive Patients

in advanced Stages of the Disease This is a remedy so universally known to surpage any other for the cure of throat and tung complaints, that it is useless here to publish the evidence of its virtues. Its universally the evidence of its virtues. Its universally the evidence of course of colds, and its truly wonderial cures of pulmonary disease, have made it known throughout the civilized nations of the earth.—Few are the communities, or even families, among them who have not some personal experience of its effects.—some living trophy in their misst of its victory over the subtle and daugerous disorders of the throat and lungs. As all know the dreadful fatality of these disorders, and as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have tues that it did have when making the cures which have won so strongly upon the confidence of mankind.

OAKLAND, I.d, 6th June, 1850.

J. C. Ayer & Co., Gents: I feel it my dury to acknowledge what your Sarsaparilla has done for me. Having inherited a Scrofulous infection, I have suffered from it in various ways for years. Sometimes it burst out in Ulcers on my hands and arms; sometimes turted inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and leathsome beyond description. I tried many medicines and soveral physicians, but without much relief from anything. In fact, the disorder grew worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an alternative (Barsaparilla,) for I knew from your reputation that anything you made must be good. I sent to Cinc mast and got it, and use it till it cured me. I took it, as you advise, in small doses of a teaspoonful over a mouth, and used almost three bottles. Acwand healthy skin soon began to form under the scab, which after a while fell off, my skun is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the ago, and remain ever gratefully. Yours,

ALFRED B, TALLEY.
