ELIXIR PROPYLAMINE, THE NEW REMEDY FOR RHEUMATISM.

A CERTAIN REMEDY,

AGUTE RHEUMATISM,
CHRONIC RHEUMATISM,
RHEUMATISM OK EVELY KIND;
HOW STUBBORN,
HOW LONG STANDING, NO MATTER PROPYLAMINÉ WILL CONQUER IT,

WHAT IT HAS DONE, IT WILL DO AGAIN.

THE BEST TESTIMONY, BEST MEDICAL AUTHORITY.

DOCTORS KNOW IT, PATIENTS BELIEVE IT, TRIED AND TRUE.

PENNSYLVANIA HOSPITAL. [FROM OFFICIAL HOSPITAL REPORTS.]

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

May 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was at hos laboring under an attack of soute rheumatigm. She has steadily taken it in doses of three grains every two hours (intermitting it at night.). The day after you saw her, I bund her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of her joints, which are new nearly all of their natural size.—Thus far our experiment would have seemed very successful; but, gentlemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

the result.

Here is another patient who was placed on the use of
...Josame medicine on Sunday last; she has long been
suffering from a hronio rheumatism, and I found her at subering from a from remaining, and a found are as that time with an acute attack supervening upon her chronic affection. The wrists and knuckles were much swollen and tease. She took the chloride of Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much diminshed.

THREE DAYS. LATER !!

THREE DAYS LATER!!

May 26, 1860.—This is the case of soute rheumatians treated with propylamine, the first of those to which it called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to do well? I will now bring before you a very characteristic case of soute rheumatism, and if the result be satfactory, i think, as good jurymen, we shall justly render our verdict in favor of propylamin. He is a seaman, set 28, who was admitted a few days ago. Has had ceassional rheumatic pains, but not so as to keep his tod, until eight days ago. The pains began in his right knee, aubsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swellen, tense and tender. His tongue is furred; his skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours. This gentleman is what may be called a strictly typical case of soute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There is flover and the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the intensition of giving you secture se all the points connected with rheumatism, but to again give a trial to the new remody we are testing, and to exhibit to you this typical case, as I have called it, than which thore co uld not be a fairer opportunity for testing the medicine in question. We are, therefore, avoiding the use of all other medicines, evan anodynes, that there may be no unsigning as to wishe was the efficient romedy. You shall see the case of a future ollnic.

THE RESULT.

A FAVORABLE VERDICT.

JUNE 9, 1860.—The next of our convalences is the case of soute rheumatism before you at our clinic of May 26th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain-doses every two hours for four days. The patient has got along very cicely, and is now able to walk about, as you see. I do not hesitate to a ty that I have nevea seen as severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used. I feel bound to state that in the cases in which we have tried the Chieride of Propylamiae, the patients have recained their health much earlier than under the treatment ordinarily pursued. I wish gentlemen, you would yourselves try it, and report the results.

For a full report of which the above is a condense extract, see the Philadelphia Medical and Surgical Recorter. It is the report after a fair trial by the best med cal authority in this country, and makes it unnecessary o give numerous u erificates from astonished doctor and rejoicing patients.
