CHRONIC RHEUMATISM,
RHEUMATISM OF EVERY KIND;
HOW STUDENDEN HOW STUBBORN, HOW LONG STANDING, NO MATTER PROPYLAMINE

WILL CONQUER IT, WILL CURN IT, WHAT IT HAS DONE, IT WILL DO AGAIN,

the best testimony, best medical authority.

PENNSYLVANIA HOSPITAL. [FROM OFFICIAL HOSPITAL REPORTS.]

SAME CASE FOUR DAYS LATER!

SAME CASE FOUR DAYS LATER!

May 23, 1860.—I will now exhibit to you the patient for whom I prescribed Propylamine, and was then laboring under an attack of acute rheumatism. She has steadily taken it in doese of three grains every two hours (intermitting it at night.) The day after you saw her, I found her much more comfortable, better than she expected to be for a week or more, judging from her other attack. (The patient now walked into the room.) The improvement has steadily progressed, and you cannot fail to notice a marked change in the appearance of hor joints, which are new nearly all of their natural size.—
Thus far our experiment would have seemed very successful; but, gentiemen, we must wait a little while before we can give a decided opinion as to what is to be the result.

the result.

Here is another patient who was placed on the use of ... a same medicine on Sunday last; she has long been suffering from a hronic rheumatism, and I found her at that time with an acute attack supervening upon her obronic affection. The wrists and knuckles were much swollen and tease. She took the chloride of Propylamine in three grain doses every two hours, and you will perceive that the swelling of the joints has much dimintaled.

THREE DAYS LATER!!

THREE DAYS LATER!!

MAY 26, 1860.—This is the case of acute rheumatism treated with propylamine, the first of those to which I called your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to do well. I will now bring before you a very characteristic case of acute rheumatism, and if the result be satfactory, I think, as good jurymen, we snall justly render our verdict in favor of propylamin

He is a seaman, set. 26, who was admitted a few days ago. Has had ocassional rheumatic pauns, but not so set to keep his bed, until eight days ago. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. These joints are all swollen, tense and tender. His tongue is furred; his skin, at present dry, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours. This gentleman is what may be called a strictly typical case of soute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of coldness, severe articular pain, beginning, as it usually does, in the lower joints. There is fover and the profuse sweating, so generally attendant on acute rheumatism. I did not bring this patient before you with the intensition of giving you a lecture on all the points connected with rheumatism, but to again give a trial to the new remedy we are testing, and to exhibit to you the typical case, as I have called it, than which there co uid not be a fairer opportunity for testing the medicine in question. We are, thorefore, avoiding the use of all other medicines, even anodynes, that there may be no misgiving as to which was the efficient remody. You shall see the case of a future clinic.

THE RESULT

A FAVORABLE VERDICT.

Junio, 1860.—The next of our convalencents is the case of acuterheumatism before you at our clinic of May. 36th, which I then called a typical case, and which it was remarked was a fair opportunity for testing the worth of our new remedy. It was therefore steadily given in three grain doses every two hours for four days. The patient has get along very nicely, and is now able to walk about, as you see. I do not hesitute to say that I have neves seen as severe a case of acute rheumatism so soon restored to health as this man has been, and without being prepared to decide positive by as to the value of the remedy we have used, I feel bound to state that in the cases in which we have tried the Chloride o Propylamine, the patients have regained their health much earlier than under the treatment ordinarily pursued. I wish gantlemen, you would yourselves try it, and report the results. sued. I wish gentleme and report the results.

For a full report of which the above is a condense extract, see the Philadelphia Medical and Surgical Reporter. It is the report after a fair trial by the best med ical authority in this country, and makes it unnecessar to give numerous certificates from astonished doctor
