"INDEPENDENT IN ALL THINGS—NEUTRAL IN NONE"

VOL XVIII HARRISBURG, PA. FRIDAY AFTERNOON, OCTOBER 3, 1862 NO 30.

Medical

DR. JOHNSON BALTIMORE LOCK HOSPITAL!

HAS discovered the most certain, speedy and official remedy in the world for DISEASES OF IMPRUDENCE.

RELIEF IN SIX TO TWELVE HOURS. No Mercury or Noxious Drugs. A Cure Warranted, or no Charge, in from one to Two Days.

Weakness of the Back or Limbs, Strictures, Affections of the Uterus and Bladder, Involuntary Discharges, Impotency, General Debility, Nervousness, Dyspepsia, Languor, Low Spirits, Confusion of Ideas, Palpitation of the Heart, Trembling, Dimness of Sight or Giddiness, Disease of the Head, Throat, Nose or Skin, Affections of the Liver, Lungs, Stomach or Bowels—those terrible disorders arising from the Solitary Habits of Youth.

These secret and solitary practices more fatal to the individual than the most violent and noxious poisons, blighting their most brilliant hopes or anticipations; rendering marriage, &c., impossible.

Young Men Especially, who have become the victims of Solitary Vice, that dreadful and destructive habit which annually sweeps to an untimely grave thousands of the noblest spirits of the most exalted talents and brilliant intellects, who might otherwise have entranced listening Senators with the hundred of eloquence or walked to ecstasy the living lyre, may call with full confidence.

Marriage. Married Persons, or Young Men contemplating marriage, being a victim of physical weakness, organic debility, or nervousness, &c., should be cured. He who places himself under the care of Dr. J. may rely on his honor as a gentleman, and confidently rely upon his skill as a Physician.

Organic Weakness. Immediately cured, and full vigor restored. This disease, which renders life miserable and marriage impossible—is the penalty paid by the victims of improper indulgence. Young persons are too apt to commit excesses from not being aware of the danger which they are incurring. The pleasure which they derive from the gratification of the passions, is soon succeeded by the most serious and destructive symptoms to both body and mind.

The system becomes deranged, the Physical and Mental Functions weakened, Loss of Force, Nervous Irritability, Dyspepsia, Palpitation of the Heart, Indigestion, Constipation, Debility, a Wasting of the Body, Consumption, Decay and Death.

Office, No. 7 South Frederick Street. Left hand side going from Baltimore street, a few doors from the corner. Fall not to observe name and number. Letters must be self addressed and contain a stamp. The Doctor's Diplomas hang in his office.

A Cure Warranted in Two Days. No Mercury or Noxious Drugs. Dr. Johnson, Member of the Royal College of Surgeons, London, Graduate of the most eminent Colleges in the United States, and the greater part of whose life has been spent in the hospitals of London, Paris, Philadelphia and elsewhere, has effected some of the most astonishing cures that were ever known.

Take Particular Notice. Dr. J. addresses all those who have injured themselves by improper indulgence in solitary habits, which ruin both body and mind, uniting them for either business, study, or pleasure.

These are some of the sad and melancholy effects produced by early habits of youth, viz: Weakness of the Back or Limbs, Pain in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, &c.

Mentally.—Loss of Memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion to society, and all the evils produced.

Thousands of persons of all ages can now judge what is the result of their declining health, losing their strength, becoming weak, pale, nervous and emaciated, having a singular appearance about the eyes, cough and symptoms of consumption.

Young Men Who have injured themselves by a certain practice in indulged in when alone, a habit frequently learned from evil companions, or from the effects of which are nearly fatal, even when aided, and if not cured, renders marriage impossible, and destroys both mind and body, should apply immediately.

The darling of his parents, should be snatched from all prospects and enjoyments of life, by the consequence of deviating from the path of nature and indulging in a certain secret habit. Such persons grow, before contemplating marriage.

Marriage. reflect that a sound mind and body are the most necessary requisites to a genuine matrimonial happiness. To neglect, without these, the journey through life becomes a weary pilgrimage; the prospect hourly darkens to the view; the mind becomes shadowed with despair and filled with melancholy reflections; that happiness of another becomes brightened with our own.

Disease of Imprudence. When the misguided and imprudent votary of pleasure finds that he has imbibed the seeds of this painful disease, it too often happens that an ill-timed sense of shame or dread of discovery, deters him from applying to those who, from education and respectability, can alone befriend him, delaying till the constitutional symptoms on this terrible disease, such as the appearance, such as ulcers in the throat, diseased nose, nocturnal pain in the head and limbs, dimness of sight, deafness, nodes on the skin, and eruptions on the face, have become a permanent and incurable disease, and he is left a victim of this awful disease, owing to the misadvice of ignorant pretenders, who by the use of that deadly poison, Mercury, ruin the constitution and make the residue of life miserable.

Strangers. Trust not your lives, or health, to the care of the many Unlearned and Worthless Pretenders, devoid of knowledge, name or character, who copy Dr. Johnson's advertisements, or give themselves to the newspapers, regularly Educated Physicians incapable of curing, they keep you trifling months after months taking their filthy and poisonous compounds; or as long as the smallest fee can be obtained, and in despair, leave you with ruined health to sigh over your galling disappointment.

Dr. Johnson is the only Physician advertising. His credentials or diplomas always hang in his office. His remedies or treatment are unknown to all others, prepared from a life spent in the great hospitals of Europe, the first in the country and a more extensive Private Practice than any other Physician in the world.

Indorsement of the Press. The many thousands cured at this institution year after year, and the numerous important Surgical Operations performed by Dr. Johnson, witnessed by the reporters of the "Sun," "Clipper," and many other papers, notices of which have appeared again and again before the public, bearing testimony to his skill and character and responsibility, is a sufficient guarantee to the afflicted.

Skin Diseases speedily Cured. Persons writing should be particular in directing their letters to his Institution, in the following manner: JOHN M. JOHNSON, M. D. Of the Baltimore Lock Hospital, Baltimore, Md.

OUR newly replenished stock of Toilet and Fancy Goods is unsurpassed in this city, and offering excellent of rendering satisfaction, we would respectfully invite a call. KELLER, 111 Market street, two doors east of Fourth street, south side.

The Telegraph.

INDIVIDUAL RISKS IN WAR.—There is perhaps at all times—certainly there seems to be now—to marked a disposition to exaggerate the dangers to the individual who joins the army. The danger of death is comparatively small. So is that of receiving mortal or permanently disabling wounds. The danger of sickness from undue fatigue and exposure, is no doubt the greatest of all. But young constitutions survive attacks of disease, in most cases, under anything like judicious treatment, and sometimes when kindly left get well of themselves. From all causes the percentage of mortality or permanent hurts in the vulgar estimate, greatly overrated. This fact was alluded to by a speaker, at one of the recent enlistment meetings, in Boston. Mr. Northend spoke of the casualties in battle, and said that out of 80,000 or 100,000 engaged in the recent battles, less than 2,000 were killed. In his own town of Salem, about 1,000 men had been sent to the war, and out of that number only thirty had died within a year from any cause—killed in battle, or died of disease or wounds. He doubted if a thousand men who had remained at home could show a less number of deaths in a year. The casualties had been greatly exaggerated.

The evils of actual service are experienced chiefly by men of family, or those in good positions, whose business and prospects, perhaps, for life are sacrificed as a consequence of the hard necessity which sends them to the wars, and whose families, while they to have any, are made widows and orphans. The necessity of sacrifices, should, as far as possible, be averted. Men, not the heads of families, should first be required to go into service. If, therefore, resort should be had to a draft, care should be taken to have it fall first on the class of idle single men who abound in all our cities. And the inquiry should be so rigid and searching that no one of them should be allowed to escape on a pretext of belonging to some other class.

A NOVEL AND BEAUTIFUL INVENTION.—On Thursday morning last, in company with a friend, we called at the residence of our fellow-citizen, J. J. Spronger, Esq., (late U. S. Consul at Venice,) in east Chestnut street, and had the pleasure of examining a novel and beautiful invention, called the altopscope, designed for the magnifying of photographs to the natural size of the object, and which is a great improvement over the stereoscope. The frame or box is somewhat similar in its general construction to the stereoscope box, but consists of a single lens of large size, and the picture is not required to be duplicated, as in case with the stereoscope, and which often prevents persons of defective eyesight from enjoying the scenes thus presented. The altopscope has not this objection, as any person, whether near-sighted or cross-eyed, can see the picture with the same distinctness as if looking at a scene through a window-pane. The altopscope is the invention of Signor Ponti, an Italian, and Mr. Spronger, who saw it Europe and became acquainted with the inventor, was fully authorized by him to have it patented and introduced into this country. He has accordingly had a model made and forwarded to Washington, with a view to have it patented. It cannot fail, when once introduced to the public, to become a very popular institution.—Lancaster Intelligencer.

THE NEW COMET.—The position of the new comet, discovered at the Cambridge Observatory on the 18th ult., is nearly on a line joining the bright and first magnitude star Capella with the Northstar, and two-thirds of the distance from Capella to the North star. Capella can be seen at 11 1/2 P. M., in the northeast, near the horizon. The comet is rapidly approaching, increasing in brilliancy, and will soon be readily seen by all. Its tail appear to the comet seeker quite one and a half degrees in length, the comet itself four minutes of a degree. Of course at this time the comet does not set, either night or day, and by the revolution of the earth it appears to move around the North star like the constellation of the Dipper or the Ursa Major, the tail thus pointing at different times of evening to the different points of the compass—east, west, etc.

FATAL CASE OF POISONING.—On Thursday William Hamilton, residing in Chestnut Ridge four or five miles from Mount Pleasant, Pa., while under the influence of liquor, called at Andrews's hotel for breakfast, and also wanted whiskey. The landlord replied that he kept no whiskey, but would order him something to eat. In his absence, Mr. Hamilton, observing a bottle on a shelf, which he supposed to contain whiskey, but which proved to be Cyanuret of Potassium, a most deadly poison, belonging to an artist at that place, drank nearly a teacupful, destroying his life in two hours, notwithstanding medical aid was in immediate attendance. Deceased was about sixty years of age.

PRICE OF SLAVES.—At the recent sale of negroes in Kentucky two likely young negro men brought less than \$300 each. Eighteen months ago they would have probably brought over \$1,200 readily, and now they sell for little more than good hands hired for two years ago. Here is a striking illustration of the effect of the rebellion upon slavery. Once bringing down the value of slaves to that standard, and emancipation will inevitably follow. For if a good negro be worth no more than \$300, with the risk of death or running off, he is worthless. Does it not seem as if the secessionists were determined to force emancipation upon the country? We wonder if Jeff. Davis is not the paid emissary of some British Abolition Society?

Steam Printing Office.

Having procured Steam Power Presses, we are prepared to execute JOB and BOOK PRINTING of every description, cheaper than it can be done at any other establishment in the country.

Table with columns: RATES OF ADVERTISING, Four lines or less constitute one-half square, eight lines or more than four constitute a square.

BY TELEGRAPH.

From our Morning Edition. FROM FORTRESS MONROE.

The Monitor goes to the Potomac. FORTRESS MONROE, Oct. 1.

The steamer Spaulding left here this forenoon for New York, having in tow the hospital ship St. Marks, with about four hundred patients from the hospitals in this vicinity.

The flag of truce boat left for Aikin's Land-to-day to bring down a large number of Union prisoners.

Some of the buildings in the rear of the Hygeia Hotel are being removed. It is to be hoped the Government will see the necessity of the main building of the hotel remaining. By the removal of this house every civilian, whatever his business may be at this place, as well as many of the army officers stationed here, will either be turned out of doors or deprived of necessary comforts, which the fort does not and cannot furnish.

A Spanish frigate came up the roads this afternoon and anchored above the fort. She has not yet communicated with the shore, so her name is as yet unknown.

On Monday, the Monitor gunboat, which for some weeks past had been lying off Newport News, was taken in tow by a large steamer, and after leaving the Roads, went up the Chesapeake, it is supposed for Washington. The object of her removal is not known.

Among the arrivals in Hampton Roads, was the steamer North America. She was literally crowded with soldiers and laden with military equipments and stores.

The soldiers consisted of the 158th New York Volunteers, raised under the last call, and mustered into the service previous to their departure. Their destination will probably be Suffolk, which place was strengthened a few days ago by another regiment from the same State.

On Monday, Colonel Woodruff, of the 99th New York, (who has long been in the service,) was presented by his command with a magnificent sword as a testimonial of their regard and esteem. General Dix and Staff were present, and participated in the ceremony.

Tuesday will long be remembered at Old Point, in consequence of the intense heat which prevailed, the thermometer in the shade ranging from 88 to 90 degrees.

Coming up the Bay the Adelaide spoke three barks, two off New Point and the other off Cedar Point.

The Army of the Potomac.

WASHINGTON, Oct. 2. This morning's National Republican says: It is said that General McClellan is in town on Tuesday.

We understand that the President left here yesterday for Harper's Ferry. Exciting news may be expected from that quarter very soon. Heavy firing was heard yesterday afternoon at Upton's Hill, in the direction of Leesburg. It was sharp and rapid. The cause is not known as yet.

Military Affairs in New York.

ALBANY, Oct. 2. The Governor has issued a general order authorizing the recruiting of nine months' men until the order for drafting is issued. They are to be formed into companies only to fill up the old regiments.
