DR. JOHNSON BALTIMORE LOCK HOSPITAL

HAS discovered the most certain, speedy FIVE TRAINS DAILY TO AND and effectual remedy in the world for DISEASES OF IMPRUDENCE.

RELIEF IN SIX TO TWELVE HOURS. No Mercury or Noxious Drugs. A Cure Warranted, or no Charge, in from one to Two Days.

Weakness of the lack or Limbs, Strictures, Affections of the kidneys and Bladder, Involuntary discharges, Itapotency, General behility, Nervousness, Dyspepsy, Languor, Low Spirits, Confusion of Ideas, Palpitation of the
Heart Timidity, Tremblings, Dimness of sight or ciddiness, Disease or the Head, Throat, Nose or Skin, Affections of the Laver, Lungs, Stomach or Bowels—those terible disorders arising from the Solitary Habits of Youth those money and solitary practicas more latal to their victims than the song of yreus to the Mariners of Ulyses, bighting their most brilliant hopes or anticipations, rendering marriage, &c., impossible.

Young Men Especially, who have become the viotims of Solitary Vice, that dreadful and destructive habu which annually sweeps to an unaimely grave thousands of Young Men of the most existed talents and brilliant intellect, who might otherwise have entranced listening Senates with the thouders of eloquence or waked to ecstacy the living lyre, may call with full confidence.

Marriage.

married Persons, or Young Mon contemplating mar-riage, being aware of physical weakness, organic debil-ty, deformities, &c., speedly cured. He who piaces himself under the care of Dr. J. may religiously confide in his rousy as a gentleman, and con-fidently rely upon his skill as a Physician.

Organic Weakness

ramediately Cured, and full vigor Restored.

This distressing alloction—which renders I lie miserable and marriage impossible—is the penalty paid by the victims of improper indulgences. Young persons are too apt to commit exte sess from not being aware of the dreadful conseq ences that may ensue. New, who that understands the subject will pretend to 'eng that the power of processation is lost scooner by those falling into improper habits than by the prudent Besides being deprived the pleasures of healthy offspring, the most serious and destractive symptoms to both body and mind arise. The system becomes derranged, the Physical and Mental Functions Weakened, Loss of Progreative Power, Nervicus Irratibility, Dyspeeds, Palpitation of the Heart, Indigestion, Consumption, boay and Death.

Office, No. 7 South Frederick Stract.

Office, No. 7 South Frederick Street Left hand side going from Baltimore street, a lew dool from the corner. Phil not to observe name and number Latters must be paid and contain a stamp. The Dot tor's Diplomas hang in his office.

A Cure Warranted in Two Days. Dr. Johnson,

Member of the Ro. al College of surgeons, London, Graduate from one of the most embent Colleges in the United States, and the greater part of whose life has been spent in the hospitals of London, Paris, Philastelphia and ejectively that were ever known many troubled with ringing in the head and ears when asieep, great nervousness, being alarmed at sudden sounds, bashfuldess, with frequent bleaking, attended spentimes with deringement of mind were cured immediately.

Take Particular Notice.

Take Particular Notice.

Dr. J. addresses all those who have liqured themselves by improper indulge ce and solitary habits, which ruin both cody and mind, unfitting them for either business, study, society or marriage.

These are some of the sad and melancholty effects produced by early habits of youth, viz: Weakness of the Back and Limbs, Pains in the Head, Dimness of Sight, Loss of Muscular Power, Palulation of the heart, Dyspensy, Nervous Irratibility, Deraugement of the Digestive Functions, Genéral Dubility, Symptoms of Consumption, &c.

MENTALLY.—The fearful effects on the mind are much to be dreaded—Loss of Memory, Conlusion of Ideas. Depression of Spirits, Evil Forbodings, Avers on to Society, Seif Distrust, Love of solitude, Timidity, &c., are some of

tine early produced.

Thousands of persons of all ages can now judge what
is the cause of their declining health, losing their vigor,
becoming weak, pale, nervous and emacated, having a
singular appearance about the eyes, cough and symptome

Who have injured themselves by a certain practice in dailed in when alone, a habit irequently learned from evil companions, or at school, the effects of which are nightly felt, even when asleep, and if not cured renders marriage impossible, and destroys both mind and body, should apply immediately.

What a pity that a young man, the hope of his country, the darling or ins parents, should be snatohed from all prospects and enlyments of life, by the conequence of deviating from the path of acture and indulging in a certain secret habit. Such persons must, before contemplating

plating

Marriage,
reflect that a sound mind and body are the most necessary requisites to promote concubial happiness. Indeed, without these, the journey through life becomes a weary pligrinage; the prospect hourly darkens to the view; the mind becomes shadowed with despair and filled with the melancholly reflection that the happiness of another becomes blighted with our own.

Disease of Imprudence.

When the misguided and imprudence.

When the misguided and imprudent votary of pleasure finds that he has motive; the seeds of this painfur disease, it too often hapens that an til-timed sense of shame or dread of discovery, deters him from applying to those who, from a function and respectability, can alone befriend him, delaying till the constitutional symptoms on this norr d decase make their appearance, such as ulcerated sore throat, diseased nose, nocturnal pains in the head and limbs, diamess of sight, dealess, notes on the head and limbs, diamess of sight, dealess, notes on the shin bones and arms, blotches on the head, face and extremitles, progressing with frightful rapidity, till at last the palate of the mouth or the bones of the nose fall in, and the victim of this awful disease become a horrid object of commissration, till-death puts a period to his dreadful suffering, by sending him to "that Urdiscovvered Country from whomes so traveler freturns."?

"It is a meldacholly fact that, thousands fall victims to this terrible disease, owner to the unastillulness of ignorant pretenders, who by the use of that "Deadly Poston, Mercary, ruin the constitution and make the residue o life miserable.

Strangers.

Trust not your lives, or neath, to the care of the many Unlearned and Worthiess Pretenders, destitute of knowledge, name or character, who copy Dr. Johnson's adververtisements, or style themselves in the newspapers, regularly Educated Physicians incapable of Curing, they keep you trifling month after mount taking their filing and poisonous is conjounds, or as long as the smallest fee each to betained, and in despats, leave you with ruined health to such over your galling disappointment.

Dr. Johnson is the only Physician averdsing.

His credential or diplomas always hings in his office.

His remedies or treatment are unknown to all others, prepared from a life spent in the great hospitals of "Enrope, the first in the country and a more extensive Private Practice than any other Physician in the world.

Indorsement of the Press.

The many thousands caved at this institution year af-Strangers

The many thousands cured at this institution year after year, and the numerous important Surgion! Operations performed by Dr. Johnson, witnessed by the reporters of the "Sun," "Clipper," and many other papers, notices of which have appeared again and again before the public, besides his standing as a gentleman of character and responsibility, is a sufficient guarrantee to the attitude of

MAY 19, 1866,—Ellen S., set. 28, single, nover was very strong. Two years ago she had an attack of acute ruema ism, from which she was confined to her bed to rism week; and subsequenty from a relapse for four more. She has been well since then till last Satur day, while engaged in house cleaning, she took cold, had pain in her back, felt cold, hot had no decided chill. Two days later her ankies began so swell, which was followed by swelling of the knee joints and of the hands. She has now dull pain in her shoulders, and her knucicles are very ucader red and painful; both hands are affected, but the right is most so. This, then, is a case of acute rheumatism, or, as it is now fashionably called, rheumatic lever. It is a well remarked typical case. We will carefully watch the case, and from time to time call your attention to the various symptoms which present themselves. My chief object in bringing her before you now, is to call attention to a remedy which has recently been recommended in the treatment of rheumatism. I mean propylamite. Drawmarius, of St. Petersburg, recommends it in the highest terms, having derived great benefit from its use in 250 cases which came under his care. Various commendatory testimonials respecting it have appeared in our lower and the control of the control of the propose therefore to give it exercts. FROM OFFICIAL HOSPITAL REPORTS.

mendatory testimonials respecting it have appeared in our journals, and 1 propose therefore to give it another trial. I must confess I am always moredulous as to the worth of new remedies, which are vaunted as specifies, but this comes to us recommended so highly, that we are bound to give it a trial.

SAME CASE FOUR DAYS LATER! MAY 23, 1860.—I will now exhibit to you the patient to:
whom I prescribed Propyiamine, and was then laborng under an attack of acute rheumatism. She has
steadily taken it in doese of three grains every two hour(intermitting it at night.) The day after you saw her,
iound hier much more comfortable, better than and expected to be for a week or more, judging from her other
attack. (The patient now walked into the room.) The
mprovement has steadily progressed, and you cannot
all un notice a marked change in the appearance of her
units, which are new nearly all of their natural size.—

the result.

Here is another patient who was piaced on the use of the same medicine on Sunday last; she has long been suffering from chronic rheumatism, and I found her at that time with an acute attack supervening upon her chronic affection. The wrists and knuckies were much swollen and tense. She took the chloride of Propylamine in three grain doese every two hours, and you will parceive that the swelling of the joints has much dimin ished.

THREE DAYS LATER!!

THREE DAYS LATER!!

MAY 26, 1860.—This is the case of acute rheumatism cated with propylamine, the first of those to which I alled your attention at our last clinic. She is still very comfortable, and is now taking three grains thrice daily. In this case it has seemed to be followed by very satisfactory results. The second case to which your attention was called at our last lecture, has also continued to do well. I will now bring before you a very characteristic case of acute pheumatism, and if the result be satisfactory, I think, as good jurymen, we snall justly render our verdict in favor of propylamin.

He is a seaman, set. 25, who was admitted a few days ego. Has had occasional rheumatic pame, but not so as to keep his bed, until eight days 20. The pains began in his right knee, subsequently affected the left knee, and later, the joints of the upper extremities. Here, and later, the joints of the upper extremities. Here, so joint are all swollen, tense and tender. His tongue is furred his skin, as present day, though there has been much sweating. His pulse is full and strong, and about 90.—He has now used propylamine for twenty-four hours.

This guntleman is what may be called a strictly typlear case of scute rheumatism. There was exposure to cold and wet, and this exposure is followed by a feeling of old thoses, severe articular pain, beginning, as it usually does, in the lower joins: There is lever and the profuse sweating, so generally attiendant on acute rheumatism. I'dd not bring this patient before you with the intention of giving you a lecture on all the points consected with rheumatism, but to again give a trist to the new your testing the medicine it typical case, as I have called it, than which there co util on be a fairer opportunity for testing the medicine if another medicines, even anodynes, that ther may be no integriting as to which was the efficient remedy.
