Their difficulties were increased by the fact that cooking utensils in many cases had been left behind, as well as everything else that would impede their movements. It was not unusual to see a company of starving men have a barrel of flour distributed to them, which it was utterly impossible for them to convert into bread with the means and the time allowed to them. DISCOVERIES IN JERUSALEM.—An account of Sig. Pierotti's discoveries in the subterranean topography of Jerusalem has been published.— Employed by the Pasha as an engineer, he has discovered that the modern city of Jerusalem stands on several layers of ruined masonry, the undermost of which, composed of deeply bevelled and enormous stones, he attributes to the age of Solomon, next to that of Zorobabel, the next to that of Herod, the next to that of Justinian, and so till the times of the Saracens and Crusaders. He has traced a series of conduits and sewers leading from the "doom of the FOR PRESERVING PURPOSES.

He got an Arab to walk up through these immense sewers, ringing a bell and blowing a trumpet, while he himselt, by following the sound, was able to trace the exact course they took. About two years ago he accidentally ounce or singly. esda, and on his opening it a copious stream of water immediately began to flow, and has flowed ever since. They fancied it was one of the signs of Messiah's coming, and portended the speedy restoration of their commonwealth.
