sumption of the same number of men at home. A contemplation of the various camping grounds vacated by Burnside's army corps during the present week would present a fair illustration. In all the camps the waste was more or less great; but within my limited view, that of the Night New Hearthier exists a second of the limited view, that of the Ninth New Hampshire regiment was the greatest. There, in one spot, I saw fresh meat enough to compose a good sized calf which was not in the least spoiled; several barrels of salt beef and pork, and boxes of crackers which I had not time to count. Many of these were open, and had but a small portion of their con-

tents abstracted. Others were in piles, and had not been opened at all. Thus, while thousands in the army are often hungry, other thousands are wasting the food provided for them in the most disgraceful manner. Where are the Quartermasters?

After Drugs.-Three men by the names of C. W. Baldwin, J. H. Austin and A. W. Patterson arrived in Chicago a few days ago, and commenced buying up oplum and quinine. They were supposed to be agents of the Confederate government and a detective got upon CAUTION.

A Model Establishment.—Among the many improvements lately made in our city, to which we can point with pride as an evidence of prosperity and as a determination on the part o our business men, no longer to remain behind the "light house," is the completion of Eby & Kunkle's large brick building at the corner of Market and Fifth streets, which is alike creditable to the owners and ornamental to that

The building is not only one of the largest devoted to the grocery business, outside of New York, but the stock challenges competion .-Without going into detail, we may safely say that the firm keep on hand everything usually kept in a grocery store, (liquors excepted,) and that they sell at very small profits. Their clerks are civil and accommodating, and have strict instructions under no circumstances what ever to misrepresent or take advantage of any customer. A general invitation is extended to the public to visit the new building and exam ine the extensive stock, whether they purchase or not.

# Ayer's Cathartic Pills.

THE sciences of Chemistry and Medicine have been taxe their utmost to produce this best most perfect purgative which is known to man. Innumerable proofs are show that these Pills have virtues which surpass in excellence the ordinary medicines, and that they win unprecedentedly up un the esteem of all men. They are safe and pleasant to take, but powerful to cure. Their penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, stimulate sluggish in disordered organs into their natural action, and impart healthy tone with strength to the whole system. Not only do they cure the every day complaints of every body, but also formitable and dangerous diseases that have haffled the best of human skills. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being surgarcosted, they are pleasant to take; and being purely vegestable, are free from any risk of harm.
