Memco

AS discovered the most certain, speedy and effectual remedy in the world for DISEASES OF IMPRUDENCE.

RELIEF IN SIX TO TWELVE HOURS. No Mercury or Noxious Drugs.

Cure Warranted, or no Charge, in from one to Two Days. Weakness of the Back or Limbs, Strictures, Affections of the hidneys and Bladder, Involuntary discharges, Impotency, General Bebility, Nervousness, Dyspepsy, Languer, Low Spirits, Confusion of Ideas, Palpitation of the Heart, Timidity, Trembilings, Dimness of Sight or Giddiness, Di sease of the Head, Taroat, Nose or Skin, Affections of the Liver, Lungs, Stomach or Bowels—those terrible disorders arising from the Solitary Habits of Youth—those excess and solitary practicas more fatal to their victims than the song of Syrens to the Mariners of Ulyses, blighting their most brilliant hopes or anticipations, rendering marriage, &c., impossible.

Young Men.

Especially, who have become the victims of Solitary Vice, that dreadful and destructive habit which annually sweeps to an unlimely grave thousands of Young Men of the most exalted talents and brilliant intellect, who might otherwise have entranced listening Senates with the thunders of eloquence or waked to ecstasy the living lyre, may call with full confidence. Marriage.

Married Persons, or Young Men contemplating mar-riage, being a ware of physical weakness, organic debili-y, deformities, &c., speedily cured. He who places himself under the care of Dr. J. may religiously confide in his honor as a gentleman, and con-identity rely upon his skill as a Physician.

Organic Weakness

organic Weakness
Immediately Cared, and full vigor Restored.
This distressing Affection—which renders i life miserable and marriage impossible—is the penalty paid by the victims of improper indulgances. Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. New, who that understands the subject will pretend to deap that the power of proporeation is lost sooner oy those falling into improper habits than by the prudent Besides being deprived the pleasures of healthy offspring, the most serious and destructive symptoms to both body and mind arise. The system becomes deranged, the Physical and Mental Functions Weakned, Loss of Procreative Power, Nervious Irratibility, Dyspepsia, Palpitation of the Heart, Indigestion, Constitutional Debility, a Wasting of the Frame, Cough, Consumption, Decay and Death.

A Cure Warranted in Two Days.

A Cure Warranted in Two Days.

No Mercury or Naucous Drugs.

Dr. Johnson,

Member of the Ro, at College of Surgeons, London, Graduate from one of the most endnent Colleges in the United States, and the greater part of whose file has been spent in the hospitals of London, Parls, Philadelphia and elsewhere, has effected some of the most astonishing cures that were ever known many troubled with ringing in the head and ears when asleep, great nervousness, being alarmed at sudden sounds, bashfulness, with frequent blushing, attended sometimes with derangement of mind were cured immediately.

Take Particular Notice.

Dr. J. addresses all those who have injured themselves by improper indulge ce and solitary habits, which ruin both body and mind, unfitting them for either business, study, society or marriage.

These are some of the sad and metancholly effects produced by early habits of youth, viz: Weakness of the Back and Limbs, Pains in the flead, Dimness of Sight, loss of Muscular Power, Palultation of the heart, Dyspeny, Nervous Irratibility, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, 400.

MENTALLY.—The fearful effects on the mind are much to be draaded—Loss of Memory, Confusion of Ideas, De-pression of Spirits, Evil Forbodings, Aversion to Society, Saif Distrust, Love of solitude, Timidity, &c., are some of

the evus produced.

THOURANDS of persons of all ages can now judge what is the cause of their declining health, losing their vigor, becoming weak, pals, nervous and emaciated, having a singular appearance about the eyes, cough and symptoms of consumption.

reflect that a sould mind and body are the most necessary requirites to promote connubial happiness. Indeed, without these the journey-through 11th becomes a weary pligrimage; the prospect hourly despises to the view; the mind becomes shadowed with despair and filled with the melancholy reflection that the happiness of another becomes blighted with our own.

PERILS IN THE AIR

An Extraordinary Balloon Ascension, and What Came of It.

The last balloon ascension undertaken for scientific purposes was that of Mr. Glashier, which took place in England in September. With utter disregard of safety or comfort, this gentleman has ventured upon scientific experiments thick products the second of the second miles, and it fell downward. A fourth was thrown out at four miles when we were descention nearly proved fatal to him, he has returned safely with a remarkable chapter of aerial experiences to narrate. The London Athenaeum justly remarks that in his hands the balloon is restored to its old rank of a philotonic provided and a philotonic provided and attached to its neck a note.

Scofield, with his advance, has reached Elkhorn Tavern, in Arkansas, and established his headquarters there. Telegraphic communication is complete from General Curtis' headquarters there. Telegraphic communication is complete from General Scofield sends intelligence that the enemy are making for the balloon is restored to its old rank of a philotonic provided to the provided sends of th sophical agent. Gay-Lussair has shown the men of science how to use the balloon for scientific purposes; but Mr. Glashier, by his successive ascents, is adding largely to our knowledge of the higher regions of the atmosphere.

The September ascension was made in Mr. Coxwell's great balloon, and the highest point turned there when I left on the afternoon of reached was five and three-quarter miles. Mr. Glashier's interesting narrative of this voyage thus describes the effects of the atmosphere at

different altitudes: THE FREEZING POINT AT TWO MILES. When we attained the height of two miles, at 1 h. 21 min., the temperature had fallen to at 1 h. 21 min., the temperature had fallen to different, that on another occasion I might be the freezing point; we were three miles high able to go higher; and it is possible that some at 1 h. 28 m., with a temperature of 18 deg.; at 1 h. 39 m. we had reached four miles, and at 1 h. 39 m. we had reached four miles, and the temperature was 8 deg.; in ten minutes more we had reached the fifth mile, and the temperature of the air had passed below zero, and there read minus 2 deg.; and at this point no dew was observed on Regnault's hygrometer when cooled down to minus 30 deg. Up to this time I had taken the observations with comfort. I had experienced no difficulty in breathing, while Mr. Coxwell, in consequence of the necessary exertion he had to make, had breath-

ed with difficulty for some time. DIMNESS OF SIGHT AT FIVE AND A QUARTER MILES. DIMNESS OF SIGHT AT FIVE AND A QUARTER MILES.

At 1 h. 51 m. the barometer read 11.05 inch., but which requires a substractive correction of well and Mr. Glashier, deserves to rank with 0.25 inch., as found by comparison with Lord the greatest feats of experimentalizers, discoverostesley's standard barometer just before erers and travelers. It is true these gentlemen starting, both by his lordship and myself, which have not brought down a very comfortable or starting, both by his lordship and myself, which would reduce it to 10.08 inches, or at a height of about 5½ miles, I read the dry bulb as minus 5 degrees; in endeavoring to read the wet bulb I could not see the column of mercury. I rubbed my eyes, then took a lense, and also failed. I then tried to read the other instruments, and found I could not do so, nor could'! see the hands of the watch. I asked Mr. Codewell to help me, and he said he must go into the ring, and he would when he came down. I endeavored to reach some brandy, which was lying on the table at about the distance of a foot from my hand, and found myself unable do so.

Total loss of power at five and there quare the came down. The miles and and atture faints in unconsciousness. The very birds will not fly in that very sky which is their poetical home.

The miles are despeted to the unconsciousness. The very birds will not fly in that very sky which is their poetical home.

Money tight; rates 2 and 2½; legal tender notes of siscount; exchange on New York payable currency 10@20 discount. Sevore payable cur

TER MILES. My sight became more dim, I looked at the sky from below, and science examines and feels it on a level. The sky is the emblem of poetry and tried to record it, but I was unable to write, I then saw it at 10 inches, still decrease equally true, but the point of view from which liverpool dates of the 7th inst. Her advices of height of about 2500 feet. I felt I was lost it usiasm science can inspire and what courage sons engaged in the meles, including several ing all power, and endeavored to rouse myself it can give. If the man, as the poet says, had handred soldiers off duty. The Irish were at by struggling and shaking. I attempted to a speak, and found I had lost the power. I attempted to look at the barometer again, my head fell on one side; I struggled and got it right, and it fell on the other, and finally fell it can give. If the man, as the poet says, had handred soldiers off duty. The Irish were at last overpowered by the English.

The law for the abolition of slavery in the Dutch West Indies in July next, passed the sir six miles above the surface of the earth.

States General of Holland, by a vote of 45 to 7.

My arm, which had been resting on the table, fell down by my side. I saw Mr. Coxwell dimly in the ring. It became more misty, and finally dark, and I sank unconsciously as in sleep; this must have been about 2 h. 54 m. I then heard Mr. Coxwell say, "What is the temperature? Take an observation; now try." Bu I could neither see, move nor speak. I then heard him speak more emphatically, "take an heard him speak more emphatically, "take an observation, now, do try." I shortly afterward opened my eyes, saw the instruments and Mr. Coxwell very dimly, and soon saw clearly, and said to Mr Coxwell, "I have been insensible;" and he replied, "You have, and I near-law"

I recovered quickly, and Mr. Coxwell said, "I have lost the use of my hands; give me some brandy to bathe them." His hands were nearly black. I saw the temperature was still below zero, and the barometer reading 11 inches, but increasing quickly. I resumed my observations at 2 h. 7 m., recording the barometer reading 11 53 inches, and the temperature minus 2 deg. I then found that the water in the vessel supplying the wet-bulb thermometer which I had by frequent disturbances kept from freezing, was one solid mass of ice. Mr. Coxwell then told me that while in the ring he felt it piercingly cold, that hoar frost was all around the neck of the balloon, and on at-tempting to leave the ring he found his hands frozen, and he got down how he could; that he found me motionless with a quiet and placid

insensible. THE AERONAUT'S EXPEDIENT.

He then said he felt insensibility was coming the enemy.
over himself; that he became anxious to open the walve; that his hands failed him; and that was murdered in Missouri by the federal soldians. he seized the line between his teeth, and pulled the valve open until the balloon took a turn downward. This act is quite characteristic of Mr. Coxwell. I have never yet seen him without a ready means of meeting every difficulty as it has arisen, with a cool self-possession that has always left my mind perfectly easy, and given to still at Harper's Ferry.

The Federals on last Wednesday were destroy.

me every confidence in his judgment in the management of so large a balloon.

Mr. Glashier is convinced that the balloon containing only himself and the aeronaut Coxwell finally reached an altitude of over six miles, but of this he is not positive, as his ability to wretched and sham read the instruments ceased at the height of sick and wounded. five and three quarter miles. On this point, he

ticed the temperature, he said he could not, as last. No particulars were received. the faces of the instruments were all toward (Gen. Pemberton, who supersedes Van Dorn and me, but that he had noticed that the centre of the aneroid barometer, its blue hand and a rope attached to the car were in the same straight line. If so, the reading must have been between seven and eight inches. A height of six miles and a half corresponds to eight inches. A delicate self-recistating minimum them. WM. DOCK, Jr., & CO.

give the enemy the immediate possession of

the Alabama and Tombigbee rivers.

A march of the enemy into the interior of
Alabama would succeed in cutting the Confedesting. Mr. Glashier says:

On descending, when the temperature rose to 17 deg. it was remarked as warm, and at 24 deg. it was noted as very warm. The temperature then gradually increased to 57½ deg. on reaching the earth. It was remarked that the entire length, as it would destroy the line of connection now reasons through Montgomery. sand was quite warm to the hand, and steam connection now passing through Montgomery, issued from it when it was discharged. Six which has been of incalculatable benefit to the pigeons were taken up. One was thrown out at the height of three miles. It extended its
