THE sciences of Chemistry and Medicine have been taxe their utmost to produce this been, most periect purgative which is kno no to man. Innuture able proofs are show, that these Pills have virtues which surpuss in excellence the ordinary medicines, and that they win supprecedentedly up at the exteem of all men. They are safe and pleasant to take, but powerful to cure. Their penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blor 0, and cayed disease. They purge out the foul humors which breed and grow distemper, stimulate sluggith or disordered organs in o their natural action, and impart healthy tone with strength to the whole system. Not only do they cure the every day complaints of every body, but also formidable and dangerous diseases that have baffied the best of human skill. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children.
