Ayer's Cathartic Pills.

THE sciences of Chemistry and Medicine have been taxed their ut not to produce this best, most perfect purgative which is known to man. Innumerable proofs are shown that there Pries have virtues which surpass in excellence the ordinary medicines, and that they win unprecedentedly up in the esteem of all men. They are safe and pleasant to take, but powerful to cure. Their penetrating properties stimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, stimulate sluggish or disordered organs into their natural action, and impart healthy tone with strength to the whole system. Not only do they cure the every day complaints of every body, but also formidable and dan skill. While they produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being sugarcosted, they are pleasant to take; and being purely vegetable, are free from any risk of harm. Cures have been made which surpass belief were they not substantiated by men of such exaited position and character as to forbid the suspicion of untrath. Many eminent clergymen and physicians have lent their names to certify to the public the reliability of our remedies, while others have sent me the assurance of their conviction that our Preparations contribute immensely to the relief of my afflicted, suffering fellow-men.

The agents below named are pleased to infinish gratis our american Almanac, containing directions for the usuand certificated of their curves, of the following complaints:

and certificates of their cures, of the following com-plaints:

They also, by purifying the blood and atimulating the system, cur-many complaints which it would not be suprosed they would reach, such as Deafness, Partial Blindness, Neu-ralgia and Nervous Irritability, Derangements of the liver and Kidneys, Goul, and other kindred complaints arising from a low state of the body or obstruction of its functions.
