NEW ADVERTISEMENTS. ELECTRICITY.

PRS. WYETH and CREAMER, Ecleptic and Electropathic physicians, tespectfully bear their professional services in all the various branches of the profession, for the treatment of all acute and chronic

the profession, for the treatment of all acute and circum forms of disease.

The remedial means they employ in the treatment of disease consist of Magnetism, Galvanism, Electro-Magnetism, the Swedish method of Localized movement cure, a few Eclectic medicines when deemed necessary, and in fact all the natural curiative agents that may successfully be brought to bear upon the disease.

They do not wish to be understood as arrogating to themselves any superiority of professional skill, but they believe the remedius they employ in the treatment of discase far superior to those generally employed byphysicians, from the fact that they act in perfect harmony, with they law governing shill controlling the human system. To this and the fact that they confine themselves to no particular pathy or system, they attribute their success is controlling disease.

The principal agent they employ in the treatment of

this; and the fact that they confine themselves to no particular pathy or system, they attribute their success he controlling disease.

The principal agent they employ in the treatment of disease, namely, Electricity, is an agent wonderful, in the phendmen and powerful in its effects for good or ill. It is an ever present, all-pervrding principle, governing all things, from rolling worlds down to the invisible particles of gasseous matter. We see it in the lightning's flash and hear the manifestations of its power'n the mattering thunder. It is the cause of all decomposition, recomposition and transformation. It excites all motion. It is the exciting cause of elife, growth, decay and death. It causes secretion, excretion, digestion, it lays hold of the crude food in the stomach, converts it into a state of fluidity, transmutes it into arterial blood, and selfids it on its important office of supplying nutriment according to the necessities of the body. It is the nerve vital fluid; the great agent through which the mind acts upon the hody. It is the cause of all causes except the first great cause, the Infinite Mind which created it and brought it into disc. These may appear like mere assertions, but they are facts admitting of strong and irresistible proof. Is it these, to be wondered at that an agent so wonderful in its militerations and so intimately connected with all the operations of the human system, should be almost absolute in its power of controlling disease? Certainly not it is a natural sequence; and follows as surely as day follows flight.

Among the disecess which are found to yield readily to Electricity, in conjunction with proper adjunct treatment, may be mentioned the following: inclinent Consumption, Paralysis, Elpiliptic, Hysteric and other Convulsions; Neuralgia, in its worst forms, Rhuemalism, inflammatory and chronic; all diseases of the nervous system; played and pendia organs; Fermale Diseases, Asthma, Plits' and Prolapsus Ani; Amaurosis and all kindred affections of the eye; Aurous, Str
