GREAT REMEDY CONSTITUTION, AND THE ONLY KNOWN REMEDY

IABETES, and DISEASES of the KIDNEYS and BLADDER.

CONSTITUTION WATER

Has been pronounced by the Medical Faculty and the public, to be the most wonderful remedy for the permanent ource of all diseases of the STOMACH, LIVER, KIDNEYS and BLADDER that has ever been offered. It is not a MINERAL WATER. It is from experience that CONSTITUTION WATER has emanated, and we now say let no man doubt, when a single boule has been known to cure diseases which the best medical talent in this country has failed to relieve.

A remedy possessing the virtues of Constitution Water cannot be classed under "quack" preparations, as, it now used by the most scientific practitioners in this city. It is only second class physicians that cry down popular remedies, while the better skilled make use of every means to accomplish a cure; and the success of the physician increases as his knowledge of different remedies enables him to produce a cure, while othere fail in the attompt. Science is satisfied with the truth.

Give Constitution Water a fair trial—we mean you who are under some specialist's care from year to year, and we particularly allude to ladies who are consantly resorting to local treatment, and all sorts of local applications for diseases, with as much chance of saccuses as there would be from local applications to the throat for diseases of the brain.

We have been always careful to use language in our

io tocal treatment, and all sorts of local applications for diseases, with as much chance of success as there would be from local applications to the throat for diseases of the brain.

We have been always careful to use language in our circular that could not shock the most delicate organization, but we receive so many communications from persons for which Constitution Water is adapted, and of whose diseases no mention has been made, that we have come to the conclusion that if the remedy is capable of producing a cure, no matter wint the disease may be, it should be made known. The modicine is put up fer the public, and there should be no exceptions.

We would say, Constitution Water is not like a gilded pill, made to suit the eye and taste; it is a modicine in every sense of the term placed in the hands of the people for their relief, and if taken according to the directions if will, in every case, produce a radical cure. We would say that the directions in regard to diet, etc., relate only to the disease under which they occur.

DIABETES

Is a disease of the stomach and liver, acting through the kidneys, and is, without doubt, the most obstinate disease, except consumption, that affects the human constitution We have no space for discussing causes, but will state that the effect of the disease is the conversion of the starchy principle (or vegetable portion of the food) into sugar, which stimulates the kidneys to an excessive secretion of water. Many persons suffer from this disease who are ignorant of it; that is, they pass large quantities during the duy, and are obliged to get up from one to fifteen or twenty times during the night. No notice is taken of it multi their attention is called to the large discharge of water. Many persons suffer from this disease who are ignorant of it; that is, they pass large quantities during the only the advention of ordinary remedies. Another symptom is the great thirst, which, when the objects is taken of it multi their attention is called to the large discharge of water.

For these diseases it is truly a sovereign remedy, and too much cannot be said to its praise. A single dose has been known to relieve the most argent symptoms. Are you troubled with that distressing pain in the small of the back and through the hips? A teasposiful a day, of the Constitution Water will relieve you like magic.

PHYSICIANS Have long since given up the use of buchu, cubobs and juniper in the treatment of those diseases, and only use them for the want of a better remedy.

We present the Constitution Vater to the public with the conviction that it has no equal in relieving the class of diseases for which it has been found so eminently successful for curing; and we trust that we shall be rewarded for our efforts in placing 50 valuable a roundy in a form to meet the requirements of patient and physician. Bosros Corners, N. 1., Dec. 27, 1861.—Wm. H. Gregg & Co.—Gentz: I freely give you liberty to make use of the following certificate of the value of Constitution Water, while I can recommond in the highest manner: his wifewas attacked with pain in the shock-lers, whole length of the back, and in her limbs, with Palpitation of the Heart and Irritation of the Bladder. I calted a physician, who attended her about three months, when he left her worse than he had found her I then employed one of the best physicians I could find, who attended her for about mine months, and while she was under his cureshed id not suffer quite as much pain. He finally gave her up, and said "her case was incorable. For," said he, "she has such a combination of complaints that medicine given for one operates against some other of her difficulties." About this time she commenced the use of Countitution Water, and to our uter astonishment, almost the first does seemed to have the desired effect, and she kept on improving rapidly under its treatment, and now superincends entirely her domestic affairs. She has not taken any of the Coustitution Water for about four weeks, and weare happy to say that it has produced a permanent cure.

Waterstell, Coun., March 2, 1863.—Dr. W. H. Gregg—Dear Sir.—Having seen your advortisement of the Kidneys and irritation of the Bladder, having suffered for the past three years, and tried the skill of a number of physicians with only temporary relief, I was induced to try your medicine. I procured one bottle of your agents at Hartford, Messrs Lee, Sisson & Co., and when I had used half of it, to my surprise I found a great change in my health. I have used two bottles of it, and am where I never expected to be in my life, well, and in good spirits, I cannot express my gratitude for it; I feel that it is all and more than you recommend it to be. The remedial means they employ in the treatment of

The remedial means they employ in the treatment of classes consists of Magnetism, Galvaniam, Electro Magnetism, the Swedish method of Localized movement cure, a few Ect cite medicines when deemed necessary, and in act all the natural curative agents that may successfully be brought to bear upon the disease.

They do not wish to be understood as arrogating to themselves any superiority of professional skill, but they believe the remedies they employ in the treatment of disease are superior to those generally employed byphysicians, from the fact that they act in perfect harmony with the laws governing and controlling the human system. To this, and the fact that they confine themselves to no particular pathy or system, they attribute their success i controlling disease.

this, and the fact that they confine themselves to no par toolar pathy or system, they entitivite their success i controlling disease.

The principal agent they employ in the treatment of disease, analy, Electricity, is an agent wonderful in its phenomena and powerful in its effects for good or ill. It is an ever present, all perverding principle, governing all things, from rolling words down to the invisible particles of gasseous matter. We see it in the lightning's fast's and hoar the manifestations of its power in the mutt-ring thunder. It is the cause of all decomposition, recomposition, recomposition, recomposition, and transformation. It excites all motion. It is the exciting cause of life growth, decay and death. It causes secretion, excretion, digestion, it tays hold of the crude food in the stomach, converte it into a state of duidity, transmutes it into arterial blood, and scinds it on its unportant onlice of supplying matriment, according to the necessities of the body. It is the nerve vital fluid, the great agent through which the mind acts upon the bodys it is the cause of all causes exo pt the first great cause, the Infinite Mind which created it and brought it have ue these may appear like mere assertions, but they as notes admitting of strong and irresistible proof. Is it then, to be wondered at that an agent so wonderful in its phenomena, as powerful in its manifestatious and so intimate to be wondered with all the operations of the human system, should be almost absolute in its power of controlling disease? Certainly not. It is a natural sequence and follows as surely as day follows night.
