IABETES. and DISEASES of the KIDNEYS and BLADDER.

CONSTITUTION WATER

Has been pronounced by the Medical Faculty and the public, to be the most wonderful remedy for the permanent cure of all discusses of the STOMACH, LIVER, KIDNEYS and BLADDER that has ever been offered. It is not a MINERAL WATER. It is from experience that CONSTITUTION WATER has emanated, and we now say let no man doubt, when a single bottle has been known to cure discuses which the best medical talent in this country has failed to relieve.

A remedy possessing the virtues of Constitution Water cannot be classed under "quack" preparations, as it now used by the most scientific practitioners in this city, It is only second class physicians that cry down popular remedies, while the better skilled make use of every means to accomplish a cure; and the success of the physician increases as his knowledge of different remedies enables bun to produce a cure, while othere fail in the attempt. Science is satisfied with the truth.

Give Constitution Water a fair trial—we mean you who are under some specialists's care from year to year, and we particularly allude to tadies who are constantly resorting to local treatment, and all sorts of local applications for diseases, with as much chance of success as there would be from local applications to the throat for diseases of the brain.

We have been always careful to uso language in our

be from local applications to the ibroat for diseases of the brain.

We have been always careful to use language in our circular that could not shock the most delicate organization, but we receive so many communications from persons for which Constitution Water is adapted, and of whose diseases no mention has been made, that we have come to the conclusion that if the remedy is capable of producing a cure, no matter what the disease may be, it should be made known. The medicine is put up for the public, and there should be no exceptions.

We would say, Constitution Water is not like a gilded pill, made to suit the eye and taste; it is a medicine in every sense of the term, placed in the hands of the people for their relief, and if taken according to the directions it will, in overy case, produce a radical cure. We would say that the directions in regard to diet, etc., relate only to the disease under which they occur.

DIABETES

would say that the directions in regard to diet, etc., relate only to the disease under which they occur.

DIABETES

is a disease of the stomach and liver, acting through the kidneys, and is, without doubt, the most obstinate disease, except consumption, that affects the human constitution. We have no space for discussing causes, but will stafe that the effect of the disease is the conversion of the starchy principle (or vegetable portion of the food) into sugar, which stimulates the kidneys to an excessive secretion of water. Many persons suffer from this disease who are ignorant of it; that is, they pass large quantities during the day, and are obliged to get up from one to fifteen or twenty times during the night. No notice is taken of it until their attention is called to the large discharge of water, and often when it is so far advanced as to be beyond the control of ordinary remedies. Another symptom is the great thirst, which, when the disease is fully established, is intolerable—the patient drinks constantly without being satisfied; also dryness of the mouth, crucking of the lips, a sweet breath, in the more advanced cases, and finally loss of appetite, emacation, and the patient gradually staks from exhaustion.

Cosstructions Waters is, without doubt, the only known remedy for Diabetes, and we have as much confidence that it is a specific as we have that opium will produce sleep, and truthfully say that it has cured every case in which it has been used.

For these diseases it is truly a severeign remedy, and too much cannot be said in its praise. A single dose has been known to relieve the most urgent symptoms.
Are you troubled with that distressing pain in the small of the back and through the hips? A tenspoenful a day of the Constitution Water will relieve you like magic.

PHYSICIANS Have long since given up the use of bachu, cubobs and juniper in the treatment of those diseases, and only use them for the want of a better remedy.

CONSTITUTION WATER has proved itself equal to the task that has devolved upon it.

DIURETICS tritate and drench the kidneys, and by constant use soon lead to chronic degeneration and confirmed disease. We present the Constitution Water to the public with the conviction that it has no equal in relieving the class

we present the Constitution water to the phonic with the conviction that it has no equal in relieving the class of diseases for which it has been found so eminently suc-cessful for ouring; and we trust that we shall be rewarded for our citorts in placing so valuable a remedy in a form to most the requirements of patient and physician. DANVILLE, Pa., June 2, 1862—Dr. Wm. H. Gregg—Dear Sir: In February, 1861, I was affected with sugar diabetes, and for five months I-passed more than two galloins of water in twenty-lour bours. I was obliged to get up as often as ten or twelve times during the night, and in five months I lost about firty pounds in weight. During the month o. July, 1861, I procured two bottles of Constitution Water, and in two days after using at lexperienced redied, and after taking two bottles I was entirely oured, soon after regaining my usual good health. Yours truly.

pertenced relief, and after taking two bottles I was chirdly ouren, soon after regaining my usual good boalth. Yours truly.

Boston Corners, N. 1., Dec. 27, 1861.—Wm. H. Gregg & Co.—Gentz: I freely give you liberty to make use of the following certificate of the value of Constitution Water, which I can recommend in the highest manner: My wife was attacked with pain in the shoulders, whole length of the back, and in her limbs, with Palpitation of the Heart and Irritation of the Badder. I called a physician, who stemded lier about three months, when he left her worse than he had found her I then employed one of the best physicians I could find, who attended her for about nine months, and while she was under his careshedd not surfar quite as much pain. He finally gave her up, and said "there are was incurable. For," said he, "she has such a combination of complaints that medicine given for one operates against some other of her difficulties." About this time she commenced the use of Constitution Water, and to our utter astonlishment, almost the first does seemed to have the desired effect, and she kept on improving rapidly under its treatment, and now superintends entirely her domestic affairs. She has not taken any of the Gonstitution Water for about four weeks, and we are happy to say that it has produced a permanent cure.

Weenerspyred, Conn., March 2, 1863.—Dr. W. H. Gregg—Dear Sir:—Having seen your advertisement of 'Constitution Water," recommended for Inflammation of the Kidneys and Irritation of the Biadder, having suffered for the past three years, and tried the skiil of a number of physicians with only temporary relief, I was induced to try your medicine. I procured one bottle of your signits at Hartford, Messre Lee, Sisson & Co., and when I had used half of it, to my surprise I found a great change in my health. I have used two bottles of it, and am where I never expected to be in my life, well, and in good spirits. I cannot express my gratitude for it; I feel that it is all sad more than you recommend i

the professional services in ail the various branches of the profession, for the treatment of all acute and chronic forms of disease.

The remedial means they employ in the treatment of disease consist of Magnetism, Galvanism, Electro-Magnetism, the Swedish method of Localized movement cure, a few Eclectic modelines when deemed necessary, and in act all the natural curative agents that may successfully be brought to bear upon the disease.

They do not wish to be understood as arrogating to themselves any superiority of professional skill, but they believe the remedies they employ in the treatment of disease far superior to those generally employed byphysicians, from the fast that they act in perfect harmony with the laws governing and controlling the human system. To this, and the fact that they confine themselves to no par ticular pathy or system, they attribute their success i controlling disease.

this, and the fact that they confine themselves to no particular pathy or system, they attribute their success i controlling disease.

The principal agent they employ in the treatment of disease, samely, Electricity, is an agent wonderful in its phenomena and powerful in its effects for good or ill. It is an over present, all-pervrding principle, governing all things, from rolling worlds down to the invisible particles of gasseous matter. We see it in the lightning's flash and hear the manifestations of its power in the mutt-ring thunder. It is the cause of all decomposition, recomposition and transformation. It excites all motion. It is the excited all motion. It is the excited of the excited all decomposition, recomposition and transformation. It excites all motion. It is the excited of a converted the second of the stomach, converts it into a state of fluidity, transmutes it into arterial blood, and sends it on its important ofnee of supply my nutriment according to the necessities of the body. These may appear like mere assertions, but they as, facts admitting of strong and irresistible proof. Is it then to be wondered at that an agent so wonderful in its phenomona, so powerful in its manifestations and so intimately connected with all the operations of the human system, should be almost absolute in its power of controlling disease? Certainly not, It is a natural sequence and follows as surely as day follows night.

This distressing affection—which readers life mise cable and marriage impossible—is the penalty paid by the victims of improper indulgence. Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, who that under stands the subject will pretend to deny that the power of procreation is lost sooner by those falling into improper habits than by the prudent. Besides being degrived the pleasures of healthy offspring, the most cerioss and destructive symptoms to both body and mind arise. The system becomes deranged, the physical and mental functions weakened, loss of procreative power, nervous tritability, dyspepsia, palpitation of the heart, indigestion, constitutional debility, a wasting of the frame, caugh, consumption, decay and death.
