AREVOLUTION IN MEDICINE.

What may seem almost incredible, is, that many disease hitherto considered hopelessly incurable are frequently cured in a few days or weeks, and we cheerfully invite the investigations of the liberal minded and scientist to cures which have no parallel at the present day. Our medicine is peculiar; by it the seat of any discass is directly reached, and the equilibrium restored.

Those who have suffered long from painful and obstimate diseases, those who have vainly sought relief from advertised medicines, those who cannot be cured by other physicians—

AR. INVITED TO UNE CONTTITUTION LIFE SYRUP.
During the past five years we have contended with obstacles and overcome opposition as herculcan as were ever encountered by any Reformers.

RAPIDITY OF CURE:

Some say, "Your cures are too quick," while others doubt their permanence, and think that disease can only be eared by the "slow recuperative process of Nature."

This is our reply:

In health, the body, like a well-balanced scale, is in a state of Equilibrium. But when from any cause down goas one side of the scale, we have the effects of disease. What is requisite is, to restore the normal balance of the scale.

RS. WYETH and CREAMER, Eclectic and Electropathic physicians, respectfully offer their professions services in all the various branches of the profession, for the treatment of all acute and chronic forms of disease.

The remedial means they employ in the treatment of disease consist of Magnetism; Galvanism, Electro-Magnetism, the Swedish method of Localized movement cure, a few Echecite medicines when deemed nocessary, and in fact all the natural curative agonts that may successfully be brought to bear upon the disease.

They do not wish to be understood as arrogating to themselves any superiority of professional skill, but they believe the remedies they employ in the treatment of disease far superior to those generally employed byphysicians, from the fact that they act in perfect harmony with the laws governing and controlling the human system. To this, and the fact that they confine themselves to no par licular pathy or system, they attribute their success? inis, and the fact that they confine themselves to no pa icular pathy or system, they attribute their success is controlling disease.

The principal agent they employ in the treatment of disease, annely, bioctricity, is an agent wonderful it its phenomena and powerful in its effects for good or ill. It is an ever present, all-pervicing principle, governing all things, from rolling worlds down to the invisible particles of gasseous matter. We see it in the lightning's fash and hear the manifestations of its power in the muttering thunder. It is the sayse of all decomposition, recomposition and transformation. He excites all motion. Is it then to be wondered at that an agent so wonderful in its phenomena, so power ful in its manifestations and so intimately connected with all the operations of the human system, should be almost absolute in its power of controlling disease? Certainly not. It is a matural sequence and follows as surely as day follows night.
