

MISCELLANY.

Equal to the emergency.—Not many years ago, two Frenchmen—one wealthy and in possession of ready cash, and the other poor, penniless—occupied, by chance, the same room in a suburban hotel. In the morning the "seedy" one rose first, took from his pocket a pistol and holding it to his own forehead and backing against the door, exclaimed to his rich companion:

"It is my last desperate resort: I am penniless and tired of life; give me five hundred francs or I will instantly blow out my brains, and you will be arrested as a murderer!"

"The other lodged found himself the hero of an important dilemma, but the cogency of his companion's argument struck him "cold." He quitted his room in his pantaloons, handed over the amount, and the other vanished, after locking the door on the outside.

Hearing of this, another Frenchman, of very savage aspect, one night tried to room with a tall, raw-boned gentleman from Arkansas, who had been rather free with his money during the day, and evidently had plenty more behind.

Next morning "Pike," awakened, discovered his room-mate standing over him, with a pistol leveled at his own head, and evidently quivering with agitation.

"What the deuce are you standin' thar for in the mornin'?" said Pike, propping himself on his elbow, and coolly surveying the Gaul.

"I am desperate!" was the reply—"You give me one hundred dollars, or I will blow out my brains!"

"Well, then blow an' be bedarn'd," replied Pike, turning over.

"You will be arrested for ze murder!" persisted the Gaul earnestly.

"En, what's that?" said Pike; "oh, I see!" and suddenly drawing a revolver and a five pound bow-knife from under his pillow, he said brightly:

"A man may as well be hung for a sheep as a lamb," he coolly remarked; and, at a word, he started for the Gaul; but the latter was too nimble; "the boss-pistol," innocent of lead, exploded in the air, and with one frantic leap his little Frenchman was standing in his night robe at the foot of the staircase—a proof that was may suit one latitude will not answer for another.

Frog Showers.—M. Sequin, of the French Academy of Sciences, broaches a new theory to account for the frequent pretended showers of frogs. He writes thus:

In certain pools upon my estates of Fontenay may be seen, at certain periods of the year, myriads of tadpoles blackening the surface of the water. Once, at a time of great moisture, I saw in a footpath of three hundred meters in length by one meter in breadth, leading to a small pond, a multitude of little frogs about the size of a bean, continually leaping about. In a school which I made as exactly as possible under the circumstances, I found that each square meter contained from one to three hundred of these little animals, which would give a total for the whole space of between thirty and forty thousand. I considered that the hosts of tadpoles generated in the ponds, following the action of a general law, would be transformed into frogs at about the same moment, and this multitude, urged by their instinct to travel, would betake themselves to the path just mentioned. Being in continual motion, a heavy wind or hurricane might easily seize them, and carrying them to a great distance, would naturally give rise to the belief in showers of frogs.

Sewing Machines.

THE GROVER & BAKER NOISELESS FAMILY SEWING MACHINE is rapidly superseding all others for family use. The Grover & Baker Sewing Machine is found to be the only one which survives the wash-tub on bias seams, and, therefore, the only one permanently valuable for family sewing.

READ THE FOLLOWING TESTIMONY: "MRS. JEFFERSON DAVIS, presents her compliments to Grover & Baker, and takes pleasure in saying that she has purchased one of their Machines for her family, and finds it to be the best sewing machine she has ever used, and does not think of any kind."—Washington, D. C.

"It is a beautiful thing, and puts every body into a state of good humor. I have purchased one of these Grover & Baker Sewing Machines, and find it to be the best sewing machine I have ever used, and does not think of any kind."—Washington, D. C.

"My wife has had one of Grover & Baker's Family Sewing Machines for some time, and I am satisfied it is the best sewing machine I have ever used, and does not think of any kind."—Washington, D. C.

"On the recommendation of a friend, I purchased, some months since, one of your Family Sewing Machines. My family has been most successful in its use, from the start, without any trouble or difficulty whatever in its management. My wife says it is a family blessing, and could not be induced to dispense with it in any way."—James Pollock, Esq., Governor of Pennsylvania.

"The undersigned, Clergymen of various denominations, having purchased and used in our families GROVER & BAKER'S NOISELESS FAMILY SEWING MACHINE, take pleasure in recommending it as an instrument fully combining the essentials of a good machine. Its beautiful simplicity, ease of management, and the strength and elasticity of its steel, unite to render it a machine unsurpassed by any in the market, and one which we feel confident will give satisfaction to all who may purchase and use it."—Rev. W. P. STICKLAND, New York; Rev. E. P. RODGERS, D. D., Albany, N. Y.; Rev. W. B. BAKER, D. D., Albany, N. Y.; Rev. JOHN CROSS, Baltimore, Md.; Rev. JOHN MORON, D. D., Baltimore, Md.; Rev. Miscellaneous.

THE AMALGAMATION OF LANGUAGES.—There is a growing tendency in this age to appropriate the most expressive words of other languages, and after a while to incorporate them into our own; thus the word Cephalic, which is collected in connection with Mr. Spalding's great Headache Remedy, but it will soon be used in a more general way, and the word Cephalic will become as common as Electricity and many others whose distinction as foreign words has been worn away by common usage until they seem "native" to the manor born.

Hardly Realized. "It had 'n terrible headache this afternoon, and I stepped into the hypochondriac hand says to his man, 'Can you please me with an 'eache?' " "Does it hache 'ard,' says he. 'Hoxceingidly,' says he, 'hand upon it, 'e gave me a Cephalic Pill, and 'poner it cured me so quick that I 'rdly realized I 'ad 'an 'eache'."

HEADACHE is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain and viewed in this light may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, till too late to be remedied; and its indications should never be neglected. Headaches may be classified under two names, viz: Symptomatic and Idiopathic. Symptomatic Headache is exceedingly common and is the precursor of a great variety of diseases, among which are Apoplexy, Gout, Rheumatism and all febrile diseases. In its nervous form it is sympathetic of disease of the stomach constituting sick headache, or the colic of the brain and viewed in this light may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, till too late to be remedied; and its indications should never be neglected.
