

MISCELLANY.

CONSUMPTION OF ALCOHOL.—At the recent meeting of the American Pharmaceutical Association, Mr. Frederick Stearns, of Detroit, Michigan, submitted a paper on alcohol, stating that the Ohio Valley contributed the largest share of whiskey and its derivatives produced in the United States. The amount of whiskey which finds a market annually in Cincinnati is about 500,000 barrels, worth on an average, one year with another, \$5,000,000. An estimate of the total product of whiskey in the United States, based upon its production in the several States, and not upon the receipts of the large Eastern market, gives 1,500,000 barrels. The total product of alcohol in the United States is 184,000 barrels, worth over \$7,000,000. Of this quantity one-fourth is manufactured in Cincinnati. The manufacture in that city has, however, fallen off at least one-half, since 1855, when it reached its maximum, owing to the foreign demand, which has been nothing since. It is estimated that, until the introduction of illuminating coal oils, by far the largest proportion of the common alcohol produced was employed in the manufacture of burning fluid; since, however, the largest proportion is employed under the name of pure and proof spirit, in the manufacture of domestic brandy, gin, etc.

In the remarks that followed upon this paper, a statement was made, which was corroborated by several members, that in making Catawba brandy, instead of its being distilled from Catawba wine, as is generally supposed, the wine, consisting of good, skinned and pressed grapes, consisting of a still with ordinary whiskey, and distilled, and constitutes the Catawba brand of commerce. Catawba wine is \$1.50 per gallon, and to produce the brandy from it would cost from \$6 to \$8, while it is offered at from \$2.50 to \$4 per gallon.

THE CONGRESSMEN FROM OREGON.—A Lesson for Young Men to Study.—Mr. Nesmith, one of the Senators from Oregon, is a native of Maine, 45 years of age, served his time as a carpenter's apprentice, boy until 21 years of age, when he emigrated to the West, and finding himself one day out of money, and being unable to get employment at his trade, enlisted in the army. He served five years on the frontier, in Dodge's Regiment of Dragoons. At the expiration of his term of service he started overland for Oregon, with the emigration of 1843, and arrived in Oregon City in the fall of that year. When the provincial government was organized in 1842, Mr. Nesmith was elected a member of the Legislature. He went to California in the summer of 1848, with many other Oregonians, worked for some months at mining on Feather river, and returned to Oregon the next spring. He was afterwards superintendent of Indian affairs for Oregon, but was removed.

The Hon. Lansing Stout, congressman elected from Oregon, is now about to visit Utica, N. Y., his native place. He is a native of Central New York, and a few years ago drove a stage between Utica and Newport, Herkimer county, N. Y. He went to California; studied law some time; emigrated to Oregon, for Congress; stamped a district equal in size to New York, and comes east to take his place among the law-givers of the nation.

A Well known equestrian is now on a farm in Kansas engaged in training a number of buffalo to the ring, intending to ride an act of horsemanship (?) upon one of them. He has ten of them in hand, which he intends driving tandem before a music wagon in procession.—It is probable that he will so far accomplish his purpose as to excite a good deal of sympathy among the teams of buffaloes in procession, driven by one person, will indeed be a curiosity.

Sewing Machines. THE GROVER & BAKER. NOISELESS FAMILY SEWING MACHINE. It is rapidly superseding all others for family use. The Grover & Baker Sewing Machine has been invented to be the only one which serves the wash-tub on bias seams, and, therefore, the only one permanently valuable for Family Sewing.

READ THE FOLLOWING TESTIMONY: "Mr. JEFFREYS DAVIS, presents her compliments to Grover & Baker, and takes pleasure in saying that she has used one of their Machines for two years, and finds it to be the best and most useful she has ever used, and does not know of any kind."—Washington, D. C.

It is a beautiful thing, and puts everybody into a state of good humor, and is the best and most useful thing in the world. I take much pleasure in recommending it to the public."—J. G. Harris, Governor of Tennessee.

THE GROVER & BAKER Sewing Machine. It is rapidly superseding all others for family use. The Grover & Baker Sewing Machine has been invented to be the only one which serves the wash-tub on bias seams, and, therefore, the only one permanently valuable for Family Sewing.

EXTRA SUGAR CURED HAMS.—Just received by sep25-d&w

Miscellaneous.

THE AMALGAMATION OF LANGUAGES.—There is a growing tendency in this age to appropriate the most expressive words of other languages, and after a while to incorporate them into our own; thus the word Cephalic, which is from the Greek, signifying "for the head," is now becoming popularized in connection with Mr. Spalding's great Headache remedy, and it will soon be used in a more general way, and the word Cephalic will become as common as Electricity and many other words which distinguish foreign words from our own by common usage until they seem "native" to the man born here.

Headache is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, till too late to be remedied; and its indications should never be neglected.

The Toilet.

THE ONLY PREPARATION THAT HAS STOOD THE TEST OF YEARS. AND GROWS MORE AND MORE POPULAR EVERY DAY! And testimonials, new, and almost without number, might be given from ladies and gentlemen in all grades of society, whose united testimony none could resist, that Prof. Wood's Hair Restorative will restore the bald and thinning hair, and preserve the hair of the youth to old age, in all its youthful beauty.

PROF. WOOD.—These will please accept a line to inform you that the hair on my head fell off over twenty years ago, caused by a complicated chronic disease, attended with an eruption on the head. A continual course of medicine, and the use of various remedies, failed to restore it. I have not been able to obtain stuff for caps, neither have I been able to do them up, in consequence of which my head has suffered extremely from cold. This induced me to pay Briggs & Hodges almost the last cent I had on earth for a two dollar bottle of their Hair Restorative about the first of January, 1857. It was fully followed the directions, and the bald spot is now covered with hair thick and black, though short; it is falling in all over my head, and I feel confident that another large bottle would restore it entirely and permanently. I feel anxious to persevere in its use, and being desirous to see the effect of it, I have ordered another bottle, and I feel confident that it will be the same as the first. I have not been able to obtain stuff for caps, neither have I been able to do them up, in consequence of which my head has suffered extremely from cold.

PROF. WOOD.—These will please accept a line to inform you that the hair on my head fell off over twenty years ago, caused by a complicated chronic disease, attended with an eruption on the head. A continual course of medicine, and the use of various remedies, failed to restore it. I have not been able to obtain stuff for caps, neither have I been able to do them up, in consequence of which my head has suffered extremely from cold.
