TO AGRICULTURISTS.

PEDIGREE AND POINTS OF NEAT CATTLE.—As a general rule it may be taken that, to produce superior stock, no middle course is safe or successful. The best stock obtainable should be bred of, and it is bad policy to spare any moderate outlay in securing first-class animals — Many obtain second class animals, and endeavor to raise from them superior breeding stock. I am convinced it is a wrong policy to adopt. Breeders will not generally spare their best animals, and it frequently happens that the best cannot be obtained. In such cases there is no choice but to select the best that may be obtainable.

In such cases pedigree is fully entitled to our consideration, and it is desirable that it should be watched with care. In all cases where the breed has been carefully preserved pure, great benefit will result from doing so. The character of a breed becomes more and more concentrated and confirmed in a pedigree animal, and this character is rendered more fully hereditary in proportion to the number of generations through which it has been transmitted. By the aid of pedigree purity of blood may be insured, and a systematic plan adopted by which we can perpetuate distinct families, and thereby obtain a change of blood without its being a cross. It is evident that any one adopting a systematic arrangement will be able to do this more effectually than another without this aid. This is the more important when the number of families is small, as is the case with Devons and Herefords, especially the former. The individual animals from which the Devons are descended are very limited in number, and in a few hands, but, with some honorable exceptions, little attention is given to this point. The importance is rendered evident by the decreasing size of the breed, the number of barren heifers, and the increased delicacy of constitution shown in the stock of many breeders of that district who are not particular in this respect. The contrast between such herds and those in which more care and judgment are exercised, renders the advantages of attention to pedigree very evident; for here the strength of constitution is retained, together with many of the advantages of this valuable breed.

Having then, with due consideration, selected the breed, and the families of that breed possessing the points which are to be perpetuated, it is necessary to take individuals therefrom. The cows should be characterized by an aptitude for producing fine calves, and bringing them to a full degree of development. They should therefore be good milkers, for the value of the produce will be very much regulated by this character. We shall have occasion to see subsequently that this property is in no degree prejudicial to any other desirable point of character. This tendency to produce milk not only influences the supply of food to the young animal after its birth, when any deficiency may be remedied, but it regulates the growth of the calf before birth when a substitute cannot be used. Thus many of our best bred short-horn cows produce calves which are very imperfectly developed and exceedingly weak—so much so, that many persons accustomed to inferior stock would consider them scarcely worth rearing. This is mainly referable to the supply of nourishment given to the calf being so small, for the subsequent supply of milk clearly indicates how limited had been the support given to the fœtus.

This neglect of the milking disposition is a great evil at the present day, and our best breeds are suffering, and will continue to suffer from it until more attention is given to this point in the awards at the National Exhibitions. Here it should be made a leading point of merit, and this would stimulate breeders to give more attention to it. It has been sadly overlooked, but it is in the power of the Highland Agricultural Society, and other kindred societies, to do much to bring our breeding cows into a more satisfactory state in this respect. Already great complaints have been made of stock sent abroad, and particularly from America, which acts prejudicially on ourselves; and when it is seen that the possession of milking properties may be advantageously encouraged even in our best breeds it is evident that it is only necessary to draw attention repeatedly to this fact, and sooner or later it must be corrected.

Breeding cows should also possess strong and healthy constitutions, and there are certain developments of figure which indicate their existence No one would consider a flat ribbed animal, with a narrow carcass and contracted chest, to give promise of health; neither would the rising of the rump bone be a good feature. These are sure signs of predisposition to consumption and diarrhœa. The full round barrel and the deep wide chest, together with a level back and broad pins, are essential points of healthy constitutions.

We are well aware that many diseases are transmitted from the parent to the offspring, which must be jealously guarded against; dysentery, consumption, scrofula and rheumatic affections have been clearly proved to be perpetuated in this manner. It is therefore of the deepest importance to avoid anything of the kind in the parents selected for a herd of breeding cattle. The three former frequently result from relationship being too close, in other cases arising from different causes, but the effect is the same, so far as regards the extension of the evil. That boldness of figure which we prize as indicating a well developed animal is also valuable as a sign of health and vigor. Thus, those points which are so pleasing to the grazier are equally valuable to the breeder.

The breeder of first-class stock cannot be too particular in his selection of bulls. He must always be prepared to detect the weak points of his stock, and remedy them by using a bull well developed in these respects. Notwithstanding the great importance of having good cows to breed from the influence exerted by the bull renders his quality and character of even greater importance. Not only are his good or bad qualities spread through the large number of cows he serves, but there are certain hereditary qualities more fully transmitted from the bull than the cow. The bull, therefore, should be as perfect as can be obtained, and possess the greatest purity of descent.

The following points may be said to indicate a well developed bull:

The Head should be rather small in proportion to the animal, and well set upon the neck, with a fine tapering muzzle, a broad forehead, bright full yet placid eyes, furnished with a graceful horn of fine quality, and ears small and fine.

The Neck should be thick but not too short, but having a graceful appearance by tapering steadily towards the head, and yet not getting thin behind the ears.

The Shoulder should be snugly in the carcass: it should be covered with a well developed muscle down to the knee, below which it should possess a fine and flat bony structure.

The Chest should be bold and prominent, wide and deep, furnished with a deep, but not a coarse dewlap.

The Carcass should be barrel-shaped, having a top level and broad, especially across the hips, the ribs should be well rounded, the space between the last rib and the pin should not be too short, yet at the same time we must guard against too much length; there will, however, be little cause for objection if the rib is well rounded and the bone flat, for it will add weight to the animal in a good part. The flank should be full and pendant.

The Hind Legs should be full and fleshy down to the hock, with a well developed buttock, showing great substance, but below the hock we require a fine and cleanly formed bone.

The Tail should be finely formed, without much hair.

The Hide mellow to the touch, covered with a fine yet plentiful coat of hair.

Animals thus developed in all these points will be alike gratifying to the eye of the connoisseur and profitable to the grazier.

Bulls have a natural tendency to show points of failure which are not observable in bullocks; and taking all breeds into consideration, this is most frequently noticed by a deficiency in the hind quarters of the animal. Whilst, however, we should endeavor to obtain a bull as perfectly formed as possible, it is especially desirable to secure a full, I might almost say an excessive development of any part which may be deficient in the cows or heifers he has to be used with. If they are weak, either in the fore or hind quarter, or if deficient in size, this may be remedied by selecting a bull distinguished for possessing these properties in an unusual degree.

It is in this respect that the extensive breeders have such advantage over those keeping smaller herds. It is necessary for them to keep three or four bulls, and very often they have more. The consequence is, that a selection can be made in such cases according to the deficiency of the heifer or cow; whereas, where only one bull is kept, this cannot be without involving the expense and trouble of sending to a distance, and often this is not available.—It is a matter of doubt with some how far an increase of size obtained by using a large bull can be done with safety to the females producing the calves. No fear need be entertained on this ground. The female alone determines the size of the calf at birth, but subsequently a larger growth shows the increase of size derived from the sire.

The possession of a good form and desirable qualities is not all that is necessary to be noticed in selecting a bull for producing breeding stock. We have also to observe how far this character has been held by his parents. Cases are frequent in which inferior cows have been put to first-class bulls, and the produce has rivalled the sire for beauty and perfection; but such an animal, although possessing in an eminent degree the formation of body which is desired, is totally unfit for being used as a bull. Here we have the explanation of the fact that many bulls which are most pleasing to the eye are noted for throwing inferior stock.

The explanation is clearly this, that the maxim of "like producing like" is modified by another law—viz., that animals have varying powers of hereditary transmission, dependent upon the degree to which certain peculiarities of character may have been concentrated within them. As I have before said, every successive generation "in the line" will possess, in a greater degree, the power of transmitting certain peculiarities, and immediately such an animal is crossed with a cow which has no such power, in consequence of an irregular line of descent, the bull exerts the greatest influence, and the progeny fully partakes of his character.

The quality of the produce is improved even more where this difference exists, than if a superior cow had been used. Lord Spencer noticed this many years ago. He says: "It is admitted by every one that the qualities of the offspring are usually similar to those of the parents, either combining, in various proportions, the qualities of both parents, or taking entirely after one. I should say as regards cattle and sheep, that in most cases the qualities of the male parent predominate in the offspring. I have also observed that the worse bred the female is, the more will this be the case when she is put to a well bred male."—This principle had been previously advocated by Rev. H. Berry in his celebrated Prize Essay on Breeding. It is therefore as important to see the parents of the bull as the animal itself; and no one pretending to any degree of careful breeding should neglect this point. Here we again observe the value of pedigree, which is so justly appreciated by short-horn breeders, who well know that any taint in the descent often reappears after several generations, to the prejudice of the stock.

An error is frequently committed by breeders of stock of medium merit, from not being particular as to the bull first used for their heifers, considering that as a heifer's calf is not generally desirable for stock, so it is not important to select a good bull. There is, however, little doubt but that the character of the bull first used gives an impress to the entire produce of that animal, even although later calves are got by other bulls. The temper of the bulls should not be overlooked, for it is established beyond all doubt that this is hereditary in the stock, and it influences considerable difference on the tractibility, as well as the disposition for fattening, of all the descendants.—*Miner's Rural American.*

Miscellaneous.

THE AMALGAMATION OF LANGUAGES.—There is a growing tendency in this age to appropriate the most expressive words of other languages, and after a while to incorporate them into our own; thus the word Cephalic, which is from the Greek, signifying "to the head," is now becoming popularized in connection with Mr. Spalding's great Headache remedy, but it will soon be used in a more general way, and the word Cephalic will become as common as Electrotype and many other words whose distinction as foreign words has been worn away by common usage until they seem "native and to the manor born."

Hardly Realized.

Hi'ad 'n 'orrible 'eadache this hafternoon, hand I 'stepped into the hapothecaries 'hand says hi to the man, "Can you 'elp me of 'n 'eadache?" "Does it hache 'ard," says 'e. "Hexcedingly," says hi, hand upon that 'e gave me a Cephalic Pill, hand 'pon me 'onor it cured me so quick that I 'ardly realized I 'ad 'ad an 'eadache.

☞ HEADACHE is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, till too late to be remedied; and its indications should never be neglected. Headaches may be classified under two names, viz: Symptomatic and Idiopathic. *Symptomatic Headache* is exceedingly common and is the precursor of a great variety of diseases, among which are Apoplexy, Gout, Rheumatism and all febrile diseases. In its nervous form it is sympathetic of disease of the stomach constituting *sick headache*, of hepatic disease constituting *bilious headache*, of worms, constipation and other disorders of the bowels, as well as renal and uterine affections. Diseases of the heart are very frequently attended with Headaches; Anæmia and plethora are also affections which frequently occasion headache.—Idiopathic Headache is also very common, being usually distinguished by the name of *nervous headache*, sometimes coming on suddenly in a State of apparently sound health and prostrating at once the mental and physical energies, and in other instances it comes on slowly, heralded by depression of spirits or acerbity of temper. In most instances the pain is in the front of the head, over one or both eyes, and sometimes provoking vomiting; under this class may also be named *Neuralgia.*

For the treatment of either class of Headache the Cephalic Pills have been found a sure and safe remedy, relieving the most acute pains in a few minutes, and by its subtle power eradicating the diseases of which Headache is the unerring index.

BRIDGET.—Missus wants you to send her a box of Cephalic Glue, no, a bottle of Prepared Pills—but I'm thinking that's not just it neither; but perhaps ye'll be aither knowing what it is. Ye see she's nigh dead and gone with the Sick Headache, and wants some more of that same as relaived her before.
Druggist.—You must mean Spalding's Cephalic Pills.
Bridget.—Och! sure now and you've said it, here's the quarther and giv me the Pills and dont be all day about it aither.

Constipation or Costiveness.

No one of the "many ills flesh is heir to" is so prevalent, so little understood, and so much neglected as Costiveness. Often originating in carelessness or sedentary habits; it is regarded as a slight disorder of too little consequence to excite anxiety, while in reality it is the precursor and companion of many of the most fatal and dangerous diseases, and unless early eradicated it will bring the sufferer to an untimely grave. Among the lighter evils of which costiveness is the usual attendant are Headache, Colic, Rheumatism, Foul Breath, Piles and others of like nature, while a long train of frightful diseases such as Malignant Fevers, Abscesses, Dysentery, Diarrhœa, Dyspepsia, Apoplexy, Epilepsy, Paralysis, Hysteria, Hypochondriasis, Melancholy and Insanity, first indicate their presence in the system by this alarming symptom. Not unfrequently the diseases named originate in Constipation, but take on an independent existence unless the cause is eradicated in an early stage From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Cephalic Pills on the first appearance of the complaint, as their timely use will expel the insidious approaches of disease and destroy this dangerous foe to human life.

A Real Blessing.

Physician—Well, Mrs. Jones, how's that headache?
Mrs Jones—Done! Doctor at good deal that pill you sent cured me in just twenty minutes and I wish you would send more so that I can have them handy.
Physician.—You can get them at any Druggists. Call for Cephalic Pills, I find they never fail, and I recommend them in a case of Headache
Mrs. Jones—I shall send for a box directly, and shall tell all my suffering friends for they are a *real blessing.*

TWENTY MILLIONS OF DOLLARS SAVED.—Mr. Spalding has sold two millions of bottles of his celebrated Prepared Glue at 25 cts estimated that each bottle saves at least ten dollars worth of broken furniture, thus making an aggregate of twenty millions of dollars reclaimed from total loss by this valuable invention Having made this Glue a household word, he now proposes to do the world still greater service by curing all the aching heads with his Cephalic Pills and if they are as good as his Glue, Headaches will soon vanish away like snow in July.

☞ NERVOUS EXCITEMENT, or the mental care and anxiety incident to the close attention to business or study, are among the most common causes of Nervous Headache. The disordered state of mind and body incident to this distressing complaint is a fatal blow to all energy and ambition.—Such sufferers can always obtain speedy relief from these distressing attacks by using one of the Cephalic Pills whenever the symptoms appear It quiets the overtasked brain, and soothes the strained and jarring nerves, and relaxes the tension of the stomach which always accompanies and aggravates the disordered condition of the brain.

FACT WORTH KNOWING.—Spalding's Cephalic Pills are a certain cure for Sick Headache, Bilious Headache, Nervous Headache, Costiveness and General Debility.

GREAT DISCOVERY.—Among the most important of all the great medical discoveries of this age may be considered the system of vaccination for protection from Small Pox, the Cephalic Pill for relief of Headache, and the use of Quinine for the prevention of Fevers, either of which is a sure specific, whose benefits will be experienced by suffering humanity long after their discoverers are forgotten.

☞ DID you ever have the Sick Headache? Do you remember the throbbing temples, the fevered brow, the loathing and disgust at the sight of food? How totally unfit you were for pleasure, conversation or study. One of the Cephalic Pills would have relieved you from all this suffering which you then experienced For this and other purposes you should always have a box of them on hand to use as occasion requires.

Cephalic Pills
CURE
Sick Headache
CURE
Nervous Headache
CURE
All kinds of
Headache.

By the use of these Pills the periodic attacks of *Nervous or Sick Headaches* may be prevented; and if taken at the commencement of an attack immediate relief from pain and sickness will be obtained.
They seldom fail in removing the *Nausea* and *Headaches* to which females are so subject.
They act gently upon the bowels,—removing *Costiveness.*
For *Literary Men, Students,* Delicate Females, and all persons of *sedentary habits,* they are valuable as a *Laxative*, improving the *appetite*, giving *tone* and *vigor* to the digestive organs, and restoring the natural elasticity and strength of the whole system.
The CEPHALIC PILLS are the result of long investigation and carefully conducted experiments, having been in use many years, during which time they have prevented and relieved a vast amount of pain and suffering from Headache, whether originating in the *nervous* system or from a deranged state of the *stomach.*
They are entirely vegetable in their composition, and may be taken at all times with perfect safety without making any change of diet, *and the absence of any disagreeable taste renders it easy to administer them to children.*
BEWARE OF COUNTERFEITS!
The genuine have five signatures of Henry C. Spalding on each box.
Sold by Druggists and all other dealers in Medicines.
A Box will be sent by mail prepaid on receipt of the
PRICE TWENTY-FIVE CENTS.

The Toilet.

THE ONLY DISCOVERY
WORTHY OF ANY CONFIDENCE FOR RESTORING
THE BALD AND GRAY.

MANY, since the great discovery of Prof. Wood, have attempted not only to imitate his restorative, but profess to have discovered something that would produce results identical; but they have all come and gone, being carried away by the wonderful results of Professor Wood's preparation, and have been forced to leave the field to its resistless sway. Read the following:

BATH, Maine, April 18, 1859

PROF. O. J. WOOD & CO.: *Gents*:—The letter I wrote you in 1856 concerning your valuable Hair Restorat ve, and which you have published in this vicinity and elsewhere, has given rise to numerous enquiries touching the facts in the case. The enquiries are, first, is it a fact of my habitation and name, as stated in the communication; second, is it true of all therein contained; third, does my hair still continue to be in good order and of natural color? To all I can and do answer invariably yes. My hair is even better than in any stage of my life for 40 years past, more soft, thrifty, and better colored; the same is true of my whiskers, and the only cause why it is not generally true, is that the substance is washed off by frequent ablution of the face, when if care were used by wiping the face in close connection with the whiskers, the same result will follow as the hair. I have been in the receipt of a great number of letters from all parts of New England, asking me if my hair still continues to be good; as there is so much fraud in the manufacture and sale of various compounds as well as this, it has, no doubt, been basely imitated, and been used, not only without any good effect, but to absolute injury. I have not used any of your Restorative of any account for some months, and yet my hair is as good as ever, and hundreds have examined it with surprise, as I am now 61 years old and not a gray hair in my head or on my face; and to prove this fact, I send you a lock of my hair taken off the past week. I received your favor of two quart bottles last summer, for which I am very grateful: I gave it to my friends and thereby induced them to try it; many were skeptical until after trial, and then purchased and used it with universal success. I will ask as a favor, that you send me a test by which I can discover fraud in the Restorative, sold by many, I fear, without authority from you. A pure article will insure success, and I believe where good effects do not follow, the failure is caused by the impure article, which curses the inventor of the good. I deem it my duty, as heretofore, to keep you apprised of the continued effect on my hair, as I assure all who enquire of me of my unshaken opinion of its valuable results.

I remain, dear sirs, yours, A. C. RAYMOND.
AARON'S RUN, KY., Nov. 30, 1858.

PROF. O. J. WOOD: *Dear Sir*:—I would certainly be doing you a great injustice not to make known to the world, the wonderful as well as the unexpected result I have experienced from using ONE bottle of your Hair Restorative. After using every kind of Restoratives extant, but without success, and finding my head nearly destitute of hair, I was finally induced to try a bottle of your Hair Restorative. Now, candor and justice compel me to announce to whoever may read this, that I now possess a new and beautiful growth of hair, which I pronounce richer and handsomer than the original was. I will therefore take occasion to recommend this invaluable remedy to ALL who may feel the necessity of it.

Respectfully yours, REV. St. ALLEN BROCK.

P. S.—This testimonial of my approbation for your valuable medicine (as you are aware of) is unsolicited; but if you think it worthy of a place among the rest, insert if you wish; if not destroy and say nothing.

Yours, &c., REV. S. A. B.

Go Housekeepers.

Spalding's Prepared Glue!
"A Stitch in Time saves Nine."
ECONOMY!
Dispatch!
Save the Pieces!

As accidents will happen, even in well-regulated families, it is very desirable to have some cheap and convenient way for repairing Furniture, Toys, Crockery, &c.

SPALDING'S PREPARED GLUE
meets all such emergencies, and no household can afford to be without it. It is always ready and up to the sticking point. There is no longer a necessity for limping chairs, splintered veneers, headless dolls, and broken cradles. It is just the article for cone, shell, and other ornamental work, so popular with ladies of refinement and taste.

This admirable preparation is used cold, being chemically held in solution, and possessing all the valuable qualities of the best cabinet-makers' Glue. It may be used in the place of ordinary mucilage, being vastly more adhesive.

"USEFUL IN EVERY HOUSE"

N. B.—A Brush accompanies each bottle. *Price*, 25 cents.

WHOLESALE DEPOT, No. 48 CEDAR STREET, NEW YORK

Address HENRY C. SPALDING & CO.,
Box No. 3,600. New York.

Put up for Dealers in Cases containing Four, Eight, and Twelve Dozen—a beautiful Lithographic Show-Card accompanying each package.

☞ A single bottle of SPALDING'S PREPARED GLUE will save ten times its cost annually to every household ☞

Sold by all prominent Stationers, Druggists, Hardware and Furniture Dealers, Grocers, and Fancy Stores.

Country merchants should make a note of SPALDING'S PREPARED GLUE, when making up their list. It will stand any climate.

Medical.

DR. MOTT'S
CHALYBEATE
RESTORATIVE
PILLS OF IRON

AN aperient and Stomachic preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen Sanctioned by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions, indicate its necessity in almost every conceivable case.

Innocuous in all maladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

IN DEBILITY, NERVOUS AFFECTIONS, FMACIATION, DYSPEPSIA, CONSTIPATION, DISEASES OF THE KIDNEYS, INCIPIENT CONSUMPTION, SCROFULOUS TUBERCULOSIS, SALT RHEUM, MISMENSTRUATION, WHITES, CHLOROSIS, LIVER COMPLAINTS, CHRONIC HEADACHES, RHEUMATISM, INTERMITTENT FEVERS, PIMPLES ON THE FACE, &c.

In cases of GENERAL DEBILITY, whether the result of acute disease or of the continued dilapidation of nervous and muscular energy from chronic complaints one trial of this restorative has proved successful to an extent which no description or written attestation would render credible Invalids so long bed ridden as to have become forgotten in their own neighborhoods, have suddenly reappeared in the busy world as if just returned from protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated victims of apparent marasmus, sanguineous exhaustion, critical changes, and that combination of nervous and dyspeptic aversion to air and exercise for which the physician has no name

IN NERVOUS AFFECTIONS of all kinds, and for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and overheating; and gently, regularly aperient, even in the most obstinate cases of costiveness without ever being a gastric purgative, or inflicting a disagreeable sensation.

It is this latter property, among others, which makes it so remarkably effectual and permanent a remedy for *Piles*, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them

IN DYSPEPSIA, innumerable are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant *Costiveness.*

In unchecked DIARRHŒA, even when advanced to DYSENTERY, confirmed, emaciating, and apparently malignant the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debilitating cough, and remittent hectic, which generally indicate INCIPIENT CONSUMPTION, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In SCROFULOUS TUBERCULOSIS, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of iodine, without any of their well known liabilities.

The attention of females cannot be too confidently invited to this *remedy* and *restorative*, in the cases peculiarly affecting them.

In RHEUMATISM both chronic and inflammatory—in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the swellings and stiffness of the joints and muscles.

In INTERMITTENT FEVERS it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high renown and usefulness.

No remedy has ever been discovered in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.

Put up in neat flat metal boxes containing 50 pills, price 50 cents per box; for sale by druggists and dealers. Will be sent free to any address on receipt of the price. All letters, orders, etc., should be addressed to

UDOLPHO WOLFE'S
AROMATIC
SCHNAPPS
SCHIEDAM
A SUPERLATIVE
TONIC, DIURETIC,
ANTI DYSPEPTIC
AND
INVIGORATING CORDIAL

TO THE CITIZENS OF NEW JERSEY AND PENNSYLVANIA,

APOTHECARIES, DRUGGISTS, GROCERS AND PRIVATE FAMILIES.

WOLFE'S PURE COGNAC BRANDY.
WOLFE'S PURE MADEIRA, SHERRY AND PORT WINE.
WOLFE'S PURE JAMAICA AND ST. CROIX RUM
WOLFE'S PURE SCOTCH AND IRISH WHISKY.
ALL IN BOTTLES.

I beg leave to call the attention of the citizens of the United States to the above WINES and LIQUORS, imported by UDOLPHO WOLFE, of New York, whose name is familiar in every part of this country for the purity of his celebrated SCHIEDAM SCHNAPPS. Mr. WOLFE, in his letter to me, speaking of the purity of his WINES and LIQUORS, says: "I will stake my reputation as a man, my standing as a merchant of thirty years' residence in the City of New York, that all the BRANDY and WINES which I bottle are pure as imported, and of the best quality, and can be relied upon by every purchaser." Every bottle has the proprietor's name on the WAX, and a fac simile of his signature on the certificate. The public are respectfully invited to call and examine for themselves. For sale at RETAIL by all Apothecaries and Grocers in Philadelphia.

GEORGE H. ASHTON,
No. 832 Market street, Philadelphia,
Sole Agent for Philadelphia.

Read the following from the New York *Courier*:

ENORMOUS BUSINESS FOR ONE NEW YORK MERCHANT.—We are happy to inform our fellow-citizens that there is one place in our city where the physician, apothecary, and country merchant, can go and purchase pure Wines and Liquors, as pure as imported, and of the best quality. We do not intend to give an elaborate description of this merchant's extensive business, although it will well repay any stranger or citizen to visit UDOLPHO WOLFE'S extensive warehouse, Nos. 18, 20 and 22, Beaver street, and Nos 17, 19 and 21, Marketfield street His stock of Schnapps on hand ready for shipment could not have been less than thirty thousand cases; the Brandy, some ten thousand cases—Vintages of 1836 to 1856; and ten thousand cases of Madeira, Sherry and Port Wines. Scotch and Irish Whisky, Jamaica and St. Croix Rum, some very old and equal to any in this country. He also had three large cellars, filled with Brandy, Wines, &c. in casks, under Custom-House key, ready for bottling Mr. WOLFE'S sales of Schnapps last year amounted to one hundred and eighty thousand dozen, and we hope in less than two years he may be equally successful with his Brandies and Wines.

His business merits the patronage of every lover of his species. Private families who wish pure Wines and Liquors for medical use should send their orders direct to Mr WOLFE, until every Apothecary in the land make up their minds to discard the poisonous stuff from their shelves, and replace it with WOLFE'S pure WINES and LIQUORS.

We understand Mr. WOLFE, for the accommodation of small dealers in the country, puts up assorted cases of Wines and Liquors Such a man, and such a merchant, should be sustained against his tens of thousands of opponents in the United States, who sell nothing but imitations, ruinous alike to human health and happiness.

For sale by C. K. KELLER, Druggist, sole agent for Harrisburg. sep5-d&w6m

MANHOOD,
HOW LOST, HOW RESTORED.
Just Published, in a Sealed Envelope,
A LECTURE ON THE NATURE, TREATMENT AND RADICAL CURE OF SPERMATORRHŒA, or Seminal Weakness, Sexual Debility, Nervousness and Involuntary Emissions, producing Impotency, Consumption and Mental and Physical Debility.
BY ROB. J. CULVERWELL, M. D.

The important fact that the awful consequences of self-abuse may be effectually removed without internal medicines or the dangerous applications of caustics, instruments, medicated bougies, and other empirical devices, is here clearly demonstrated, and the entirely new and highly successful treatment, as adopted by the celebrated author, fully explained, by means of which every one is enabled to cure himself perfectly, and at the least possible cost, thereby avoiding all the advertised nostrums of the day The Lecture will prove a boon to thousands and thousands

Sent under seal to any address, *post paid*, on the receipt of two postage stamps, by addressing Dr. CHAS J. C. KLINE, 480 First Avenue, New York, Post Box 4,586.

BLOOD FOOD

The attention of Invalids, Physicians, Clergymen, scientific men, and the public generally, is respectfully solicited to the merits of this chemical preparation, containing IRON, SULPHUR, AND PHOSPHORUS, and which is identical in its composition with the *Hæmatin Globule*, or *red blood*. In all diseases accompanied with

DEBILITY,

pale countenance and nervous derangement, analyses of the blood show a deficiency of the red globules Ruddy complexion and a rosy tint of the skin, is always indicative of health; while a pale, wax-like skin and countenance,—which evinces a deficiency of the red globules,—accompanies a diseased organism. Preparations of IRON have been given for the purpose of supplying the red globules, but we contend that IRON alone, SULPHUR alone, or PHOSPHOROUS alone, will not meet the deficiency in every case, but that a judicious combination of all these elements is necessary to restore the blood to its normal standard. This point, never before attained, has been reached in the BLOOD FOOD, and its discovery ranks as one of the most scientific and important of the age. Its effects in

CONSUMPTION

are to soften the cough, brace the nerves, strengthen the system, allay the profuse night sweats, increase the physical and mental energy, enrich the blood by restoring the lacking red globules, increase the appetite, restore the color, and clothe the skeleton frame with flesh The BLOOD FOOD will be found a specific in all CHRONIC DISEASES OF THE THROAT OR LUNGS, such as *Asthma, Bronchitis, Coughs*, &c. Public speakers and singers will find it of great utility in clearing and strengthening the vocal organs. In *Dyspepsia, Liver Complaints, Dropsy, Epilepsy, Paralysis, Scrofula Gravel, St. Vitus' Dance, Fever and Ague*, &c., its efficiency is marked and instantaneous. In no class of diseases, however, are the beneficial effects of this remedy so conspicuous as in those harrassing

FEMALE COMPLAINTS

to which the gentler sex are liable, and which tend towards Consumption, such as suppressed or difficult *Menstruation, Green Sickness, Whites*, &c., especially when these complaints are accompanied with paleness, adding blue or pallor of the skin, depression of spirits, debility, palpitation, want of appetite, and nervous prostration. We have the utm
