THE AMALGAMATION OF LANGUAGES .- There is a growing tendency in this age to appropriate the most expressive words of other languages, and after a while to in. or; orate them into our own; thus the word Cephalic, which is from the Greek, signifying "for the head," is now becoming popularized in cinnection with Mr. Spalding's great Headache remedy, but it will soon be used in a more general way, and the word Cephali , will become as commonas Electrotype and many others whose distinction as foreign words has been worn away by common usage until they seem "native a to the manor born."

IF HEADACHE is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which night otherwise escape attention, till too late to be remedied; and it indications should never be neglected. Head. aches may be classified under two names, viz : Symptomatic and Idiopathic. Symptomatic Teadache is exceedingly common and is the precursor of a great variety of diseases, among which are Apoplexy, Gout, Rheumatism and all febrile diseases. In its nervous form it is sympathetic of disease of the stomach constituting sick headache, of hepatic disease constituting bilious headache, of worms, constipation and other disorders of the bowels, as well as renal and uterine affections. Diseases of the heart are very frequently attended with Readaches; Auxmia and pletoora are also affections which frequently occasion headache .---Idiopathic Headache is also very common, being usually distinguished by the name of nervous headache, sometimes coming on suddenly in a State of spparently sound health and prostrating at once the mental and physical energies, and in other instances it comes on slowly, heralded by depression of spirits or acerbity of temper. In most instan ces the pain is in the front of the head, over one or both eyes, and sometimes proveking vomiting ; under this class may also be named Neuralgia.

For the treatment of either class of Headache the Cephalic Pills have been found a sure and safe remedy, relieving the most acute pains in a few minutes, and by its subtle power eradicating the diseases of which Headache is the

Constipation or Costiveness.

No one of the "many ills flesh is heir to" is so prevalent, so little understood, and so much neglected as Costivences. Often originating in carelessness or addentary babito; it is regarded as a slight disorder of too little consequence to excite suriety, while in reality it is the precursor and companion of many o' the most fatal and dangerous dis-eases, and unless early gradicated it will bring the sufferer to an untimely grave. Among the lighter evils of which costiveness is the usual attendant are Headache, Colic, Rheumatism, Foul Breath, Files and others of 1 ke nature, while a long tran of frightful discasses such as Malignant Fevers, Abcesses, Dyscutery, Diarnboa, Dyspepsis, Apo-plexy, Epilepsy, Paralysis, Hysters, Hypochondrissis, Melancholy and Insaintr, first indicate their presence in the system by this slarming symptom. Not un requently the diseases named originate in Constipation, but take on an and phendent existence unless the cause is eradicated in an early stage. From all these considerations it fellows that the disorders rebuilt receiption and and phendent existence in ever it occurs, and no person should neglect to get a box of Combile Bib not the Set the cause is of the state. In CREES OF GENERAL DEBILITY, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative has proved successful to an extent which no description or written attestation would render credible. Invalids so long bed-ridden as to have be come forgotten in their own neighborhoods, have suddenly re-appeared in the busy world as if just returned from protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated victims of apparent mainsmus, sanguineous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.
In NERVOUS AFFECTIONS of all kinds, aud for reasons familiar to medical men, the operation of this preparation of iron must necessarily be salutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and owscheating; and gontly, regularly aperient, even in the statested property, among others, which makes it so remarkably effectual and permanent a remedy for *Pices*, upon which it also appears to exert a distinct and specific action. by dispersing the local tranelery which forms them. In DYSPERSIA, innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant Costiveness. In unchecked DIARHEGA, oven when advanced to DYSEX year, confirmed, emacating, and apparently malignant the effects have been equally decisive and stronishing. The attention of females cannot be too confidently invited to this remedy and restorative, in the cases peculiarly af-facting tham. In RusuMATISM, both chronic and inflammatory—in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the swel-langs and stiftness of the joints and muscles. In intremutrent Fevens it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high renown and usefunders. No remedy has ever been discovered in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. The attention of Invalids, Physicians, Clergymen, scientific men, and the public generally, is respectfully soldited to the merits of this chemical preparation con-taining IRON, SULPHUR, AND PHOSPHOROUS, and which is identical in its composition with the Hemati-*Giobult, or rat flood.* In all diseases a companied with DEBILITY, pale countenance and nervous derangement, analyses of the blood show a deficiency of the red globules. Rudy complexion and a rosy that of the skin, is always indica-tive of health; while a pale, wax-like skin and counte-nance, - which evinces a deficiency of the red globules, accompanies a diseased organism. Preparations of IRON have been given for the purpose of supplying the red glo-bules, but we contend that IRON alone, SULPHUR alone, or PHOSPHOROUS alone, will not meet the deficiency in every case, but that a judicious combination of all these elements is necessary to restore the blood to its normal standard. This point, never before attained, has been reached in the BLOOD FOOD, and its discovery ranks as one of the most scientific and important of the age. Its effects in O N S U M P F LON
