

LOCAL NEWS.

THE DAILY PATRIOT AND UNION may be had at Jack's Book Store, corner of Third and Market streets.

PATRIOT AND UNION.—The DAILY PATRIOT AND UNION can be had by Dauphin subscribers, every morning, at the periodical store of J. S. FRANK.

THE CHANGING OF SCHEDULES.—Under the change of schedules on the different railroads, the time of closing the mails at the Harrisburg Post Office, December 1st, 1880, is as follows:

PENNSYLVANIA R. R.—East—7 a. m.—way mail, 12.15 p. m., 5 p. m., p. m.—6.30 a. m.—way mail, 3.50 p. m., 9 p. m.

NORTHERN CENTRAL R. R.—South—12.15 p. m.—way mail, 9 p. m., 10.30 p. m.

LANCASTER VALLEY R. R.—7.30 a. m.—DAUPHIN AND SUSQ. R. R.—1.30 p. m.—CUMBERLAND VALLEY R. R.—7.30 a. m., 1 p. m.—way mail.

BY STAGE.—7 a. m., to Gettysburg, on Tuesday, Thursday and Saturday, 7 a. m., to Jonestown, on Monday, Wednesday and Friday, 1 p. m., to Lewisberry, on Saturday.

COLLECTION.—The carriers of the PATRIOT AND UNION beg leave to say that they will, as usual, collect their dues this morning.

The Union Prayer Meeting will be held in the Presbyterian Church, on Market Square, this afternoon, at 4 o'clock, as usual.

THE FLAG STAFF.—The flag staff was raised on the north side of the dome of the Capitol yesterday. A full committee superintended its erection.

NEW FLAG.—The operatives at the cotton mill have raised a flag, by contribution, which will be run up on the cupola of the mill on the 22d.

COMING.—The Van Ties Cornet Band, of Hollidaysburg, we understand intend coming here on the 22d. If so, some of our neighboring bands can look out for their laurels.

A DIMAL DAY.—The forenoon of yesterday was damp, dreary and disagreeable, and terribly trying upon rheumatic subjects. Oh! for a clear, dry spell of weather of about ten days' duration.

THE LOGAN GUARDS are coming to Harrisburg on the 22d to participate in the ceremonies on the occasion of elevating a large national flag on the dome of the Capitol. This is the party whom our neighbor of the Telegraph called a "one-horse soldier company."

THE LOCK-UP.—Although we have had neither time nor inclination to attend to the police cases we may mention incidentally that during the week the lock-up has been liberally patronized—an average of nearly half a dozen lodging there each night.

A REMARKABLE CHILD.—The Shamokin Register of the 7th inst. states that there is an infant in that borough "about one week old, with a double head, one facing in front and the other backward, the latter one is the largest, but not perfect, and destitute of the organs of sense. The child appears healthy and takes refreshment from its mother."

FINE PORTRAITS.—In the North committee room yesterday noticed portraits of Speaker Davis, Dr. Hill and Mr. Eisenberger. They are exceedingly life-like, and as portraits, as well as pictures, are equal to any works of art we have ever seen. They are from the pencil of Mr. Natchtrieb, a young and very promising artist, who must soon win his way to public favor.

THE HARMONIA SOCIETY having accepted the invitation of the Young Men's Christian Association to furnish the music on the anniversary occasion, on Tuesday evening next, will meet for the purpose of preparing therefor, in the Presbyterian Church, Market Square, on Monday evening next, at seven o'clock precisely. The conductor especially desires a full and punctual attendance. Active members, nota bene.

THE HIGH SCHOOL COMMENCEMENT.—Concert Hall was the great center of attraction to-day for schoolmeets, and the rush of fair dames to see academic honors conferred upon the youthful sons of the People's College, was something formidable. The ladies looked beautiful as usual, and those of them who had masculine escorts, seemed proud and happy when their gallants wore the elegant garments made at the Brown Stone Clothing Hall of Rockhill & Wilson, Nos. 603 and 605 Chesnut street, above Sixth, Philadelphia.

BADLY FROZEN.—Two men, whose names we did not learn, says the Clarifier Republican, left this place on Thursday last about noon to walk to St. Mary's. The day was excessively cold, and after going some distance beyond John Shaw's, Sr., on the old Sinnemahoning road, were obliged to return to Mr. Shaw's, who brought them back to the Paradise House, in Lawrence township. Their limbs were badly frozen, and they are now lying at Mr. Ogden's in a critical condition. One of them is from Harrisburg, and the other from Philadelphia.

DELEGATE ELECTIONS.—The Democratic citizens of the city will meet at their respective places for holding the primary elections, THIS EVENING, February 16th, at 7 o'clock, for the purpose of electing two delegates from each ward, to represent them in the County Convention, on Monday next, the 18th.

First ward at C. J. Janes'. Second ward at Daniel Wagner's. Third ward at M. Gross'. Fourth ward at J. W. Morgan's. Fifth ward at Raymond's Hotel. Sixth ward at Stigmol's Hotel.

A LOSE SENTENCE.—Ira Shotwell alias Ira Davie, who, with Logue, was convicted of murder in Clarion county, was committed to the Western Penitentiary on Wednesday evening. Shotwell was convicted of murder in the second degree and also of robbery. On the murder charge he was sentenced to eleven and a half years, and on the robbery, five years, making sixteen years and a half in all. Shotwell is only twenty-two years of age. Logue was convicted of murder in the first degree, and sentenced to be hanged. His case was appealed to the Supreme Court for a new trial, and has not yet been decided.

LOOK OUT FOR PICKPOCKETS.—We take this early opportunity to call the attention of all who intend visiting this city next week, either for the purpose of attending the Democratic State Convention or the flag raising, to the fact that a large number of expert pickpockets have made their arrangements for a professional visit on these occasions. We want to impress it upon the mind of every one who comes here, that it is not good policy to bring much money with them, and least of all, pocket-books filled with valuable papers. But if it is necessary to bring such articles along, no man should venture into a crowd with them, as the experience of some of the old city "knucks" passeth comprehension. At all of our hotels there are safes where anything valuable may be left.

We hope that our friends of the country press throughout the State will call the attention of their readers to this caution.

A NEW STEAM ENGINE.—The Providence Press

speaks in high terms of a new steam engine, the invention of Stephen Wilson, of Rhode Island, which it describes as follows: "Without describing it accurately, we may say that the engine presents to view an iron box, four feet long, two and a half feet wide, and two and a quarter feet deep, having a furnace near one end. On its top, side by side, appear two cylinders, which contain pistons, connected with rods and cranks, with a shaft carrying a flywheel, and supported at either extremity by an arch, firmly attached to the box. The cylinder, which is directly over the fire, supplies the heated air to the other cylinder, in which is the piston, whose upward movement turns the shaft. An eccentric works a valve, which admits the air to be heated, and suffers it to escape after it has parted with some of its caloric by its passage through a quantity of thin corrugated iron plates, termed a regenerator, by passing through which the newly-admitted air becomes partially heated before entering the supply cylinder. The cylinder is eighteen inches in diameter, and the length of stroke eight inches. Ordinarily, the shaft makes about one hundred and thirty revolutions per minute. A simple apparatus checks or stops the engine at pleasure, and it is started by giving the wheel a turn with the hand. Less than an hour is occupied in heating up, and the engine will actually continue in motion, with a light load, for half that time, after every vestige of fire is removed! Any one who can manage an ordinary coal-stove, and oil a grindstone, is competent to be the engineer. The amount of fuel consumed is about the same as is required for a stove, and when it is desired to warm the room, the engine does that, and then costs absolutely nothing for fuel. An explosion is an impossibility, not a drop of water being used, and the risk of fire is not increased in the slightest degree. Are we not justified in extolling such a machine?"

THE HONORS OF CIVIL WAR.—Those who are investing in epaulettes and swords, and for the sport they expect from a civil war, or are sparing no pains or effort in getting one up, will find, should they unhappily efforts be crowned with success, that civil war abounds more in horrors than in pastimes, and that blood and misery rather than pleasure and profit are its horrible fruits. Let them pause and calmly reflect upon the miseries in which they are endeavoring to plunge themselves and the thirty-one millions of their countrymen—men, women and children. Did they ever read the histories of civil wars and note their horrors? Let them take for instance the French Revolution and ponder its results before they follow in its wake. The following extract will give them a glimpse into our future, should their policy be carried out:

As a warning to the American people at this time, they should read the history of the French Revolution, and contemplate its horrible results.

The extent to which blood was shed during its continuance will hardly be credited by the present age, but it is correctly stated that the number of victims reached one million twenty-two thousand, three hundred and fifty-one. Of this number eighteen thousand six hundred and three were guillotined by the order of the Revolutionary Tribunal; thirty-two thousand were victims under Carrier at Nantes; thirty-two thousand at Lyons; three thousand four hundred women died of premature child-birth; three hundred and forty-eight in child-birth from grief; and there were slain, during the war in La Vendee, nine hundred thousand men, fifteen thousand women, and twenty-two thousand children. In this enumeration are not comprehended the massacre at Versailles, at the Abbey, the Carmes and other prisons, on the 2d of September; the victims shot at Toulon and Marseilles, or the persons slain in the little town of Bedoin, of which the whole population perished.

MAN FROZEN TO DEATH.—Joseph R. Brillinger, of Juniata county, was frozen to death on Thursday afternoon, on the tow-path of the canal, in the narrows, about two miles from Lewistown, under circumstances of an almost unfaithful character. From the testimony elicited at the coroner's investigation, it appears that the deceased had started from Middletown with a Mr. Rupert, in a wagon, with the intention of seeking employment in Middletown. When within three miles from Lewistown, Rupert's hat blew off, and Brillinger alighted from the wagon to recover it, Rupert driving on to the residence of Jos. Woods, where he obtained a covering for his head, and then proceeded to Lewistown. Subsequently, Brillinger arrived at Woods', wet and cold, having by some mishap got into the canal, and after drying and warming himself started for Lewistown. An hour or more elapsed, and Mrs. Woods' attention was attracted by the cries of a man for help, and discovered Brillinger prostrate on the opposite side of the canal; and but a short distance from the house, his clothing wet and frozen to the ground, and he himself barely able to beg for relief. In this condition, he was reached by Mr. Quay and a son of George W. Hess, who finally succeeded in removing him to Woods' house, where he soon breathed his last at about 5 o'clock in the evening. He was a robust man of about 28 years of age, and apparently of foreign birth. In his pockets were found about \$40. His remains were interred in the poor house burying ground.

METALLIC SAND.—It appears, by an account published in the Australian papers, that a metallic sand of peculiar value is found along the shores of New Plymouth, in Taranaki. This sand has the appearance of fine steel filings, and if a magnet be dropped upon it and taken up again, the instrument is found to be thickly coated with the iron granules. It has been carefully analyzed by English metallurgists, and has been pronounced to be the purest ore at present known; it contains 88.45 of peroxide of iron, 11.48 of oxide of titanium, with silica, and only twelve of waste, in one hundred parts. Taking the sand as it lies on the beach, and smelting it, the product is sixty-one per cent of iron of the very finest quality. And again, if this sand be subjected to the cementation process, the result is a tough, first class steel, which, in its properties, seems to surpass any other description of that metal at present known.

The investigations of metallurgical science have found that if titanium is mixed with iron, the character of the steel is materially improved; but titanium being a scarce ore, such a mixture is too expensive for ordinary purposes. Here, however, nature supplies all this. The fineness of this beautiful sand is so great that it passes readily through an azure sieve of nearly five thousand holes or interstices to the square inch. A series of tests have been made in regard to the temper and other qualities of the steel produced from this sand, with the best results. An official experiment is expected to be made at one of the government establishments shortly.

MITCHELL'S NEW GENERAL ATLAS.—Says the Principal of one of our best seminaries: "I have examined Mitchell's New General Atlas, and find it to be decidedly the best work of the kind that I have ever seen. As a map view of the world, it seems to leave nothing to be desired. The statistical tables, and the plans of the principal cities, are evidently prepared with much care and accuracy, and add greatly to its worth. The enlarged maps of the several States, showing the county boundaries—and, also, of all the countries to which any special interest attaches, add immensely to its value. The topographical execution of the work is beyond all praise, and it is indeed a splendid illustration of the progress of art in that direction. Every teacher should have a copy, for reference, in his school. It should be in every library and reading room—and no family that can afford the expense should be without it."

THE RIGHT MAN IN THE RIGHT PLACE.—A husband at home in the evening.—Exchange.

We find the above floating about loose, and cannot trace its paternity, but we'll bet, say—a new bonnet, that it was written by our wife, who never could appreciate the business that kept us out after 10 o'clock. Meeting friends—seeing of acquaintances in late trains, sitting up with sick men, attending political meetings, or late sessions of the "Lodge," are all so many fabrications. She will insist that people are out after no good after the clock has struck 11.

VISIT OF THE PRESIDENT.—Yesterday, in the Senate, Mr. Finney read a letter from Mr. Lincoln, accepting the invitation to visit Harrisburg. The letter is dated at Springfield, on the 8th, and left the fixing of the time to future events. The committee which visited Pittsburg on Thursday have no doubt completed the arrangements by fixing on the 22d, which the President can easily comply with, without interfering with any other arrangements previously made. The crowd will in all human probability be the largest ever assembled in this city.

DEAD MAN FOUND.—Whist Frederick Ervine and James Robinson were out duck-hunting, in the neighborhood of Silverwood's Island, in the river, opposite Sellingsgrove, a few days ago, they discovered a dead man in the river. They drew him about half-way out of the water and fastened him to a tree, after which they went and gave notice to the proper authorities of Northumberland county, who took the body to Northumberland and interred it. It was identified as the watchman who fell from the railroad bridge at Northumberland, on the evening previous to the last Presidential election.

VALUE OF THE SOUTH TO THE UNION.—The value of American exports last year was \$316,820,610. Of this amount articles grown and manufactured in the North alone amounted to \$5,981,431; articles common to both North and South, such as grain, sugar, &c., amounted to \$95,826,299; while articles grown in the South, and which are not as Northern products, amounted to \$214,322,880! Of the articles which are set down as common to both sections, it is conceded that at least one-third came from the South; and assuming this to be correct, we find that last year the South exported products to the value of \$279,873,746. In other words, after supplying the home market, the North was only able to sell products worth \$37,346,864, while the South after supplying the home market was able to sell products worth \$279,873,746!—or nearly eight times as much as the North!—These are simple facts, easily understood by all except those whose minds are in their dotage, and fully dispose of the fallacious idea that the South is poverty-stricken.

SUBSTITUTE FOR RIFLED CANNONS.—A method has been invented of dispensing with rifled cannons, and at the same time securing long range, and unerring accuracy of flight. The particulars given of this invention are as follows:—"First, the breech is bored, say one-eighth of an inch larger than the bore of the gun, the projectile, which is elongated, being constructed to fit the breech. Second, the projectile is coated with a soft metal, with a hole through the center from end to end. Third, immediately when the projectile enters the gun it meets with a shoulder which takes off a shaving, thus moulding it to the exact size of the bore, thereby precluding all windage. Fourth, on the projectile leaving the gun, the air forces out the "bovel" plug at the back; the air then, having a free passage through the projectile, prevents the possibility of its diverging either left or right, or turning over; on the contrary, it causes it to travel with astonishing and unerring precision. The sudden expansion of air at the back considerably assists its onward course."

COAL ASHES.—Nothing more annoys the denizens of a city than to get rid of the coal ashes accumulating during the winter. Left upon the sidewalk the dust is blown into everybody's eyes by the high wind, or is upset in the streets to add to the mud usually covering them. Nobody seems to regard this refuse as of any utility. If it were applied to any useful purpose there would be no difficulty in getting rid of it rapidly. Now it is chiefly used to fill hollows and level lands. Experiment has shown, however, that it may be used with advantage for garden walks, where gravel is difficult to obtain. As soon as it is wet it forms a hard crust, like a cement, and on clay soils will tend to keep the walks hard and dry. Well mixed with the clay, it serves to render them less stiff and increases the strength and fertility of the soil. We believe it would be found a very valuable garden dressing also, particularly for fruit. Within our knowledge it has been tried for a number of years upon our English gooseberry bush, which, from bearing small fruit in alternate years, has become a large and flourishing bush, producing fruit every year in profusion. No other attention has been given to this bush than simply mixing the soil around its root with coal ashes. We have even also tried with great advantage to peach trees, the bark of which, just beneath the surface of the earth, had been penetrated by worms. The coal ashes arrested any further injury probably by destroying the worms, and the trees recovered from the partial injury. We have no doubt that there are many uses to which coal ashes may be applied advantageously.

LARGE ARRIVAL OF NEW GOODS.—The Cheaper Goods Offered Yesterday—2,000 yards Canton flannel at 10 cents, worth 12 cents. 2,000 yards bleached 4.4 muslin at 10 cents, worth 12 cents. 100 lbs beautiful new style print at 10 cents, worth 12 cents. 50 lbs print at 7 and 8 cents, worth 12 cents, warranted fast color. 1,500 yards of unbleached muslin at 10 cents, the best ever made for the price. 1,000 undershirts and drawers at 50, 62 and 75 cents. Socks and ladies stockings a large variety. Our whole stock of winter goods, such as Shawls, De Laines, Pant Stuff, Cloth and all kinds of Flannels I will sell off at cost. Now is the time to get bargains. S. LEWY, at Rhoad's old corner. jan-27.

SPECIAL NOTICES.

We call the attention of our readers to an article advertised in another column, called BLOOD FOOD. It is an entirely new discovery, and must not be confounded with any of the numerous patent medicines of the day. IT IS FOOD FOR THE BLOOD, already prepared for absorption; pleasant to the taste and natural in action, and what one gains he retains. Let those who are suffering from poverty, impurity or deficiency of blood, and consequently with some chronic disease or ailment, take of this BLOOD FOOD and be restored to health. We notice that our druggists have received a supply of this article, and also of the world-renowned Dr. EATON'S INFANTINE CORDIAL, which every mother should have. It contains no paragonic or opiate of any kind whatsoever, and of course must be invaluable for all infantile complaints. It will allay all pain, and soften the gums in process of teething, and at the same time regulate the bowels. Let all mothers and nurses, who have endured anxious days and sleepless nights, procure a supply and be at once relieved. See advertisement. aul-7-dk-wm

NATURAL MAGIC!

Suppose a case. Suppose you have sandy, red, white, gray, or flaxing yellow hair. Suppose you prefer a light brown, a rich dark brown, or a raven black. Well, you apply (if you are wise) EXCELLENCE! OR HAIR DYE! and in a few minutes your mirror shows you a WONDERFUL TRANSFORMATION! Every hair that a few moments before was an unsightly flaxing color, is now a rich, dark brown, or a raven black. It is the explanation whenever you uncover. The difference between AND THE BEAST was not more striking than that between a gray or red hair in a state of nature, and one to which this CHAMELEON has been applied. Manufactured by J. CRISTADORO, 6 Astor House, New York. Sold everywhere, and applied by all Hair Dressers. jan-27.

THE GREAT ENGLISH REMEDY.—Sir James Clark's celebrated Remedy, prepared from a prescription of Sir J. Clark, M. D., Physician Extraordinary to the Queen. This valuable medicine is infallible in the cure of all those painful and dangerous diseases which the female constitution is subject. It moderates all excess and removes all obstructions, and a speedy cure may be relied on. It is peculiarly suited. It will in a short time bring on the monthly period with regularity.
Each Bottle of One Shilling. Beware the Generic Stamp of Great Britain, to prevent counterfeit.
THOSE PILLS SHOULD NOT BE TAKEN BY FEMALES DURING THE FIRST THREE MONTHS OF PREGNANCY, OR BY FEMALES WHO ARE NURSING, OR AT ANY OTHER TIME THAN AFTER MENSTRUATION.
In cases of Nervous and Spinal Affections, Pain in the Back and Light Fatigue, these Pills will effect a cure when all other means have failed, and although a powerful remedy, it does not excite the system, or act in any manner hurtful to the constitution.
Full directions in the pamphlet around each package, which should be carefully preserved.
N. B.—\$1.00 and 6 postage stamps enclosed to any authorized Agent, will insure a bottle, containing over 50 Pills, which should be carefully preserved.
For sale by C. A. BANNVART, Harrisburg. 37-47.

IMPORTANT TO FEMALES DR. CHEESEMAN'S PILLS.

The constitutions of females are the most delicate and the result of a long and expensive practice. They are said in their operation, and certain in correcting all irregularities of the system, removing all obstructions, restoring the system to its natural condition, and in the side, palpitation of the heart, whites, all nervous, hysterical, fatigues, pains in the back and limbs, &c., disturbed sleep, which arise from interruption of nature.
DR. CHEESEMAN'S PILLS were the commencement of a new era in the treatment of those irregularities and disorders which have long afflicted so many thousands of the young, the beautiful, the beloved, and the persecuted female. No female can enjoy perfect health unless she has these Pills in her system. An obstruction takes place the general health begins to decline.
DR. CHEESEMAN'S PILLS are the most effectual remedy ever known for all complaints peculiar to Females. To all climates they are indicated, including, with certainty, periodical irregularity. They are the only pills that can be taken in all climates, at all periods, throughout the country, having the sanction of some of the most eminent Physicians in America.
Explicit directions, stating when, and when they should not be used, accompany each box.—The Price One Dollar per Box. Beware of cheap imitations.
A valuable Pamphlet, to be had free, of the Agents, Pills sent by mail, promptly, by enclosing price to the General Agents.
H. B. BUCKINGHAM, General Agent, 14 Broadway, New York. Sold in Harrisburg by C. A. BANNVART. dec4-76-dk-wm

MAILED

HOW LOST, HOW RESTORED.
Newly Published, in a Sealed Envelope, ON THE NATURE, TREATMENT AND RADICAL CURE OF SPERMATORRHOEA, or Seminal Weakness, Sexual Debility, Nervousness and Involuntary Emissions, including Gonorrhoea, and all the attendant and radical Cures. BY ROB. J. CULVERWELL, M. D. Author of the "Green Book," &c.
The world renowned author, in this admirable Lecture, clearly proves from his own experience that the awful consequences of Self-abuse may be effectually removed without medicine and without dangerous surgical operations, bleedings, injections, &c., and that a radical, permanent cure can be effected, by which every sufferer, no matter what his condition may be, may secure himself a happy, healthy and useful future. This Lecture will prove a boon to thousands and thousands. Sent under seal to any address, post paid, on the receipt of two postage stamps, by addressing Dr. CHAS. J. C. KLINE, 127 Bowery New York, East Box 4,898. ap16-dk-wm

Sewing Machines.

NOW WITHIN REACH OF ALL! GROVER & BAKER'S CELEBRATED NOISELESS SEWING MACHINES! 495 BROADWAY, NEW YORK.

The public attention is respectfully requested to the following cards of ELLIS HOWE, JR., and the GROVER & BAKER S. M. CO.:
ACARD FROM THE GROVER & BAKER S. M. CO.
Our Patents being now established by the Courts, we are enabled to furnish the GROVER & BAKER Machine, with important improvements, at greatly REDUCED PRICES!
The moderate price at which Machines, making the GROVER & BAKER stitch, can now be had, brings them within the reach of all, and renders the use of Machines making inferior stitches unnecessary as it is unwise. Persons desiring the best Machines, and the right to use them, must not only be sure to buy Machines making the GROVER & BAKER stitch, but also that such Machines are made and stamped under our patents and those of ELIAS HOWE, JR. GROVER & BAKER S. M. CO. 495 Broadway, New York.

A CARD FROM ELIAS HOWE, JR.
All persons are cautioned not to make, deal in, or use any Sewing Machines which sew from two spools and make the stitch known as the GROVER & BAKER stitch, unless the same are purchased from the GROVER & BAKER Sewing Machine Company, or their Agents, or Licensees, and stamped under my patent of September 10, 1846.
Said Company, and their Licensees, alone, are legally authorized under their own patents, and my said patent, during the extended term thereof, to make and sell this kind of Sewing Machine, and all others are piracies upon my said patent, and will be dealt with accordingly, wherever found. ELIAS HOWE, JR. NEW YORK.
