REVOLT OF CONVICTS. -On Monday, 11th ult. the convicts in the Chatham prison, (England,) numbering eleven hundred men, succeeded in overpowering their keepers, and for the space of a few hours held undisturbed sway of the prison. Upon being ordered to return to work after dinner, a gang of about fifty turned upon their keepers in the yard, whom they soon overpowered and drove before them. Other gangs of convicts then joined the mutineers, and the keepers on duty, to the number of about one hundred and fifty, were driven out of the prison by the infuriated convicts. The prisoners in the cells were then liberated, and a scene of the utmost confusion ensued. After gaining their liberty, the convicts immediately commenced a wholesale work of destruction in the interior of the prison. A large number of them rushed into the office of Captain Powell where they commenced destroying the books and papers, and every other available article on which they could lay their hands—desks, tables, chairs, and everything which could be broken up being quickly destroyed. They then endeavored to set the prison on fire, and the building was actually fired in two or three places, from which the flames began to pour forth, but were extinguished from the outside. Information of the revolt was sent to the garrison, and one thousand troops were soon on the ground. The convicts were driven into their cells at the point of the bayonet, and order once more restored. The next day punishment was ordered on about ninety of the mutineers.

DISCOVERY OF A NEW SUBSTANCE IN THE ATMOSPHERE.-A writer in the National Intelligencer states that the theory of Mr. Clemson, head of the agricultural department of the Patent Office, of living organisms in the atmosphere, which he made public in 1859, has been adopted by a French chemist, named Barral, and announced to the French Academy, Mr. Clemson's theory is that the air, like water. teems with minute living organisms; that there is phosphoric acid in the air, derived from the successive generation after generation of myiads of these organisms produced, living and dying in the atmosphere; that such organisms exist and are at work, assimilating from one to another, preparing food for more perfect organisms, from the microscopic point of life up to the most perfect animal existence. It is expected that this discovery will explain why the earth is increased in fertility by being broken up and exposed to the air. It contains meteorology with agriculture, and will, when fully developed, open a new page to the learned of the relation of the spots on the sun, the degree of fertility of the earth, and electrical changes of the atmosphere and magnetical condition of the earth.

No Communion with Slaveholders .- Harper's Weekly contains a cutting carricature upon Beecher. There is a picture of the sanctuary, the brethren at prayer, Beecher at the table with cup in hand to administer the sacrament. Washington is kneeling and reaches out his hand for the cup while Beecher turns from him and bids him begone, and old John Brown stands behind with lance in hand pointing to a motto "The Higher Law-no communion with slaveholders." The brethren and sisters hang their heads with shame as Washington, upon his knees at the altar, with one hand upon his heart and the other reaching forth to the pastor, is denied the privilege of touching his lips to the cup which even the negro is not refused if he be a Christian.

Mr. Beecher was in Dewey's News Room last evening, and his attention was called to this picture. He looked at it for some timelong enough to comprehend its full purpose and meaning and then laid it down, saying "that is hard."—Rochester Union.

INCREASE OF THE FRENCH ARMY TO A MILLION Man.—The long threatened ministerial decree by which the French army is to be raised to the efficient but not numerical strength of 1,000,000 has appeared. The French army is annually recruited by 100,000 men, who serve for seven years. All of these 100,000 recruits, obtained by the lottery conscriptions, are not drafted into the army; but only as many as may be required to fill the vacancies arising from the discharge of men whose term of service has expired, of invalids, and by death. The remainder, "the reserve," have heretofore, even during the Crimean and Italian wars, been allowed to remain at home. Hereafter, "the reserve" is to be called into active service, that is, to be drilled and barracked for three months the first year of their service, two months the second year of their service, one month the third year of their service, and "quarterly" every remaining year of their

COAL BRANDY. - Among the inventions of later years, the existence of which is not generally known as it might be, is coal brandy. A weekly paper states that, owing to the mouldand rotting of the grape French brandy-makers have adopted bituminous coals a substi-tute. They distil potent spirit from this sub-stance, which is thus made available for the production of two kinds of fire—one for the comfort of man and the other for the destruction of his health. Large quantities of alcohol distilled from coal, and "doctored" with certain chemicals to give it the "Cognac flavor." are now exported from France to England.

Coal brandy is the latest adaptation of the good gift of Providence to the purpose of poi
at Manufacturer's prices.

ALL IN BOTTLES.

I beg leave to call the attention of the citizens of the ported by Undless of the ported by Undless of the ported by Undless of this country for the purity is familiar in every part of this country for the purity of his celebrated Schiedam Schapes. Mr. Wolfe, in his letter to me, speaking of the purity of his Wings and Liquors, says: "I will stake my reputation as a merchant of thirty years' residence in the City of New York, that all the Brandy and Wings which I bottle are pure as imported, and of the best quality, and can be relied upon by every purchaser." Every bottle has the proprietor's name on the wax, and a fac simile of his signature on the certificate. The public are respectfully invited to call and examine for themselves. For sale at Retail by all Apothecaries and Grocers in Philadelphia.

GEORGE H. ASHTON,

No. 832 Market street, Philadelphia.

Read the following from the New York Courier:

Enormous Business for one New York Courier:

Enormous Business for one New York Courier.

Enormous Business for one New York Courier, and country merchant, can go and purchase pure Wines and Liquors, as pure as imported, and of the best quality. We do not intend to give an elaborate description of this merchant's extensive business, although it will well repay any stranger or citizen to visit Ubolpho Wolf's and Nos. 17, 19 and 21, Marketfield street. His stock of Schnapps and And ready for shipment could not have been less than thirty thousand cases; the Brandy, Some ten thousand cases—Vintages of 1836 to 1856; and ten thousand cases of Madeirs, Sherry and Port Wines, Scotch and Irish Whisky, Jamaica and St. Croix Rum, Scotch and Irish Whisky, Jamaica and St. Croix Rum, Some very old and equal to any in this country. He slow one hundred and eighty thousand dozen, and we hope in less than two years he may be equally successf with his Brandies and Wines

shelves, and replace it with Wolff, and Eliquors.

We understand Mr. Wolff, for the accommodation of small dealers in the country, puts up assorted cases of Wines and Liquors. Such a man, and such a merchant, should be sustained against his tens of thousands of opponents in the United States, who sell nothing but imitations, ruinous alike to human health and happiness.

For sale by C. K. KELLER, Druggist, tole agent for Harrisburg.

DURIFY THE BLOOD!

MOFFAT'S **VEGETABLE LIFE PILLS** PHENIX BITTERS.
