

AGRICULTURE.

MANURE TOP-DRESSING, &c.

Manure in the form of compost, consisting of a mixture either with a copious amount of straw, turf or peat, should by all means be applied early in the spring...

Advantages of top-dressing wheat about the time of sowing. There is no question that in most cases this is the best way of manuring the crop at the North.

In preparing manure for another year, an abundant supply of absorbent is important. These must vary with circumstances...

Every care should therefore be taken to be it well dried. It should be dug out of the swamps, if practicable, in summer...

Farmers who have manure on hand to dispose of should apply it in the present state, should immediately form compost heaps...

In reply to a correspondent, who desired to have the question 'set at rest' whether plaster is advantageous only to one crop...

We scarcely feel ourselves competent to set at rest the question which our correspondent has proposed.

It is particularly well adapted for TRAVELERS, by land or sea, who can thus avoid the inconveniences of a comfortable meal, to which they are liable.
