Arrival of the Europa.

ENGLAND.-The excitement created in Europe by the reports of the boundless riches found in California had somewhat subsided, when the news by the last packet once more aroused the spirit of enterprise, and the newspapers again teemed with no-tices of all kinds of shipping adventurers in connection with this auriferous region.

It is no longer an El Dorado, but a veritable terra d'oro, the confirmed statements of mineral wealth in the California hills now leaving no doubt but that an immense tide of emigration will now float towards that

quarter. FRANCE.-There is very little news from the continent of importance or general interest, except as it regards France. Immediately after the sailing of the Niagara, intelligence was received in England, that the breach between the Assembly and the President had widened into a very fearful

A real or sham plot was disclosed to the French Ministry, and for a few days Paris again assumed the appearance of a beleaguered city. The streets were occupied by not fewer than 80,000 men; and General Changarnier plainly intimated that the first barricade that was yet attempted to be raised, would be the signal for a general slaughter.

Whether the Red Republicans were surprised or unprepared to cope with the extensive military arrangements concertedcertain it is that Paris for a few days trembled on the verge of a new revolution; the issue of which can scarcely be doubted, as Marshal Bugeaud was despatched from Paris to bring up a strong division of the Army of the Alps ostensibly to command Bourges during the State trials, but with no less object than that of overawing the Red Republicans in Paris.
The differences between the Guard Mo-

bile and the Army of the Line only added fuel to the flame which hourly grew in intensity. The motion for getting rid of the propositions of M. Ratesu to dissolve the National Assembly, was only defeated by a marrow majority of 416 over 405.

Since that vote a greater tranquility has prevailed, and once more we have to announce that the struggle passed off without mortal strife. Numerous arrests were how-·ever made.

In the National Assembly, on the 26th ult., the Minister of the Interior announced that he had been directed by the President of the Republic to present a bill against

The Assembly had already enacted severe penalties with the view to repress excesses and remove dangers so alarming to society. Government had ordered a number of clubs to be closed in the capital and the departments, and denounced the offenders to the tribunals.

and no free government could allow such an anomaly to exist without endangering its

COMMERCIAL.—The trade has been steady since the first, and any change that has taken place in Breadstuffs during that time has been upward.

The market is now somewhat duller and languid. American flour is quoted at 26s. to 27s. for Western Canal; 26s. to 27s. for Philadelphia, Baltimore, New Orleans and Ohio 27s. 6d. to 28s. 6d. American and Canadian White Wheat is now sold at 7s. 3d. to 7s. 6d. per 70 lbs. and Red 6s.

Indian Corn has latterly declined and prices have receded. Present prices are 30s. to 31s. for white, and 31s. 6d. to 32s.

Property of-Married Women.

A bill has been introduced in the House of Delegates of Virginia, which is entitled "a bill to protect the property of married women." Though it enables women, who may hereafter marry, to relain the whole benefit of their property separate from the husband, and subsequently receive in their own right property from others than their husband, yet the rents, &c., for any one year shall be liable for contracts made by her husband within that year in the purchase of articles for the use of his family. To secure the benefits of this act, the woman must cause an accurate inventory of her estate to be recorded in the county or corporation court where she resides within eight months after her marriage, or eight months after coming in possession of any gift, &c. Clerk of the court to publish a description of such inventories. The woman is not authorized by the act to make sale of any of her estate, but the county, corporation of superior courts, upon the joint petition of herself and her husband, may order the sale of any portion of her estate, and direct the proceeds to be loaned out or invested for her sole and separate use. The bill farther provides, that in case the husband survives the wife, she leaving issue, he shall have a life estate in all her property; and in case she dies without issue, he shall have a full title forever to all her personal property.

Political State of Canada.

The Toronto Globe gives a series of tabular statements respecting the political state of Canada, from which we gather the follow-

In Upper Canada, twenty-three constituencies have returned Liberal members to the present Parliament. The aggregate number of their inhabitants is 483,929. The remaining eighteen constituencies have returned 19 Tory members-while their aggregate population is only 238,058. Two to one of the inhabitants of this Province have returned Liberal members. The average number represented by each member is 17,218. The average number represented by each reform member is 22,015; while the average of representation of each Tory member is \$2,560.

In Lower Canada, according to the estimate of the population for 1848, each of the 42 members represents 18,263. Of these, 35 members have been returned on the Liberal and 7 on the Tory interest. The Liberals represent a population of 705,265, and the Tory only 73,058.

The aggregate number of Liberal Constiuencies number 313,417-of which 218,-658 are in Upper Canada, and 73,058 in

Lower Canada. The census according to ages makes the population of Upper Canada 735,879. No census having been taken in Lower Canada since 1844, an approximating series of calculations was necessarily instituted, which gave a result of 768,434 inhabitants—the ncrease being taken at 79,552 over 1847.

A New thing in Mechanics.

Mr. Joseph Harris, Jr., of this city, has nvented and patented abox and axle which require no oil, and yet almost completely escapes that destroying angel of machinery, friction. At least, so we cannot but hope, from seeing a working, which we under-stand from Mr. Harris has been put in a lathe and turned 1000 revolutions in a minute, a motion which, with a common sized railroad truck-wheel, would carry it about two miles a minute, or 120 miles an hour, without producing any perceptible heat, and without the use of a particle of oil. The mechanism by which a result so desirable and astonishing is effected, is somewhat after the manner of that discovered by the prophet Ezekiel in his vision, "a wheel in the middle of a wheel, or rather six wheels in the middle of one. The box is about five inches in diamater, and the axle three inches, and in the space between them are disposed, at equal distances, six anti-friction rollers, which are kept in their places by teeth at both their ends, playing into corresponding circles of teeth in both the box and axle. There is no bearing upon these teeth, which are cut to the anti-friction curve. The bearing is entirely upon the smooth portion of the rollers between the teeth .--The only service of the teeth is to prevent the possibility of the rollers getting out of

General Taylor.

place .- Boston Chronotype.

Among the incidents connected with General Taylor, on his route to Washington, is

the following: An old farmer and soldier who had come forty miles to meet him, made his way through the crowd and seized him by the hand, saying, "General, I have voted nine times for President, but never gave any vote with as hearty good-will as the vote I gave of things." "I belong to the old school,"

Free Newspaper Circulation.

Senator Allen, of Ohio, made a speech the other day in favor of this measure, now before Congress. The proposition is, that newspapers should be circulated free within a circle of sixty miles from their place of circulation.—The Senator entered into a discussion as to the operation of such a provision, and estimated the number of news- and that precept were obeyed, our government papers in the United States at 2,400, but in might extend over the whole continent. order to keep within bounds, put it at about Accept, sir, my sincere thanks for the kind 2.000 :--

2,000, I assume the circulation of the whole ladies for their beautiful gift-I pray that health, to be once a week-none of them are less, peace and prosperity may long be continued to and many of them are daily-and I assume them. the number of the copies issued by each to be 1.000, on an everage. There are then circulated in the United States 2,000 newspapers, each circulating 1,000 copies, making in all a weekly circulation of two millions of newspapers circulated in the United States. But all of these papers do not circulate through the mails; many of them are distributed in the towns and cities where they are printed.

able proportion of those that do go through the mail, and those that do not. I have of old age, George Weiss, aged 83 years. supposed that three fourths of the whole number do go through the mails, and are transported to some point from the point of publication-that is to say, 1,500,000 newspapers-and I have also supposed what would be the proportion between the number circulated within and the number circulated without this circle of sixty miles."

The conclusion, at which he arrives, is

thus expressed: "I do not look on this as a boon to be extended by the government. You will observe, Mr. Joseph Klader, aged 62 years. from the nature of this proposition, that it applies in such a manner as to affect distant localities in the interior of the country, and that it is exactly within those localities that the mails of the United States are transported on public roads not made by the federal not satisfied on or before the first day of The people of each neighborhood make upon the administrators render this course their roads, and from year to year they repair them. The people of the counties bridge their own streams, and from year to C. M. RUNK, Administrators. year repair them, and your mail goes over | Jan. 25. them free of charge. Your mail pays no toll to keep them in repair. The local population of each vicinity, who are to be ben-efitted by this poor little reduction of the tax on the privileges of reading, therefore have right which you have of passing free over roads which they have to make and keep in Heffly, Lydin Hoffert, Auron Kichline, Jonarepair, and on the making and repairing of which you spend not a farthing.

MARRIED.

Mr. William Neithard, to Miss Carolina Franklin Stettler, Sarah Wagner. Hartman, both of Allentown,

Bible Presentation to Gen Taylor. At the Presbyterian Ladies' Fair at Frankfort, Ky., on the 14th inst., Gen. Taylor being present by invitation, was presented with a magnificent copy of the Bible, and the Constitution of the

United States in the same volume. Rev. Mr. Robinson, on presenting the volume nade the following remarks:

Gen. Taylor :- I am requested by the ladies of ny charge, to present to you this noble specimen of American art-a volume containing the Bible and the Constitution of the United States. It is intended as a slight token of their reverence for a man in whose life they trace many resemblances to the Heroes of Sacred History, whom God called, unwilling, from modest privacy, to unsought honors, and to be a nation's benefactor. It is a token, also, of their affection for the Chiestain who led their sons and brothers to

the field of glory. They are willing to confess, sir, that the taste which selected such a token for a public man, may savor a little of the Puritanism of their great ancestry; yet they are sure, that in many aspects, this is a gift, not more appropriate to be given by them, than to be received by one who holds your position before the world.

The Bible and the Constitution! It is our Religion and our politics, and, therefore, a fit offering, from American people, to an elect American President. What nobler gift to a Statesman, than the Constitution of Heaven and the Constitution of the greatest nation which Heav-

en has put upon the earth. The Bible and the Constitution! It is no incongruous union. It is but the Sacred Text with its best political commentary. Had the Bible not been recognized, there could have been no Constitution. It was only minds imbued with the principles of the one, which could have conceived of, and worked out the great problem which is solved in the other.

The Bible and the Constitution! Surch worthy to be the symbol borne before one who is going to take the Chair of Washington, and under a vow to make Washington his model, and the Constitution his only rule of political

Sir, the prayers to Heaven, in your behalf, of those whom I represent, and of all the wise and good in our country, will be fully answered, if controlled by the holy precepts of this Book, and thereby enabled to rule, alike unawed by fear and unallured by flattery, your administration end as auspiciously as it is to begin; and if then, when the toils and honors of life are closing, supported by its Holy consolation, you shall die as peacefully as you have lived gloriously.

To which Gen. Taylor responded :- I accept with gratitude and pleasure your gift of this inyou. I felt that I was voting for an honest estimable volume. It was for the love of the man, who would restore the ancient order truths of this great and good book that our fathers abandoned their native shores, for the wilder- | Carpent, Work & Repairs, 72 .06 said the General, "and I will do my best; ness. Animated by its lofty principles, they but I fear that I cannot meet the expecta- toiled and suffered till the desert blossomed as tions of the people." "You have been in the rose. These same truths sustained them in many tight places," rejoined the country- their resolution to become a free nation. And be reposed whilst clubs were permitted to exist. They formed a state within a state, and no free government applicable. people, and from being but as a stock on the Attending Geo. Ross, borders of this continent, we have spread from the Atlantic to the Pacific. I trust that their principles of liberty may extend, without blood- Taking the hody of John shed, from the Northern to the Southern extremities of the continent.

If there were in that Book nothing but its great precept: "All things whatsoever ye would that men should do unto you, do you even so to them."

manner in which you have discharged this duty, Assuming the number of the papers to be and expressing again my sincerest thanks to the
