

## Latest News from California.

By the arrival at New York of the steamship Empire City, from Chagres, via Kingston, we have files of the Alta California to the 2d of August inclusive. The intelligence by this arrival is of much interest, apart from the mere business of gold gathering, as to which the accounts do not vary essentially from those heretofore received.

From the Palo Alto California, August 2d.

**Pioneer Companies arrived.**—The advance companies of the Rocky Mountain emigration are entering the country by the northern route. A few members of the first party are in this place. A letter from Sacramento City dated July 24th, contains the following intelligence.

"Emigrants from Missouri, over the mountains, are now arriving daily. The first party of packers has been here five or six days, and reports four wagons in Pleasant valley, about 100 miles above, and five or six thousand wagons on the way, and not far behind.

**Gold on Trinity River.**—A party of young men have returned from an exploring expedition through the region intersected by the coast range of mountains, and report having discovered gold on a river emptying into Trinidad Bay, about 500 miles north of San Francisco, and near the boundary line of the Territory. But very little is known respecting this portion of California, although there exists much reason to believe it equally rich in minerals and precious metals.

It is a gold region replete with interest, and the recent discovery of gold will undoubtedly tend to develop its mineral resources. The Kelsey brothers, well known as energetic and experienced explorers and miners, conducted the expedition, and as regards the productiveness of this new portion of the placer, the accounts are highly encouraging. We trust shortly to learn still further of this discovery of gold on Trinity river.

**Large piece of gold.**—We were shown last week, at the store of Messrs. Cross, Hobson & Co., the largest specimen of gold we have yet seen. It is an irregular shaped boulder composed of quartz and gold, and measured 7 inches in length, by an average thickness of 2 1/2 inches, and varies in width from 6 1/2 to 3 inches. About three-fourths of its bulk is quartz, which we should think constitutes one quarter of its weight. The weight of the piece is 14 lbs. and 9 ounces Troy, which, at \$16 the ounce, would give \$2,240 as its intrinsic value, were it all gold. Deducing one quarter for the stone it contains, and its value is \$2,130. The specimen has been purchased of Don Francisco Leon, of Mazatlan, for \$3,500, and it is supposed to be intended for the cabinet of Queen Victoria.

## The End of a Revolution.

A few weeks since we felt called upon to vindicate in our columns the course taken by the citizens of San Francisco, in creating a Legislative Assembly and attempting to establish and put into operation a form of government for the general police of this district. We then narrated its rise and progress. We now record its downfall. By the fiat of the people—those who made it—it has died. The resignations which we published last week, and those which we now give, settle the question beyond doubt.

When the Legislative Assembly became satisfied that the course of Gen. Riley towards them, and the position they had assumed, would tend only to discord, anarchy, violence, and perhaps bloodshed, if each party insisted upon its position, though they had no doubt of the correctness of the principle they had advanced, they were unwilling to use the powers vested by the people in them for the production or perpetuation of civil strife.

They therefore resolved, and wisely, in our opinion to appoint a day when the question should be taken by ballot as to their further continuance in office. Monday, the 9th inst., was the day fixed upon, and the election held on that day showed the following result:

For the Legislative Assembly, - 167  
Against do do - 7

Majority, - - - - - 160

The exhibition on its face would seem to present an overwhelming majority in favor of the government established in February last, but an examination of the facts will prove what has, perhaps, never been proved before, "that figures will lie." When this government was first elected, the highest number of votes polled for any one candidate was 590. Taking this as the actual vote in favor of the government, and at that time there was no opposition to it, shows that 416 voters did not come up to the polls.

If we keep in view also, the fact, that the number of legal voters resident in the town must have increased at least two hundred, we then have the fact, that at least 600 of the resident voters of San Francisco have failed to be at the polls. Now, although by all the ordinary rules of elections, the result shown by the ballot box is the law, yet in this case the public and the Legislative Assembly seemed to have adopted a different construction. The Legislative Assembly, and the government established by it, has therefore ceased to exist.

From the Panama Star, August, 25th.

The Steamer California arrived this morning, 21 days from San Francisco, 51 passengers, and near \$700,000 in gold. Also, the British Steamer Chile, 11 days from Callao, 13 passengers, and \$615,000 in bullion and coin. English barque John Hutchins, arrived Wednesday, 22d, 160 days from Harlefield, England, with coal for American Steamers. American barque Anahuas, from New York, coal and provisions for American Steamers, and 10 passengers for California.

**Wealth in Iowa.**—New discoveries of lead ore have been made about two miles west of Dubuque, Iowa. It is said that there is between 70,000 and 100,000 lbs. of mineral in sight, with a good prospect for more.
