New Mexico--The First Message.

The St. Louis Republican has received from Gov. Calhoun, of New Mexico, a copy of his first message to the Legislature of the Territory of New Mexico, convened at Santa Fe on the 2d of June. It is not a very long document, and is confined to the affairs of the Territory, and to explanations of his course in the organization of the Government. We copy such portions as have a general interest :

The relations between masters and peons should be distinctly defined, and each should understand their respective obligations, and appropriate remedies for a violation of them, upon the part of either, should

Free negroes are regarded as nuisances in every State and Territory in the Union, and where they are tolerated society is most degrated. I trust the Legislature

will pass a law that will prevent their entrance-into this Territory: The disgusting degradation to which society is subjected by their presence, is obvious to all, and demands a prohibitory act of the severest

character. There is landed property of some value, the titles to which are not distinctly affirmed. Even the titles to the Palace and the adja-

in Santa Fe, are questioned by individuals, some contending that the property is legally owned by the United States, and others New Mexico. The liberality of the Clovernment of the United States, if properly appealed to, will, without doubt, relinquish any probable right which that government, any probable right which that government, may be supposed to have in such property

to the Territory of New Mexico. There is certain property in this city; said to be claimed by the Catholic Church, which a few years ago was seized and has . ry Government, which has heretofore controlled in this Territory. It has been suggested that the Territory has a claim to this States. It is perfectly evident that the mil- first of them as a sample : itary Church in this city was designed for ture should not besitate a moment, in re- liberty. storing the Church property here alluded is to, to those who should rightfully enter it power and plunder. The South is the vicfor the purpose of administering the rites of the Catholic Church. This may be accomplished by an act of the Legislature. I further recommend the Legislature to memorialize Congress on this subject, and ask that body to relinquish all clain they may possess to the Catholic Clergy now resident in this Territory. This course, I con-ceive, will be just and proper, and will avoid all linigation, and quiet annoyances that may not be otherwise escaped.

There is not a more difficult problem, arising in this Territory, than that of a propver disposition of our Pueblo friends. What should we do with them! They are here, in our midst, surrounded by a New Mexican population, and rightfully, in my opincion, without authority to mingle in our political affairs. These people, however must richest valley lands in this Territory, and why should they be exempt from paying a just proportion of the taxes which must be raised to support the Territorial Covernment? Concede this point, and another question necessarily arises. They are tax paying residents, but no aliens, and are you prepared to elevate them to full fellow-I cannot recommend such an union. But it is inevitable, they must be slaves people, most occur. This subject is one of of the Southern Confederacy. vast import, and should be well considered, and, if you agree with me, Congress should be memorialized in relation to the position which you may be pleased to assign to them. It is perhaps advisable to pass an act authorizing the extensions of the laws of this Territory over the Pueblo Indians within its borders, postponing their extension to such period as may be necessary to sconsult the Government of the United States. in reference to the policy to be pursued with these Indians. That police should abandon their separate existence as a people, that the laws of the Territory be immeulations as you may prescribe.

There are, doubtless, many old men and widows claiming for service in the war of 1812, to whom the bounty would be acceptable, especially if it escapes the vigilance of mercenaries until Congress gives it an assignable quality; but where is recollection how tardy Congress was in granting St. Louis Times. the boon, miracles ought not now to be expected of the Pension Office in favor of these claimants. No one can justly find fault with the miller's rule, which custom makes the common law of the country for all clases and in all kinds of business.—Republic.

Interesting from New Mexico.

Sr. Louis, June 30, 1850. Papers from Santa Fe to the 30th of May have been received. Much excitement existed in the country in consequence of the rejection, by the United States Senate, of Hugh N. Smith as Secretary of the Territory of New Mexico. A large meeting was held at the Court House to elicit public sentiment on the subject. He was unanimously nominated to the Senate of the Territory, and at the subsequent election was elected.

Three or four thousand Apaches had as- hall township. sembled in the neighborhood of Laenest and San Miguel, making pottery, which they expect to exchange for supplies. Chacon, their chief, visited Santa Fe, and stated that the Camanches were to hold a grand council al Bosque Rodondo, on the Rio Pecos, on the 1st of June, where all the tribes were to be represented.

Governor Calhoun and Colonel Monroe paid a visit to Anton. Chico, where they expected to meet the Apaches on the 15th of May, and furnish supplies ordered for their relief. Lieut, Chapman, and his dragoons were there, but the Indians had not arrived on the 29th of May. The principal chief of the Camanches paid a visit to the place, and had a talk with the Governor and the tribes gathering at Bosque Roundo .--by the Governor. The Camanches Chief | high county, aged 68 years. said, "The Camanches are at peace with all people this side of Chihuahua. We on friendship with the Apaches. The Utahs have not been to see us. Are at peace with Navagator." He promised to return in two months, and bring all the na-

Steaming Around the Globe.

The San Francisco Courier, speaking of the proposed line of steamers from that port to China, says : ;

This link completed, the traveler, leav ing New York, can proceed to Chagres by steam, from thence to San Francisco, to Macoa via the Sandwich Islands, Gaum and Manilla-thence to Suez via Singapore. Penang, Ceylon and Aden-thence to Cairo and Alexandria, to Southampton via Malta and Gibralter, and from thence by steam again to New York. The only break in steam navigation will be in crossing the isthmus of Suez. Thus he would be able to circumnavigate the world, visiting many points of interest, making the trip in 140 days: The commercial advantages which meration here, and too well known to re-

Recently the Eritish government has de-'cided to have a line of steamers to the 'East' which, together with the proposed. American line across the Pacific, will complete the steam cucle around the globe.

How to Make Vinegar.

There are many great notions entertained among our farmers about making vinegar. The grand old plan was to put out cider or water in a cask to the sun, and expose it to the luminary with a bottle in the bung-hole. There are still as many ideas ng soft-soap, and luck is frequently held to the empire who decides whether it will

be vinegar or no vinegar. . The reason why cider or other fluid mixtures change their nature and become vinegar is owing to a transformation of the particles and then a separation of one or more and a combination of others. The oxygen of the aunosphere, although it is not now, as was once believed to be, the only acidifier, still it is the great one, and vinegar is formed by the cider parting with its carbonic acid gas which it cannot do without absorbvinegar rapidly and surely, is to expose the cider as much as possible to the atmosphere. The new way and what is supposed by many to be the patent way, to make vinegar, is to let the cider percolate over a very exposed surface. This is the way they make it in the vinegar manufactory. The apartment where it is made is freely exposed to the air, and is kept at a temperature of about 50°. The cider is left to run in small streams into troughs with bottoms full of small holes; then from that over very be changed into vinegar into layers or stra-
