#### Later from Cuba.

The recent news from Cuba inspires the hope that the Cubans will be able to throw off the Spanish yoke without the assistance of their neighbors. If the news is reliable, it proves that the Cubans are not content with Spanish rule, as was asserted by a portion of the press in this country, during the recent Lopez and Quitman movements, in favor of Cuban independence .and rather a well written document, and declares "that the Island of Cuba is, and, by the laws of Nature ought to be independent of Spain; and that henceforth the inhabitants of Cuba are free from all obedience or subjection to the Spanish Government, and the individuals composing it; owing submission only to the authority and direction of those who, while awaiting the action with the command and government of each locality, and of the military forces." The favor of the American people is invoked in the "Declaration," and there cannot certainly be a citizen of the United States, who does not sympathise with these people, in their struggles for liberty. The substance of the Declaration, together with the particulars of the revolution as far as it has progressed, will be found in another column.
