The Lehiah Register. Allentown, Pa. THURSDAY, AUGUST 28, 1851.

The Cuba Excitement.

The greatest excitement is manifested in re gard to the fate of the small but gallant band which has landed on the Island. Meetings are being held in New York, Philadelphia, Boston, Baltimore, Cincinnati, New Orleans, in short, in all the larger cities of the United States, to express their detestation of the terrible Massacre of the 16th instant, in Havana, and the moral influence of the sanction of the American people, to the movements for the regener ation of an enslaved people.

Later intelligence from Cuba, inserted in another part of our paper, . will attract increased attention. If true, it is indeed important in more senses than one. We trust that that portion of it which relates to the indignities offered to the Spanish Consul at New Ocleans, may prove an exaggeration.

Still Later News .- By telegraph we learn that the steamer Saranac sailed on Tuesday last, August 26th, from Nortolk, Virginia, for Havana. Commodore Parker, commander of the Home Squadron, takes with him instructions to enquire into the cause of firing upon, and | do with them as she pleased, however much chasing the United States mail steamer Falcon, and investigate the murdering and butchering of the fifty-two Americans, at the City of Hawana, on the 16th instant.

Advertising.

Nothing is more clearly settled, or more universally admitted, than the best money spent by a business man is that paid for advertising. The fact has been demonstrated throughout the the world. Men will pay enough for a handsome sign to embellish their stores, for elegant windows, and for oysters, drinks, cigars, confectionary and kuick-knacks, to pay a half a dozen years' advertising bills, and all without any benefit to their business or themselves, to beigained by freely advertising. Hundreds ought to be paid where tens are now, if merclants would thrive and make money.

It does not answer to dabble lightly in the mitter. A man may as well expect to wash hi hands by dipping a finger's tip in the wate, as to give his business a sensible, clean li, by allittle advertising. The true way, and th profitable one, is, to pay for liberal adver- forces - Bulletin. ting, and then use it. Keep the mill-wheel tuning all the time, and neople will certainly sid you their grist after a while. Depend upn it, half of the business men who "burst up might avoid the painful and disastrous ent, by resorting to the printer's instead of m paid for shaving, and other follies, would ake the foolish men who pay for those luxlies, rich and comfortable. Try it and see. We wish that our merchants, mechanics, and preciate the importance of advertising. Evety fold. Try it in the "Register."

Arnold's Patent Sash Lock.

. For further particulars we refer our read.

The Cuban News.

The community has been shocked by the times, and Spain, in her rudest days, was never more mercilessly ernel.

Without pretending to defend the cause of man, it was on motion the Cuban invaders, we cannot help asking what sympathy can Spain expect from civiliz follow in her contest with the insurgent Cubans? She is weak, and, in this bloody slaughter, shows one of the first features of weakness-cowardice-in killing the prisoncontrasted with this bloodiest act of modern history.

They knew that, in joining this adventure nader Lopez, they were acting in violation, not only of the Spanish, but of American laws. Our government can do nothing to avenge the murder of these men. They were the lawful prisoners of Spain, who had a legal right to she might shock the moral sense by her mode of exercising this right. But it remains to be seen whether the sanguinary cruelty of this slaughter at Havana will not raise such a flame as can never be openched until Cuba is free

The civilized world has often wondered to see a rotten, decrepit European monarchy, which is too weak to sustain itself, exercising dominion over the fair island of Cuba, three thousand miles off. This wonder will be increased by the discovery of the method that Spain adopts to preserve this dominion, and it is our opinion that there will be raised, notonly in Cuba, but in the United States, a desire candle and light it for them. to avenge the murders of these fifty men, which will lead to a universal revolution in Cuba, and the speedy extinction of authority in thus provided themselves with a light, they

Astounding Invention.

And the voice too-it is amazingly peculiar. I haven't any superfluity of sense-but- too take much to be an aristocrat. I guess aristoc. \$164,524. racy is lack of sense, as much as anything .---

Sense, of a certain sort, may accompany it, or be in the same creature. But it is a senseless concern, and moreover superlatively hateful.

New Calculating Machine.

An extraordinary calculating machine, says the London Times, is now placed in the Russian Court. It is the invention of a Polish Jew, named Staffel, a native of Warsaw, and works addi-

tion, substraction, multiplication and division, with a rapidity and precision that are quite as. tonishing. It also performs the operation of extracting the square root and the most complicated sums in fractions. The machine, which the

inventor calls Arithmetica Instrumentalis, is about the size of an ordinary toilet, being about 18

ing 13 figures, is immovable; the second and engraved on a semi-circular ring to the right, only one fourth to the lower provinces. and underneath is a hand, which must be point-The figures being properly arranged, the simple turn of a hundle is then given, and the operation is performed at once as it by magic. The most question be wrongly stated-as, for instance, a

greater number being placed for substraction ! from a lesser, it detects the error, and the ringing of a small bell announces the discovery .----The inventor has exhibited the powers of this wonderful calculating machine to the Queen, The inventor also exhibited a machine for as.

certaining by weighing the fineness of gold or 476,921 tons for Canada. silver, but this is to be submitted to further and more severe tests. Both machines are, to say

Interesting Statistics.

The following important facts were contained in a recent speech of Mr. Merritt in the Parliament of Canada :

The deep sea fisheries on the Banks of New. foundland, furnish employment for 500 large vesheartless aristocracy. I detest it above all things. sels, manned by 25,000 French seamen, who eatch one million of quintals of fish. Letter from a Murderer.

In the Kent News, of Saturday, we find the following copy of a letter from William Shelton, to his mother, written two days before his execution :

Chestertown Jail, August 6, 1851. My Dear Mother : -

I have seen you for the last' time in this world-on the day after to, morrow I shall close my life on the gallows; I acknowle edge on many occasions I have sinned against you, and set at defiance your words of reproof and advice, and often have you cautioned me against the paths I was pursuing and predicted that they would terminate in a disgraceful death? -may all young men take warning from me, and when violating the obligations due to parents and especially to the mothers who bore them, the end of such is certain and sudden destruction. How true will your prophetic words prove -when in the anguish of your soul you have expressed your fears that my days would be ended on the scaffold or within the bars of a prison. I pray that God will forgive all the suffering and anguish that I have caused you, and that in his mercy he will soften this last blow from an un. dutiful son upon the heart of a mother. In my dying, my last thoughts will turn to you, and my last prayer next to mercy in my own sinful soul, will be that God will stay and support your de. clining years.

I can say nothing to comfort or console you except to protest my innocence. I enclose a lock of my hair, which I hope you will keep in memory of your very unfortunate and misera-
