From one day to another, Louis Kossuch may be expected to touch our shores, the land that he so ardently longed to tread, as the sacred soil of liberty and constitutional government. We trust that preparations have been, made, in the event of his landing, to give him an honorable reception.

One of the most pleasing coincidences of modern times is the complete identity of feeling in the United States of America and in Great Britain on the subject of the Hungarian struggle. The same homage is paid, the same enthusiasm kindled, in those two great divisions of the Anglo-Saxon race, to the noblest stand made for liberty, in modern times against tyrannic powers and overwhelming force. That identity of feeling is a hopeful promise that, if the event of Europe should ever take such a course as to present, a formidable absolutist league threntening the freedom of England and of the west, this country may find in the generous breasts and strong arms of the American brethren that disinterested and efficient alliance and support, which for centuries we have vainly sought in Europe.

The most striking feature in Kossuth's political life is the smallness of the means employed by him, and his wonderful success. He had but his pen and tongue in the midst of a country of which by no means the whole population sympathised with his ideas of Magyar independence. Like ()' Connell, he found the oppression of his country heavy, and when none entertained hope but himself, he undertook the task, devoted himself with the resolve never to flinch from it. O'Connell, however, had a fair field to manœuvre in. Whilst the Austrians were able to gag Kossuth's tongue in public, and prohibit the press from spreading the productions of his pen, O'Connell had all the aids of publicity, and all the advantages of association. The Irish patriot was emboldened by the degree of freedom, and the rights already granted to his country, to assume the offensive, and to conquer the rest. Kossuth contended himself for the most part with remaining on the defensive, and could he have upheld the constitutional monarchy, would have derided not to advance or to transgress the bounds of a not very liberal law and consti-

But the Austrian cabinet under Metternich was not content with leaving Hungary as it was. Its constant effort was to sap the independence of Hungary, nullify its representative system, and centralise its administration. Schwarzenberg himself has done nothing more audacious than was attempted by the old Austrian government, when it sought to replace the local authority of the Hungarian Comitat by a prefect such as the French Emperor of the Roman Czar might appoint.

Against this Kosauth struggled with the inveteracy and pertinacity of O'Connell .-And when Austria sought to manage the comitate, or electorial districts, by preventing the debates of the Diet from being published, and at the same time preventing the press from appearing, Kossuth actually undertook to inform each comitat of what was passing by means of his pen, and without the public intervention of the press.

It has been the aim of Austria, and of the scribes whom it has inspired to represent to Kossuth as a leader of mere democracy, as a republican of the French school. Never was there a more unfounded change The struggle in Hungary was for constitu tional government against absolutism; for a constitution with the King of the House of Hapsburg, if possible; but prepared to reject even the hereditary House of Hapsburg, if it resolved to abolish the liberties and the Diet of Hungary. Constitutionalcome republicans in countries where monarchy insists on be jng absolutism.

When the House of Hapsburg, however or the ministers who represented it, resolved to have the restoration of the manarchy, not with a constitution, as they might have done. and in the support of which they might have made ample use of Kossuth and of Hungary-when they resolved on a recovery of absolute power by military violence, then indeed Kossuth did not shrink from meeting the arms of the Austrian empire by the levy of the Maygar. What hardihood it required to take that step, what eloquence to precipitate the national mind into the struggle, what skill to organize military resistance, as well as financial means of supporting it, posses the bounds of an article to Suffice it, that the armics of Austria, led by a veteran general, were first baffled and them defeated, and driven back to the gates of Vienna in a single campaign.

The intervention of Russia, with an army of 180,000 men, in support of the recruited forces of Austria, reversed the chan, very name of Kossuth. ces of war in the second campaign, And yet, even at the head of 180,000 men, the Can had recourse to bribery and intrigue, literally buying the general to whom Kosouth had confided the chiefarmy of Hungary into the most manifest acts of treachery and surrender. It is no shame to have succumbed under such fearful odds, and under the united absolutism of Europe. Nor can the succumbing be even said to be final, in the fact of the grand experiment, so manfully proved, that Hungary was more than a match for Austria, and in single-handed fight had beaten and disgraced the Austrian

Never in any country did a champion of freedom display greater consistency, greaer courage and perserverance, than Louis wonders; never in sinking under the most ingincessantly a hundred miles an hour with- hearty to an uncommon degree. They be-
