JOB PRINTING,

Neatly executed at the "Register" Office.

New York Store!

Cheap Bargains to be Made! Great Cargo of Goods!

The undersigned take this method to inform the public, that they have just returned from New York and Philadelphia with a large stock of FALL AND WINTER GOODS...

at which they are now engaged in unpacking, at their old Stand, in West Hamilton Street, next door to the Post Office. They are satisfied that they can please all who may see proper to give them a call, and such who fail to give them a call, will certainly miss a bargain as a larger assortment of goods never was offered in Allentown.

They have adopted the plan of quick sales with small profits. Farmers, when you come to Allentown, step into the "New York Store" and examine the mountains of goods, and you will save 10 per cent. To name all the goods would be impossible as it would fill the whole paper, we therefore only name the following:

Ladies Dress Goods. Such as Silks of all qualities and colors cheaper than ever they were offered in Allentown, Silk Poplins, Alpacaes, Monde Laines, all qualities of Calicoes, &c., &c.

Shawls! Shawls! Buy State Shawls by the case, cheaper than ever before offered, also a heavy assortment of other shawls, of all colors and styles. In short, all styles of fancy dress goods.

They are thankful for past favor, and hope by selling cheap and constantly keeping a full assortment of goods they will hereafter be able to keep the custom they now have, and be able to add many new ones, which will find them always at the right place.

ARNOLD'S PATENT SASH LOCK. The subscribers take this method to inform the citizens of Allentown, and the surrounding country, that they have lately purchased the right of

Arnold's Patent Sash Lock for Lehigh county. This Lock, for simplicity goes ahead of any thing in the way of Sash Locks ever got up, and is even superior to the Sash Weights, and at less than one-fourth the cost.

As an evidence of its simplicity and durability we would only mention, that it has taken the premiums of all the Fairs, where it has been exhibited for competition. Of this number is the "New York State Fair of 1849 and 1850," "State Fair of Maryland in 1850," and "Fair of the American Institute" in 1850. Hundreds of recommendations might be added, but we deem it unnecessary, as the article will recommend itself.

August 12, 1851.

Baker's Improved Churn.

With Double Spiral Wheel. So numerous are the Churns, that we had almost come to the conclusion, that all were but mere modifications without any essential improvement and under these impressions we slightly examined this Churn. Closer investigation, however, has led us to a different conclusion. As the most simple and the least observable improvement is often the most important, appears to be the case here. Mr. Baker's Churn is simple, durable and not liable to get out of repair, easily worked, it cures a constant supply of pure air, displacing the gas as it is created, and produces thorough and rapid agitation of the cream. The mechanical construction of the Paddles is such as to be the most perfect in bringing the Butter together in five to twenty minutes.

The good qualities of the Churn, have been fully established, as it has been tested in trials with other Churns, and has brought them in far less time, and in much greater quantity and of a better quality.

The simplicity of construction renders the cleaning of this Churn less laborious than any other now in use. They may be examined and purchased from the subscriber, at his workshop, near Siegersville, North Whitehall township, Lehigh county, on very reasonable terms.

Another Artful Wonder!

PEPSIN AN ARTIFICIAL DIGESTIVE, A GREAT DISPEPSIA CURE!

Prepared from Rennet for the fourth Stomach of the Ox; after the directions of Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M.D., No. 11, North Eighth Street, Philadelphia, Pa.

This is a truly wonderful remedy for indigestion, Dyspepsia, Flatulency, Liver Complaint, Constipation, and Debility curing after Nature's own method, by Nature's own agent, the Gastric Juice.

Half a teaspoonful of this Fluid, infused in water, will digest or dissolve, Five Pounds of Roast Beef in about two hours, out of the stomach.

Digestion.—Digestion is chiefly performed in the stomach by the aid of a fluid which freely exudes from the inner coat of that organ, when in a state of health, called the Gastric Juice. This fluid is the Great Solvent of the Food, the Purifying, Preserving and Stimulating Agent of the stomach and intestines. Without it there will be no digestion—no conversion of food into blood, and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured stomach produces no good Gastric Juice, and hence the disease, distress and debility which ensue.

Pepsin and Rennet.—Pepsin is the chief element, or great digesting principle of the Gastric Juice. It is found in great abundance in the solid parts of the human stomach after death, and sometimes causes the stomach to digest itself, or eat up itself. It is also found in the stomach of animals, as the ox, calf, &c. It is the material used by farmers in making cheese, called Rennet, the effect of which has long been the special wonder of the dairy. The curdling of milk is the first process of digestion. Rennet possesses astonishing power. The stomach of a calf will curdle nearly one thousand times its own weight of milk. Baron Liebig states that "One part of Pepsin dissolved in sixty thousand parts of water, will digest meat and other food." Dissolved stomachs produce no good Gastric Juice, Rennet or Pepsin. To show that this want may be perfectly supplied, we quote the following:

Scientific Evidence!—Baron Liebig, in his celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid may be readily prepared from the mucous membrane of the stomach of the Calf, in which various articles of food, as meat and eggs, will be softened, changed, and digested, just in the same manner as they would be in the human stomach."

Dr. Preim, in his famous treatise on "Food and Diet," published by Wilson & Co., New York, page 35, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr. John W. Draper, Professor of Chemistry in the Medical College of the University of New York, in his "Text Book of Chemistry," page 386, says, "It has been a question whether artificial digestion could be performed—but it is now universally admitted that it may be."

Professor Duglison of Philadelphia, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice, obtained from the living human stomach, and from animals are well known. "In all cases," he says, "digestion occurred as perfectly in the artificial as in the natural digestions."

As a Dyspepsia Cure.—Dr. Houghton's preparation of Pepsin has produced the most marvellous effects, curing cases of Debility, Emaciation, Nervous Decline, and Dyspeptic Consumption, supposed to be on the very verge of the grave. It is impossible to give the details of cases in the limits
