AN ARTIFICIAL DIGESTIVE Fluid, or Gastric Juico

A GREAT DISPEPSIA CURER! Prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Lie, big, the great Physiological Chemist, by J. S. Houghton. M. D., No. 11, North Eighth Street, Philadelphia, Pa.

This is a truly wonderful remedy for Indigestion, Dyspepsia, Jaundice, Liver Complaint, Constipation, and Debility. curing after Nature's own method, by Nature's own agent, the Gastric Juice.

Finlf a tenspoonful of this Fluid, infused in water, will digest or dissolve, Five Pounds of Roast Beef in about two hours, out of the stomach.

Digestion. - Digestion is chiefly performed in the stomach by the aid of a fluid which freely exudes from the inner coat of that organ, when in a state of health, called the Gastric Juice. This fluid is the Great Solvent of the Food, the Purifying, Preserving and Stimulating Agent of the stomachand intestines. Without it there will be no digestion - no conversion of food into blood. and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured stomach produces no good Gastric Juice, and hence the

Pepsin and Rennet .- Pepsin is the chief element, or great digesting principle of the Gastric Juice. It is found in great abundance in the solid parts of the human stomach after death, and sometimes causes the stomach to digest itself, or ent itself up. It is also found in the stomach of animals, as the ox, calf, &c. It is the material used by farmers in making cheese, called Rennet, the effect of which has long been the special wonder of the dairy. The curdling of milk is the first process of digestion. Rennet possesses astonishing power. The stomuch of a calf will curdle nearly one thousand times its own weight of milk. Baron Liebig states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest meat and other food." Diseased stomachs produce no good Gastric Juice, Rennet or Pepsin. To show that this want may be perfectly supplied, we quote the

mistry in the Medical College of the University of New York, in his "Text Book of Chemistry," page 386, says, "it has been a question whether artificial digestion could be performed-but it is now universally admitted that it may be."

his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice, obtained from the living human stomach and from animals are well known.
