## Allentown Academy.

J. N. Gengory, A. M., Principal, Mrs. Emply Dochar Gregory, Teacher of Vocal and Listromental Siesic. Miss Jane Gangery, a ricercal of the Fe-

male Department. The Fall 'term of this Institution will commence on Wednesdry the first day of September next. In making this announcement the trustees cannot refrain from expressing their firm conviction that the Academy is now in most efficient hands. Better advantages in all the branches of a thorough education have never been offered to this community. The satisfactory result of the Spring term which has just closed, coaumenced and carried on as a was under embarraszing circumstances incident to the introduction of new preceptors and a comparatively new system has convinced us that the Institution will ere long become one of the best in Pennsylvania. Parents wishing a school where their children will be well governed and correctly taught the English language, where their sons will be well propared for College or Mercantile life, will do well to patronize this our own Institution.

PEPSIN!

## AN ARTIFICIAL DIGESTIVE

Fluid, or Gastric Juice! A GREAT DISPEPSIA CURER I

Prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Lie big, the great Physiological Chemist, by J. S. Houghton. M. D., No. 11, North Eighth Street, Philadelphia, Pa. This is a truly wonderful remedy for In-

digestion, Dyspepsia, Jaundice, Liver Complaint, Constipation, and Debility . curing after Nature's own method, by Nature's own agent, the Gastric Juice. Half a teaspoonful of this Fluid, infused

in water, will digest or dissolve, Five Pounds of Roast Beef in about two hours, out of the stomach.

Digestion. - Digestion is chiefly performed in the stomach by the aid of a fluid which freely exudes from the inner coat of that organ, when in a state of health, called the Gastric Juice. This fluid is the Great Sovent of the Food, the Purifying, Preserving and Stimuating Agent of the stomach and intestines. Without it there will be no digestion -- no conversion of food into blood. and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whoe digestive apparatus. A weak, haf dead, or injured stomach produces no good Gastric Juice, and hence the

Pepsin and Rennet .- Pepsin is the chief element, or great digesting principle of the Gastric Juice. It is found in great abundance in the soid parts of the human stomach after death, and sometimes causes the stomach to digest itself, or eat itself up. It is also found in the stomach of animals, as the ox, calf, &c. It is the material used by farmers in making cheese, called Rennet, Since their incorporation, a period of eighteen the effect of which has long been the special wonder of the dairy. The curdling of mik is the first process of digustion. For mik is the first process of digestion. Rennet possesses astonishing power. The stomach of a calf will curdle nearly one thousand times its own weight of milk. Baron Liebig states that, "One part of Pepsin stomachs produce no good Gastric Juice, Rennet or Pepsin. To show that this want may be perfectly supplied, we quote the

following Scientific Evidence!-Baron Liebig, in his celebrated work on Animal Chemistry, enys: "An Artificial Digestive Fluid may be readily prepared from the mucous membrane of the stomach of the Call, in which various articles of food, as meat and eggs, will be softened, changed, and digested, just in the same manner as they would be in the

As a Dyspepsia Curer .- Dr. Houghton's preparation of Pepsin has produced the most marvellous effects, curing cases of De-70 bility, Emaciation, Nervous Decline, and Dyspeptic Consumption, supposed to be on the very verge of the grave.
